# Title: Biodiversity and Conservation

**1. Match Column I with Column II**

**Choose the correct answer from the options given below:**

| Column I | | Column II | |
|---|---|---|---|
| A | Robert May | P | Species-Area relationship |
| B | Alexander von Humboldt | Q | Long term ecosystem experiment using out door plots |
| C | Paul Ehrlich | R | Global species diversity at about 7 million |
| D | David Tilman | S | Rivet popper hypothesis |

(1) A – Q, B – R, C – P, D – S

(2) A – R, B – P, C – S, D – Q

(3) A – P, B – R, C – Q, D – S

(4) A – R, B – S, C – Q, D – P

# Title: Biodiversity and Conservation

**2. Which of the following is the most important cause for animals and plants being driven to extinction?**

(1) Habitat loss and fragmentation

(2) Drought and floods

(3) Economic exploitation

(4) Alien species invasion

# Title: Biodiversity and Conservation

**3. It is hard to believe that there are nearly____ species of orchids.**

(1) 1000

(2) 1,00,000

(3) 2,00,000

(4) 20,000

# Title: Biodiversity and Conservation

**4. Which one of the following has the highest number of species in nature?**

(1) Angiosperms

(2) Fungi

(3) Insects

(4) Birds

# Title: Biodiversity and Conservation

**5. Assertion : Biodiversity is not uniform throughout the world**

**Reason : Biodiversity increases as we move from equator to polar region**

(1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.

(2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.

(3) Assertion is correct but Reason is incorrect.

(4) Both Assertion and Reason are incorrect.

# Title: Biodiversity and Conservation

**6. Where was the World Summit on Sustainable development held?**

(1) South Africa

(2) USA

(3) South America

(4) UK

# Title: Biodiversity and Conservation

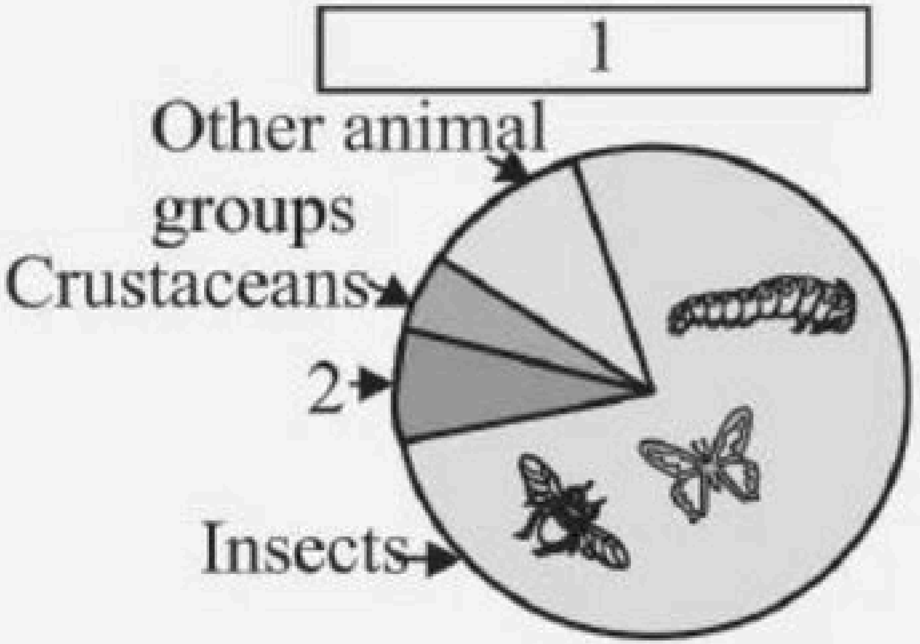
**7. Identify 1 and 2 in the following**

(1) 1 - Vertebrata 2 - Insects

(2) 1 - Invertebrata 2 - Mollusca

(3) 1 - Invertebrata 2 - Crustaceans

(4) 1 - Vertebrata 2 -Crustaceans



# Title: Biodiversity and Conservation

**8. Statement A : The diversity of plants and animals is uniform throughout the world.**

**Statement B : In general, species diversity decreases as we move away from the equator towards the poles.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**9. Statement A : India, with much of its land area in the tropical latitudes, has more than 1,200 species of birds.**

**Statement B : A forest in a tropical region like Equador has up to 12 times as many species of vascular plants as a forest of equal area in a temperate region like the Midwest of the USA.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

**10. Which one of the following is not included under in situ conservation?**

(1) National park

(2) Botanical garden

(3) Sanctuary

(4) Biosphere reserve

**11. Match the columns I and II.**

| Column I | | Column II | |
|---|---|---|---|
| A | World summit | P | Rio de Janeiro |
| B | The Earth summit | Q | *Ex situ* Conservation |
| C | Zoological parks | R | Johannesburg, South Africa |
| D | Hotspots | S | *In situ* conservation |

(1) A – R, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – R, C – Q, D – S
(4) A – Q, B – P, C – R, D – S

# Title: Biodiversity and Conservation

**12. Amongst the animal groups given below, which one appears to be more vulnerable to extinction?**

(1) Insects

(2) Mammals

(3) Amphibians

(4) Reptiles

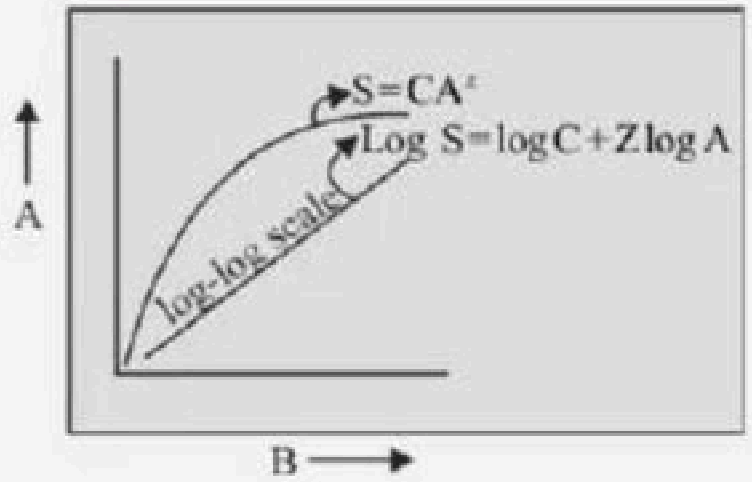
## 13. Match the following.

| Column I | | Column II | |
|---|---|---|---|
| A | Alexander Von Humboldt | P | Rivet |
| B | David Tilman | Q | Species area relationship |
| C | Paul Enhrlich | R | Popularized term 'Biodiversity' |
| D | Edward Wilson | S | Out door plot experiment |

(1) A – Q, B – S, C – P, D – R
(2) A – Q, B – R, C – P, D – S
(3) A – S, B – Q, C – P, D – R
(4) A – Q, B – S C – R, D – P

# Title: Biodiversity and Conservation

## 14. Identify A and B respectively



(1) Species richness and Area

(2) Species diversity and area

(3) Area and species richness

(4) Area and species diversity

# Title: Biodiversity and Conservation

**15. Statement A : The species-area relationships among the entire continents, the Z values in the range of 0.6 to 1.2 .**

**Statement B : The species-area relationship of mammals in the tropical forests of different continents, the slope is found to be 1.15 .**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**16. Statement A : Scientists estimate that in rain forests there might be at least two million insect species waiting to be discovered and named.**

**Statement B : Tropical regions subjected to frequent glaciations in the past, temperate latitudes have remained relatively undisturbed for millions of years**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

**17. The relationship between the species richness and the area for a wide variety of taxa appears as**

(1) Straight line

(2) Sigmoid curve

(3) Zig zag line

(4) Rectangular hyperbola

# Title: Biodiversity and Conservation

**18. Tropics to (23.5°N to 23.5°S) have ____ species as compared to temperate or polar regions.**

(1) Less

(2) Equal

(3) More

(4) None of these

**19. In the species-area relationship, 'Z' represents**

(1) Regression coefficient

(2) Species coefficient

(3) Speices richness

(4) None of the above

# Title: Biodiversity and Conservation

**20. The relation between species richness and area is described on a logarithmic scale by the equation _____**

**Where S = Species richness, A = area, Z = Slope of the line (regression co-efficient), C = Y - intercept**

(1) $\log S = \log C + z \log A$

(2) $\log S = z \log A$

(3) $\log C = \log S + z \log A$

(4) $\log S = \log C$

# Title: Biodiversity and Conservation

**21. Species diversity increase as one proceeds from**

(1) High altitude to low altitude and high latitude to low latitude.

(2) Low altitude to high altitude and high latitude to low latitude.

(3) Low altitude to high altitude and low latitude to high latitude.

(4) High altitude to low altitude and low latitude to high latitude.

# Title: Biodiversity and Conservation

**22. Statement A : With very few exceptions, tropics (latitudinal range of to 23.5°N to 23.5°S) harbour more species than temperate or polar areas.**

**Statement B : New York at 41°N has 205 species of birds.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**23. From equator towards the poles biodiversity**

(1) Decreases

(2) Increases

(3) Remains same

(4) First decreases then increases

# Title: Biodiversity and Conservation

**24. Alexander Von Humbolt described for the first time:**

(1) Laws of limiting factor

(2) Species area relationships

(3) Population Growth equation

(4) Ecological Biodiversity

# Title: Biodiversity and Conservation

**25. Statement A : Speciation is generally a function of time.**

**Statement B : Constant environments promote niche specialisation and lead to a greater species diversity.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

**26. New York at 41°N has ____ Greenland at 71°N only ____ species and**

(1) 56,105

(2) 105,56

(3) 1400,56

(4) 1200,56

# Title: Biodiversity and Conservation

**27. Statement A : The great German naturalist and geographer Alexander von Humboldt observed that within a region species richness increased with increasing explored area, without any limit.**

**Statement B : The relation between species richness and area for a wide variety of taxa (angiosperm plants, birds, bats, freshwater fishes) turns out to be a rectangular hyperbola.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**28. How many times the tropical areas have vascular plants than the temperate areas have?**

(1) 10

(2) 50

(3) 3

(4) 65

# Title: Biodiversity and Conservation

**29. Match the columns I and II with respect to the country and the number of birds found there.**

| Column I | | Column II | |
|---|---|---|---|
| A | Colombia | P | 1,400 species of birds |
| B | India | Q | 105 species |
| C | New York | R | 1,200 species |
| D | Greenland | S | 56 species |

(1) A – R, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – R, C – Q, D – S
(4) A – Q, B – P, C – R, D – S

**30. In the species-area relationship, 'S' represents**

(1) Species richness

(2) Slope of the line

(3) Species -genus

(4) Species extinct

# Title: Biodiversity and Conservation

**31. Identify the incorrect statement**

**I. Speciation is generally a function of time**

**II. Tropical environment is less seasonal, relatively more constant and predictable**

**III. Solar energy contributes to high productivity**

**IV Temperate regions have remained relatively undisturbed for millions of years**

(1) I, II, III, IV

(2) II, III

(3) Only IV

(4) III, IV

# Title: Biodiversity and Conservation

**32. Match the columns I and II about the number of organism found in Amazonian rain forest.**

| Column I | | Column II | |
|---|---|---|---|
| A | 40,000 | P | Mammals |
| B | 1,300 | Q | Reptiles |
| C | 427 | R | Birds |
| D | 378 | S | Plants |

(1) A – R, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – R, C – Q, D – S
(4) A – Q, B – P, C – R, D – S

# Title: Biodiversity and Conservation

**33. For frugivorous birds and mammals in the tropical forests of different continents. Z (slope of the line/regression coefficient) is found to be**

(1) 1.15

(2) 1

(3) 0.2

(4) 0.1

# Title: Biodiversity and Conservation

**34. Statement A : Greenland at $71^0$N only 56 species of birds.**

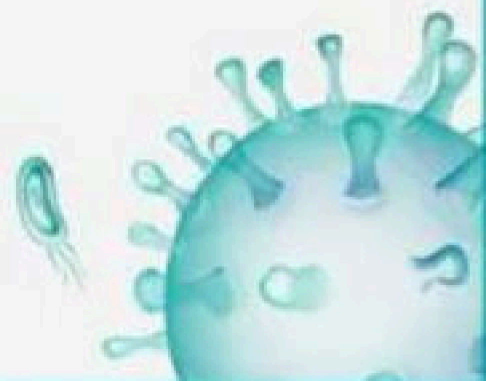
**Statement B : Colombia located near the equator has nearly 1,400 species of birds**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.



# Title: Biodiversity and Conservation

**35. Tropical regions show greatest level of species richness because**

**A. Tropical latitudes have remained relatively undisturbed for millions of years, hence more time was available for species diversification.**

**B. Tropical environments are more seasonal.**

**C. More solar energy is available in tropics.**

**D. Constant environments promote niche specialization.**

**E. Tropical environments are constant and predictable.**

**choose the correct answer from the options given below.**

(1) A, C, D and E only (2) A and B only

(3) A, B and E only (4) A, B and D only

# Title: Biodiversity and Conservation

**36. Approximate number of species of mammals in Amazon forest**

(1) 900

(2) 600

(3) 427

(4) 300

# Title: Biodiversity and Conservation

**37. Alexander von Humboldt observed that, within a region species richness___ with increasing explored area.**

(1) Remains same

(2) Decreased

(3) Increased

(4) Decreased up to a limit

# Title: Biodiversity and Conservation

## 38. Match the columns I and II.

| Column I | | Column II | |
|---|---|---|---|
| A | Colombia | P | 71°N |
| B | New York | Q | Near the equator |
| C | Greenland | R | 41°N |

(1) A – R, B – P, C – Q

(2) A – Q, B – R, C – P

(3) A – P, B – R, C – Q

(4) A – Q, B – P, C – R

**39. The value of 'Z' lies in the range of ____ regardless of the taxonomic group or the region.**

(1) 0.5 to 0.7

(2) 0.3 to 0.7

(3) 0.2 to 0.3

(4) 0.1 to 0.2

**40. Match the columns I and II about the no. of organism found in Amazonian rain forest.**

| Column I | | Column II | |
|---|---|---|---|
| A | Amphibians | P | 1,25,000 |
| B | Invertebrates | Q | 427 |
| C | Fishes | R | 3,000 |

(1) A – R, B – P, C – Q
(2) A – Q, B – R, C – P
(3) A – P, B – R, C – Q
(4) A – Q, B – P, C – R

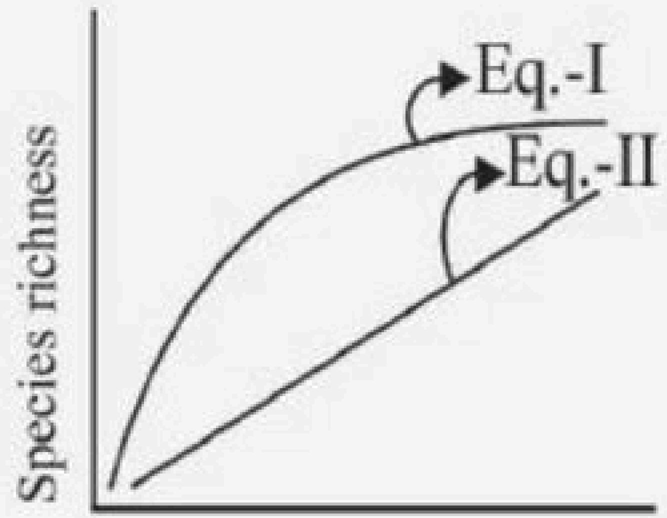
**41. Species richness means**

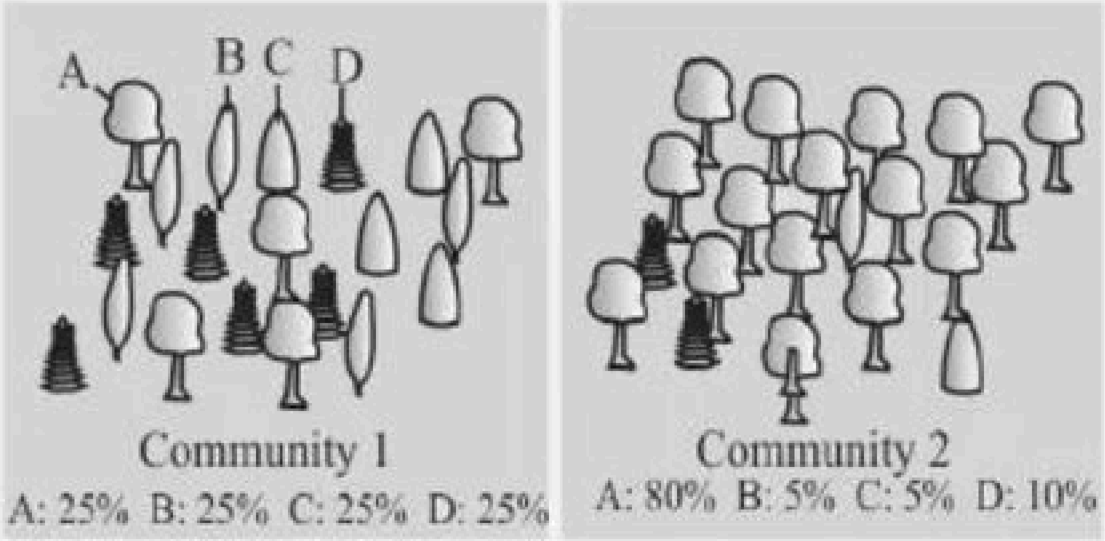
(1) Number of species per unit area

(2) Number of individual in particular species per the total number of different species in a particular area

(3) Number of genetic variation in particular area

(4) Number of genes in a particular species





# Title: Biodiversity and Conservation

**42. Statement A : Amazonian rain forest in North America has the greatest biodiversity on earth- it is home to more than 40,000 species of plants, 13,000 of fishes.**

**Statement B : There is more solar energy available in the tropics, which contributes to higher productivity**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**43. Statement A : For many decades, ecologists believed that communities with more species, generally, tend to be less stable than those with less species.**

**Statement B : A stable community should not show too much variation in productivity from year to year.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

**44. Tilman found that plots with more species showed**

(1) Less year-to-year variation in total biomass

(2) Higher productivity

(3) Both 1 and 2

(4) Nothing like that happens

# Title: Biodiversity and Conservation

**45. Statement A : The 'rivet popper hypothesis' is used by Stanford physiologist Paul Ehrlich.**

**Statement B : The biological wealth of our planet has been declining rapidly and the accusing finger is clearly pointing to human activities.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**46. Red list contains data or information on**

(1) All economically important plants

(2) Plants whose products are in international trade

(3) Threatened species

(4) Marine vertebrates only

# Title: Biodiversity and Conservation

**47. If any extinction of a mutualistic pollinator takes place, what would be its effect on the plants where is pollinate?**

(1) Decreased pollination

(2) Increased pollination

(3) The plant would not be pollinated

(4) Pollination continues whatso ever

# Title: Biodiversity and Conservation

**48. Assertion : Natural fragmentation of habitat leads to speciation.**

**Reason : Artificial fragmentation of habitat leads to extinction of species.**

(1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.

(2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.

(3) Assertion is correct but Reason is incorrect.

(4) Both Assertion and Reason are incorrect.

# Title: Biodiversity and Conservation

**49. The term 'The Evil Quartet' is related with**

(1) Four major causes of deforestation

(2) Four major causes of population growth

(3) Four major causes of genetic mutation

(4) Four major causes of biodiversity losses

# Title: Biodiversity and Conservation

**50. Match the columns I- Some examples of recent extinctions and II with the country it belonged to**

| Column I | | Column II | |
|---|---|---|---|
| A | Quagga | P | Australia |
| B | Thylacine | Q | Africa |
| C | Steller's Sea Cow | R | Russia |
| D | Dodo | S | Mauritius |

(1) A – R, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – R, C – Q, D – S
(4) A – Q, B – P, C – R, D – S

# Title: Biodiversity and Conservation

**51. The organisation which has published "Red Data Book" is**

(1) Convention on International Trade in Endangered

Species of Wild Fauna and Flora

(2) National Wildlife Action Plan

(3) International Union for Conservation of Nature and

Natural Resource

(4) National Environmental Engineering Research Institute

# Title: Biodiversity and Conservation

**52. The IUCN Red List documents the extinction of species which includes**

**(i) 338 species of vertebrates**

**(ii) 359 species of invertebrates**

**(iii) 87 species of plants**

**(iv) 359 species of birds**

(1) and ii are correct

(2) i, ii, iii are correct

(3) i, iii, iv are correct

(4) All of them

# Title: Biodiversity and Conservation

**53. Which of the following is not an example of recent extinction?**

(1) Steller's sea cow

(2) Dodo

(3) Quagga

(4) Pigeon

# Title: Biodiversity and Conservation

**54. An exotic plant that had become a troublesome waterweed in India is:**

(1) Trapa bispinosa

(2) Eichornia crassipes

(3) Ipomoea reptans

(4) Typha latifolia

# Title: Biodiversity and Conservation

**55. Choose the correct statements w.r.t rainforests**

**I. There are tropical rainforest in India**

**II. Amazon rainforest is famed for its biodivesity**

**III. Rainforest biomes can be charactarised by high level of biomes and productivity**

**IV. All the different species in a rainforest are referred to as community**

(1) II, III only (2) III, IV only

(3) I, II, III only (4) I, II, III, IV

**56. Dodo is**

(1) Endangered

(2) Critically Endangered

(3) Rare

(4) Extinct

# Title: Biodiversity and Conservation

**57. Statement A : During the long period billion years) since the origin and diversification of life on earth there were five episodes of mass extinction of species.**

**Statement B : The current species extinction rates are estimated to be 100 to 1,000 times faster than in the pre-human times and our activities are not responsible for the faster rates.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**58. According to the IUCN red data Book which category has maximum extinction of species in last 500 years**

(1) Vertebrates

(2) Invertebrates

(3) Plants

(4) Mammals

# Title: Biodiversity and Conservation

**59. Select the incorrect with respect to recent extinction.**

(1) Dodo- Mauritius

(2) Quagga- Indonesia

(3) Thylacine- Australia

(4) Steller's seacow - Russia

# Title: Biodiversity and Conservation

**60. Point out the plant that has invaded many forest lands in different parts of India,and strongly competes with the native species:**

(1) Withania somnifera

(2) Lantana camara

(3) Solanum nigrum

(4) Quisqualis indica

# Title: Biodiversity and Conservation

**61. Select the incorrect match:**

(1) Lungs of the planet - Amazon rain forest

(2) Extinction due to over exploitation – Passenger pigeons

(3) Nile perch - Cichlid fish

(4) David Tilman - Rivet Popper hypothesis

# Title: Biodiversity and Conservation

**62. Amongst birds, mammals, amphibians and Gymnosperms, the minimum and maximum threat of extinction is faced respectively on**

(1) Birds, Amphibians

(2) Amphibians, Gymnosperms

(3) Mammals, Amphibians

(4) Mammals, Birds

# Title: Biodiversity and Conservation

**63. The alien species introduced into Lake victoria that was responsible for the extinction of cichlid fishes is**

(1) African Catfish

(2) Carrot grass

(3) Water hyacinth

(4) Nile perch

**64. Which of the following statements is correct?**

(1) Parthenium is an endemic species of our country.

(2) African catfish is not a threat to indigenous catfishes.

(3) Steller's sea cow is an extinct animal.

(4) Lantana is popularly known as carrot grass.

**65. The colonisation of tropical Pacific Islands by humans is said to have led to the extinction of more than ___**

(1) 338 species of vertebrates

(2) 359 species of invertebrates

(3) 87 species of plants

(4) 2,000 species of native birds

**66. The last twenty years alone have witnessed the disappearance of ____ species.**

(1) 25

(2) 27

(3) 23

(4) 26

**67. Statement A : Some examples of recent extinctions include the dodo (Mauritius), quagga (Australia), thylacine (Africa), Steller's Sea Cow (Russia) and three subspecies (Bali, Javan, Caspian) of lion**

**Statement B : Extinctions across taxa are not random.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

68. Match the following animals with their category of existence

| Column I | | Column II | |
|---|---|---|---|
| A | 31% | P | Mammals |
| B | 32% | Q | Birds |
| C | 23% | R | Gymnosperms |
| D | 12% | S | Amphibians |

(1) A – R, B – S, C – P, D – Q
(2) A – Q, B – S, C – P, D – R
(3) A – R, B – S, C – Q, D – P
(4) A – S, B – Q, C – R, D – P

# Title: Biodiversity and Conservation

**69. Statement A : Loss of biodiversity in a region may lead to incline in plant production and high resistance to environmental perturbations such as drought.**

**Statement B : Ecologists warn that if the present trend of extinction of species continue, nearly half of all the species on earth might be mutated within the next 100 years.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

**70. Statement A : The last twenty years have witnessed the disappearance of 27 species.**

**Statement B : 31per cent of all gymnosperm species in the world face the threat of extinction.**

(1) Statement A is correct but Statement B is incorrect.

(2) Statement A is incorrect but Statement B is correct.

(3) Both statements are correct.

(4) Both Statements are incorrect.

# Title: Biodiversity and Conservation

**71. What percentage of all living species will go extinct within next 20 to 50 years from human activities, if steps are not taken to conserve species?**

(1) 1-2%

(2) 5-10%

(3) 10-25%

(4) 50-75%

# Title: Biodiversity and Conservation

**72. Assertion : Wild ass sanctuary is a unique habitat of Indian wild ass**

**Reason : It is the remnant gene pool in the world**

(1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.

(2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.

(3) Assertion is correct but Reason is incorrect.

(4) Both Assertion and Reason are incorrect.

# Title: Biodiversity and Conservation

**73. In situ strategies include.**

**I. National parks**

**II. Wildlife sanctuaries**

**III. Biosphere reserves**

**IV. Sacred groves**

**V. Seed bank**

**VI. Zoological parks**

**Choose the correct option.**

(1) I, II, III and VI

(2) II, III and V

(3) I, II , IV, V and VI

(4) I, II, III and IV

**74. Which one of the following is not a method of in situ conservation of biodiversity?**

(1) Biosphere Reserve

(2) Wildlife Sanctuary

(3) Botanical Garden

(4) Sacred Grove

**75. In - situ conservation refers to:**

(1) Conserve only high risk species

(2) Conserve only endangered species

(3) Conserve only extinct species

(4) Protect and conserve the whole ecosystem

# Title: Biodiversity and Conservation

**76. Match the Column-I (% of species facing threat of extinction) and Column-II (Name of species)**

| Column I | | Column II | |
|---|---|---|---|
| A | Red data book | P | Special catagory of protected areas |
| B | Hotspots | Q | Areas rich diversity |
| C | Biosphere reserve | R | Catalogue of taxa facing risk of extinction |
| D | Ex-situ conservation | S | Conservation of organisms outside the habitats |

(1) A – R, B – S, C – P, D – Q

(2) A – Q, B – S, C – P, D – R

(3) A – R, B – S, C – Q, D – P

(4) A – R, B – Q, C – P, D – S

**77. One of the ex situ conservation methods for endangered species is:**

(1) Wildlife Sanctuaries

(2) Biosphere reserves

(3) Cryopreservation

(4) National parks

# Title: Biodiversity and Conservation

**78. Broad utilitarian use consists of**

(1) Provision of oxygen

(2) Pollination

(3) Aesthetic pleasure

(4) All of them

# Title: Biodiversity and Conservation

**79. Which one of the following pairs of geographical areas show maximum biodiversity in our country:**

(1) Sunderbans and Rann of Kutch

(2) Eastern ghats and west Bengal

(3) Eastern Himalaya and Western Ghats

(4) Kerala and Punjab

# Title: Biodiversity and Conservation

**80. In which of the following both pairs have correct combination?**

(1) In-situ conservation: National Park Ex-situ conservation: Botanical Garden

(2) In-situ conservation: Cryopreservation Ex-situ conservation: Wildlife sanctuary

(3) In-situ conservation: Seed Bank Ex-situ conservation: Sacred groves

(4) In-situ conservation: Tissue culture Ex situ conservation: Sacred groves

# Title: Biodiversity and Conservation

**81. Provision of more than 25% of the drugs from the plants and 25,000 species of plants contribute to the traditional medicines. What value does it provide?**

(1) Aesthetic

(2) Ethical

(3) Narrow

(4) Broad

# Title: Biodiversity and Conservation

**82. What is the approximate percentage of the earth covered by hotspots?**

(1) 1.5% (less than 2%)

(2) 2.5%

(3) 3.5%

(4) 4.5%

# Title: Biodiversity and Conservation

**83. The historic convention on Biological Diversity held in Rio de Janeiro in 1992 is known as:**

(1) CITES Convention

(2) The Earth Summit

(3) G-16 Summit

(4) MAB Programme

# Title: Biodiversity and Conservation

84. Read the following statements

(I) The species diversity of animals is much less than that of plants

(II) Sacred grooves are the traditionally protected forest patches where even the cutting of a tree branch is not allowed

(III) Pollution adversely affects the health of an organism but doesn't reduce biodiversity

Which of the above statements is are correct?

(1) I and II (2) II and III

(3) Only II (4) Only I

# Title: Biodiversity and Conservation

## 85. Match Column I and Column II

| Column I | | Column II | |
|---|---|---|---|
| A | Narrowly utilitarian argument | P | Conserving biodiversity for major ecosystem services |
| B | Broadly utilitarian | Q | Every species has an intrinsic value and moral duty to pass our biological legacy in good order to future generation |
| C | Ethical argument | R | Receiving benefits like food, medicine & industrial products |

(1) A – P, B – Q, C – R
(2) A – Q, B – R, C – P
(3) A – R, B – P, C – Q
(4) A – R, B – Q, C – P

# Title: Biodiversity and Conservation

**86. A strict protection of biodiversity hotspots could reduce the ongoing mass extinction by almost**

(1) 20%

(2) 25%

(3) 30%

(4) 35%

# Title: Biodiversity and Conservation

**87. Which of the following comes under the broadly utilitarian reasons for conserving biodiversity**

**i. Industrial product**
**ii. Oxygen**
**iii. Pollination**
**iv. Bioprospecting**
**v. Drugs**
**vi. Aesthetic pleasure**
**vii. Fibre and firewood**

(1) ii, iii, vi
(2) ii, iii, iv, vi
(3) i, ii, iii, vi
(4) ii, iii, iv, vii

# Title: Biodiversity and Conservation

**88. Assertion : In National Park wild life is strictly protected**

**Reason : In National park, activity such as forestry, grazing, cultivation are not allowed.**

(1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.

(2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.

(3) Assertion is correct but Reason is incorrect.

(4) Both Assertion and Reason are incorrect.

**89. Match the columns I (no.) and II (types of insitu conservation).**

| Column I | Column II |
|---|---|
| A 14 | P Wildlife sanctuaries |
| B 90 | Q Biosphere reserves |
| C 448 | R National parks |

(1) A – R, B – P, C – Q

(2) A – Q, B – R, C – P

(3) A – P, B – R, C – Q

(4) A – Q, B – P, C – R

# Title: Biodiversity and Conservation

**90. In situ conservation of national genetic resources can be achieved by establishing**

(1) National park

(2) Wild life sanctuaries

(3) Biosphere reserves

(4) All of the above

# Title: Biodiversity and Conservation

**91. Consider the following strategies for conservation of biodiversity and select correct option for in-situ approaches**

**i. Sacred groves**

**ii. Wild life safar**

**iii. National parks**

**iv. Tissue culture**

**v. Germplasm storage**

**vi. Biosphere reserve**

(1) ii, iii and vi

(2) i, iii and vi

(3) i, iv, v and vi

(4) i, ii, iii and vi

# Title: Biodiversity and Conservation

## 92. Match the columns I and II about India.

| Column I | | Column II | |
|---|---|---|---|
| A | India's share of world's land area | P | 8.1 per cent |
| B | India's share global species diversity | Q | 2.4 per cent |
| C | Species of plants in India | R | 45,000 |

(1) A – R, B – P, C – Q
(2) A – Q, B – R, C – P
(3) A – P, B – R, C – Q
(4) A – Q, B – P, C – R

**93. The IUCN Red List (2004) documents extinction in the last 500 years. Match the columns I and II.**

| Column I | | Column II | |
|---|---|---|---|
| A | 338 | P | Invertebrates |
| B | 359 | Q | Plants |
| C | 87 | R | Vertebrates |

(1) A – R, B – P, C – Q
(2) A – Q, B – R, C – P
(3) A – P, B – R, C – Q
(4) A – Q, B – P, C – R

# Title: Biodiversity and Conservation

**94. Match the columns I and II.**

| Column I | Column II |
|---|---|
| A Species of ants | P 20,000 |
| B Species of orchids | Q 3,00,000 |
| C Species of beetles | R 28,000 |
| D Species of fishes | S 2,00,000 |

(1) A – P, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – S, B – R, C – P, D – Q
(4) A – Q, B – P, C – R, D – S

# Title: Biodiversity and Conservation

**95. Match the following.**

| Column I | | Column II | |
|---|---|---|---|
| A | 14% of forest area on earth surface is reduced to not more than 6% | P | Over explitation |
| B | 'Need turns to Greed' result in extinction of species | Q | Co-extinction |
| C | Extinction of more 200 species of cichild fish | R | Habitat loss and fragmentation |
| D | Extinction of pollinator leads to species extinction of plants | S | Invasion of Alien |

(1) A – R, B – Q, C – S, D – P

(2) A – P, B – R, C – S, D – Q

(3) A – R, B – P, C – S, D – Q

(4) A – P, B – Q, C – R, D – S

# Title: Biodiversity and Conservation

**96. Match the animals given in column I with their location in column II:**

**Choose the correct match from the following:**

| Column I | Column II |
|---|---|
| A Dodo | P Africa |
| B Quagga | Q Russia |
| C Thylacine | R Mauritius |
| D Stellar's sea cow | S Australia |

(1) A-P, B-R, C-Q, D-S (2) A-S, B-R, C-P, D-Q

(3) A-R, B-P, C-Q, D-S (4) A-R, B-P, C-S, D-Q

# Title: Biodiversity and Conservation

**97. The highest number of species in the world is represented by**

(1) Fishes

(2) Reptiles

(3) Fungi

(4) Mammals

# Title: Biodiversity and Conservation

**98. The active chemical drug reserpine is obtained from:**

(1) Datura

(2) Rauwolfia

(3) Atropa

(4) Papaver

# Title: Biodiversity and Conservation

**99. In India estimated plant & animal sps. yet to be discovered & described are**

(1) More than 1, 00, 000 plant and more than 3, 00, 000 animal sps.

(2) More than 2,00,000 plant and more than 1, 00, 000 animal sps.

(3) Less than 1,000 plants and more than 3,000 animal sps.

(4) More than 1,00,000 plants and less than 3,000 animal sps.

# Title: Biodiversity and Conservation

**100. The reasons behind conserving biodiversity can be grouped into categories, which include**

**I. Broadly utilitarian**

**II. Narrowly utilitarian**

**III. Long utilitarian**

**IV. Ethical utilitarian**

**V. Small utilitarian**

**Choose the correct option.**

(1) I, II, III and IV

(2) II, III and IV

(3) I, II and IV

(4) I, III , IV and V
