

The figure given below is of Tobacco Mosaic Virus. Identify the label (a)

- a. RNA
- b. dsDNA
- c. ssDNA
- d. Capsid

What is the function of the cell marked as (a)

- a. Fix atmospheric oxygen
- b. Fix atmospheric nitrogen
- c. Fix atmospheric carbon dioxide
- d. Utilise sunlight

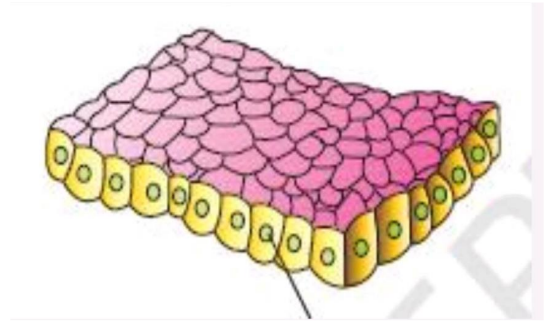

Mark the correct answer with relation to aestivation in the diagram

- a. Valvate- Calotropis
- b. Twisted- China rose
- c. Valvate- China rose
- d. Twisted- Calotropis

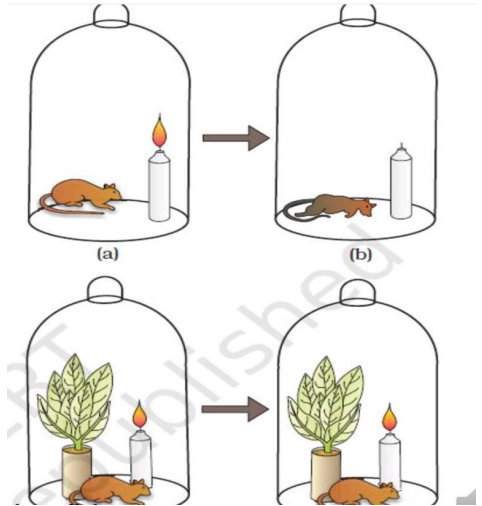

What is the common location of the type of epithelium that has been shown in the figure

- a. Blood vessel
- b. Alveoli
- c. PCT
- d. Intestinal lining

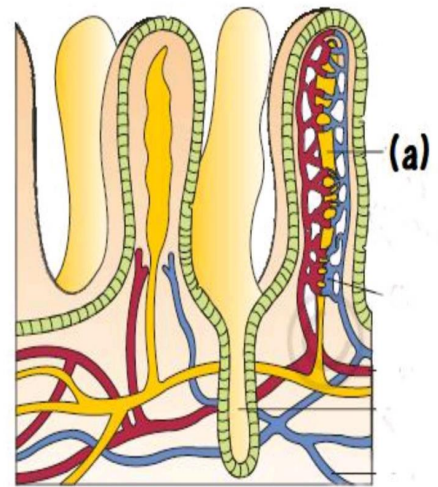

The experiment demonstrated in the figure was carried out by

- a. Engelmann
- b. Priestley
- c. Ingenhousz
- d. Von Sachs

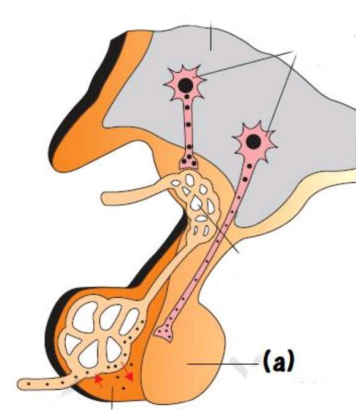

What is the function of structure labelled as (a)

- a. Absorption of glucose
- b. Absorption of amino acids
- c. Absorption of fats
- d. Supply blood to villi

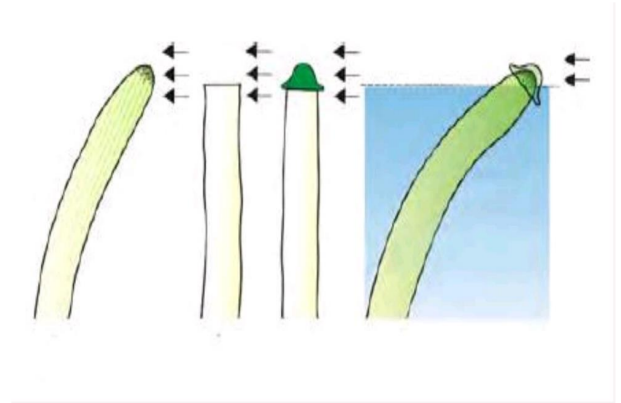

Which is the hormone synthesized by (a) part of pituitary

- a. FSH
- b. TSH
- c. ADH
- d. None of these

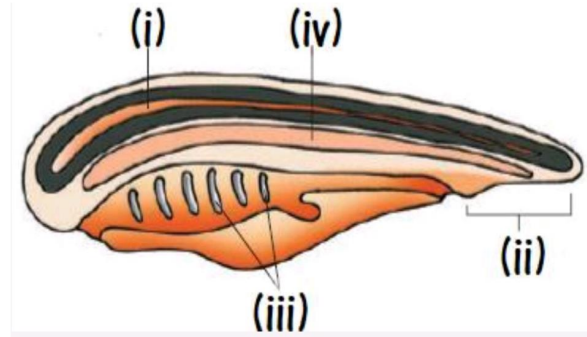

The given diagram represents an experiment used to demonstrate which of the following plant hormones

- a. Gibberellins
- b. Cytokinins
- c. Ethylene
- d. Auxin

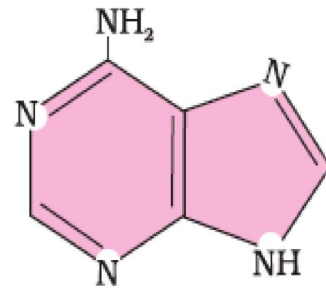

What is the correct labelling for the diagram given

- a. (i)- notochord
- b. (iii)- anal part
- c. (iv)- notochord
- d. (ii)- gill slits

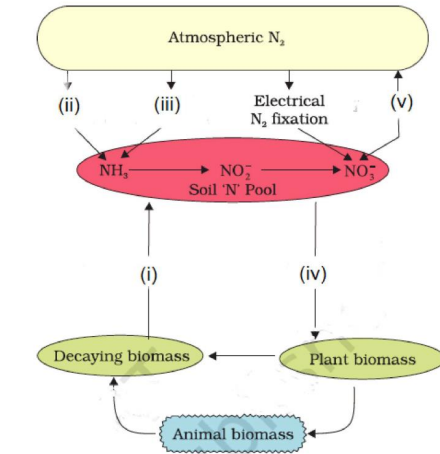

What is the biomolecule demonstrated in the diagram

- a. Nitrogen base
- b. Nucleoside
- c. Nucleotide
- d. None of these

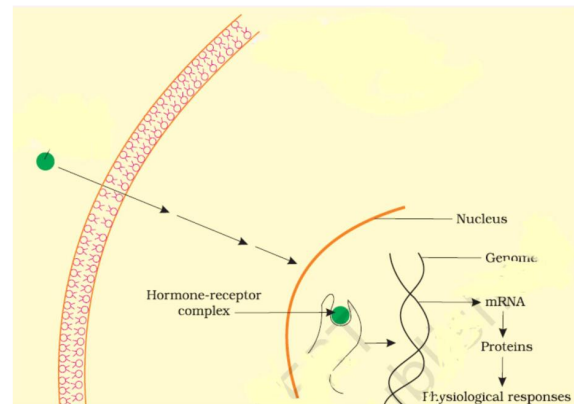

What does (i) denotes

- a. Denitrification
- b. Nitrogen fixation
- c. Ammonification
- d. Nitrogen uptake

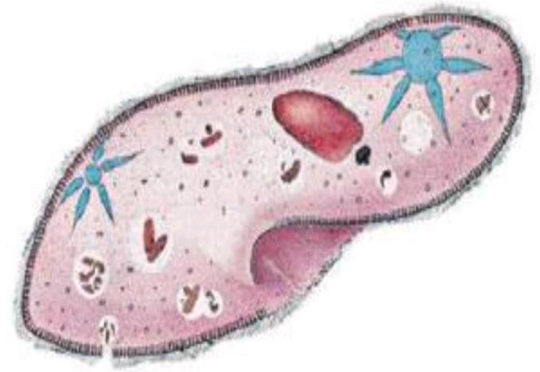

Which of the following is an example of hormone that has

- a. FSH
- b. Estrogen
- c. Insulin
- d. LH

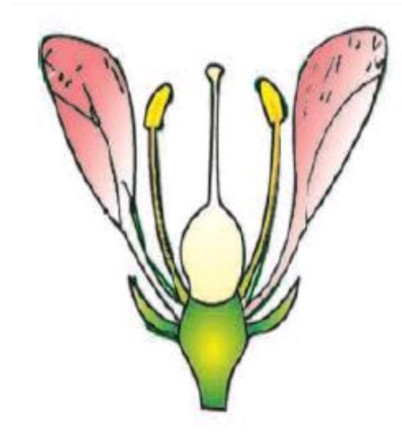

Organism given in the figure is an example of

- a. Protozoan
- b. Euglenoids
- c. Chrysophytes
- d. Sporozoan

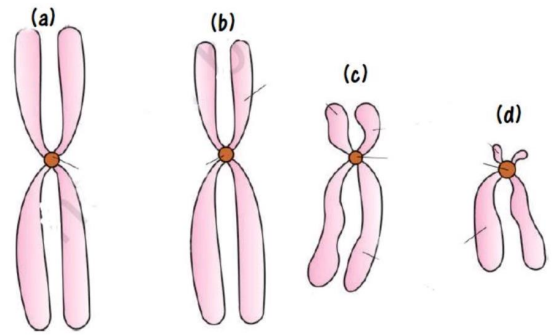

Mark the correct option

- a. Hypogynous- Rose
- b. Perigynous- plum
- c. Hypogynous- mustard
- d. Perigynous- china rose

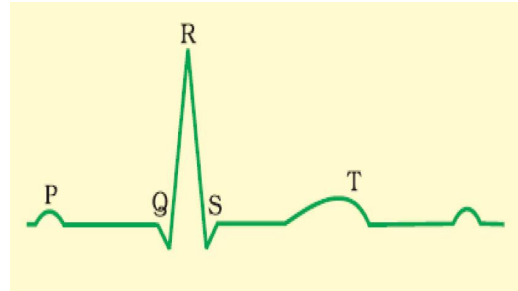

Which one of the following is correct option

- a. Acrocentric
- b. Metacentric
- c. Sub Metacentric
- d. Telocentric

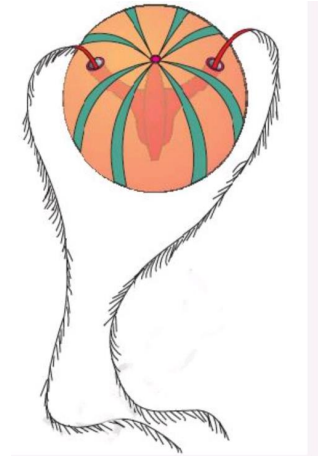

What does the T wave signifies

- a. Depolarisation of atria
- b. Depolarisation of ventricle
- c. Repolarisation of ventricle
- d. Repolarisation of atria

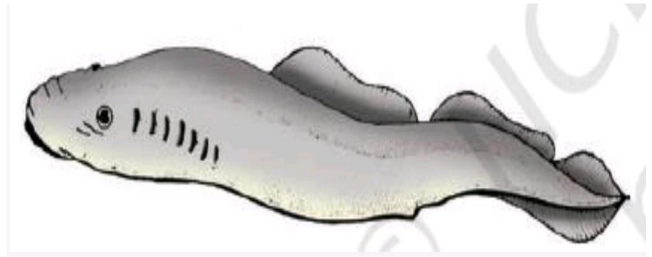

What is the special property of the organism given in the figure

- a. Bioluminescence
- b. Bioadherance
- c. Presence of spongocoel
- d. Presence of nematocytes

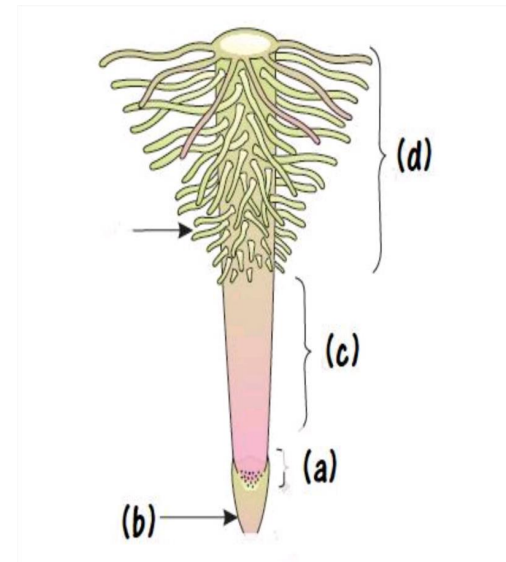

The organism in the diagram belongs to which class of vertebrata

- a. Cyclostomata
- b. Chondrichthyes
- c. Osteichthyes
- d. Agnatha

Which of the following is correct labelling regarding different regions of root tip

- a. Region of elongation
- b. Root cap
- c. Region of meristematic activity
- d. Root hair

What is the most common location of the type of epithelium in the figure

- a. Lining of intestine
- b. Lining blood vessels
- c. Lining PCT
- d. Lining ducts of glands

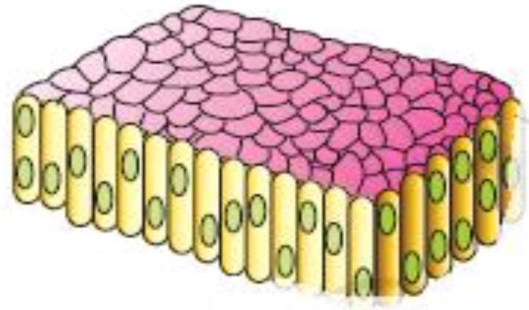

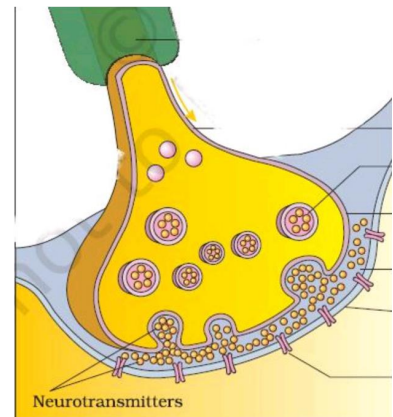

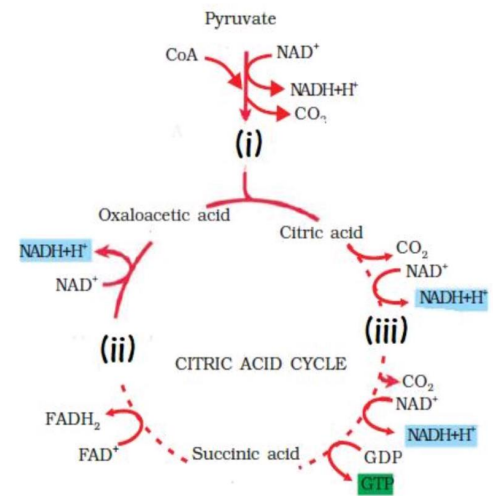

Diagram is showing a neuromuscular junction at motor end plate. Which is the neurotransmitter that transfer stimulus from neuron to muscle

- a. Adrenaline
- b. Serotonin
- c. Acetyl choline
- d. Dopamine

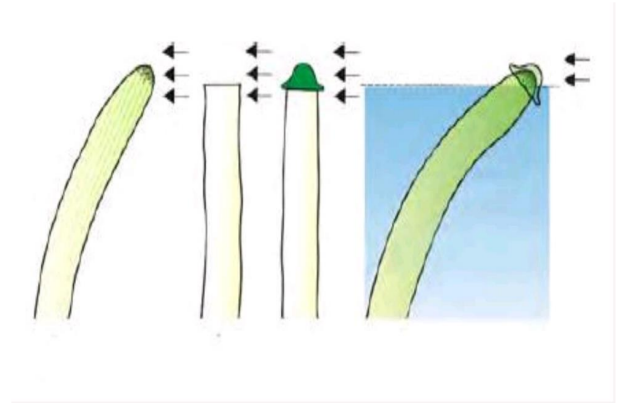

Mark the correct option

- a. (ii) – Malic acid – 5C
- b. (iii) – Ketoglutaric acid – 4C
- c. (ii) – Malic acid – 4C
- d. (i) – Acetyl Co A – 3C

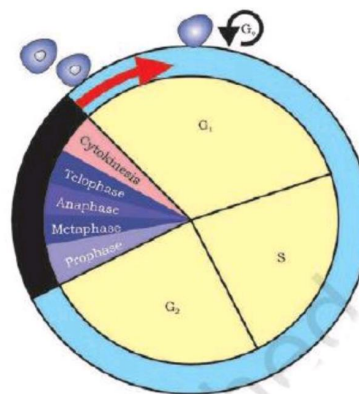

The given diagram represents an experiment used to demonstrate which of the following plant hormones

- a. Gibberellins
- b. Cytokinins
- c. Ethylene
- d. Auxin

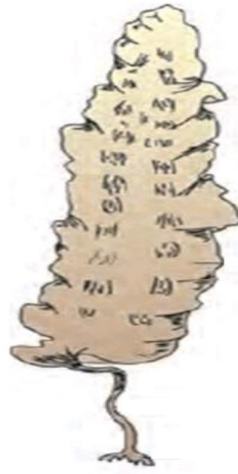

During which phase does duplication of centriole occurs

- a. G1
- b. G2
- c. S
- d. M

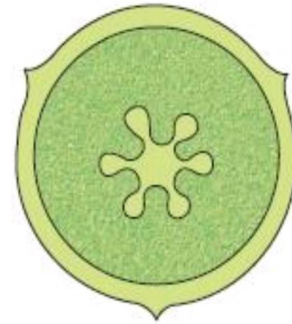

What is the organism depicted in the diagram

- a. Laminaria
- b. Fucus
- c. Porphyra
- d. Dictyota

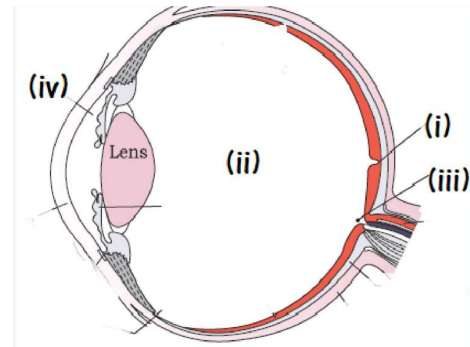

Correct example of type of placentation show in the

- a. Lemon
- b. Argemone
- c. Dianthus
- d. China rose

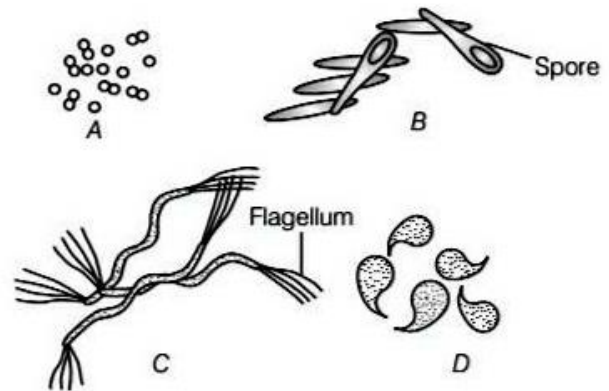

Mark the correct option

- a. (ii) – aqueous chamber
- b. (iv) – iris
- c. (iii) – Blind spot
- d. (iv) – vitreous humor

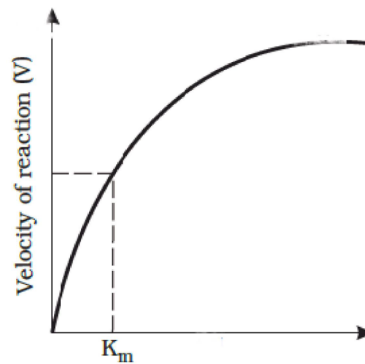

Bacteria are grouped under four categories based on their shape. Refer to the given figure. Identify *A*, *B*, *C* and *D*.

- (a) A–Vibrio, B–Cocci, C–Bacilli, D–Spirilla
- (b) A–Cocci, B–Bacilli, C–Spirilla, D–Vibrio
- (c) A–Bacilli, B–Spirilla, C–Vibrio, D–Cocci
- (d) A–Spirilla, B–Vibrio, C–Cocci, D–Bacilli

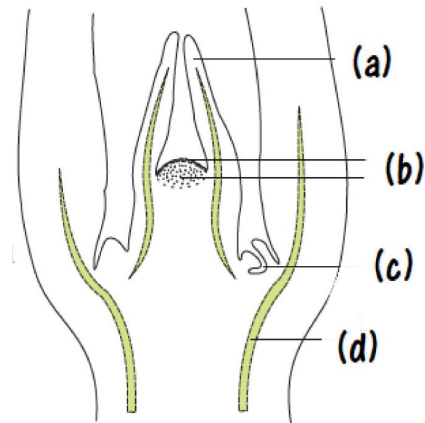

In case of competitive inhibition, how does the value of K_m change in order to attain the initial $V_{max}/2$

- a. Increases
- b. Becomes half
- c. Becomes $1/4^{\text{th}}$
- d. Remains same

Mark the correct labelling

- a. Axillary bud
- b. Meristematic zone
- c. Future Vascular tissue
- d. Leaf primordia

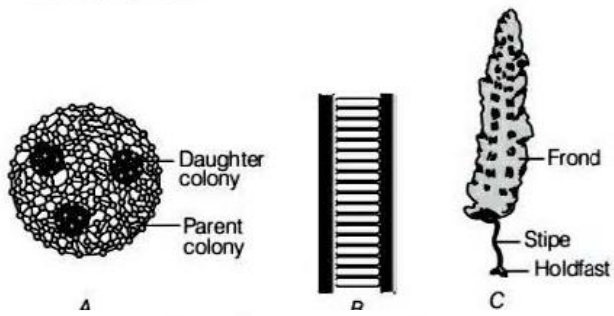

Mark the incorrect statement regarding the muscles tissue shown in the diagram

- a. Most common location is heart
- b. They are involuntary in action
- c. They are nonstraited muscles
- d. Branching connects adjacent cells

Identify the given figures of algae and select the correct option.

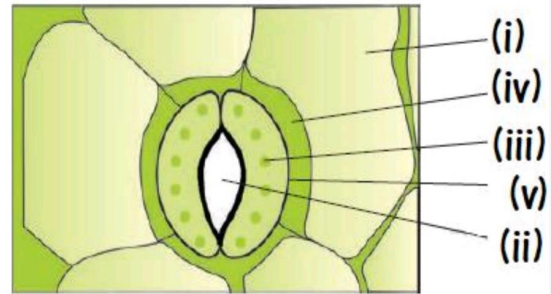

- (a) A–*Chlamydomonas*, B–*Chara*, C–*Volvox*
(b) A–*Volvox*, B–*Ulothrix*, C–*Laminaria*
(c) A–*Chara*, B–*Laminaria*, C–*Volvox*
(d) A–*Porphyra*, B–*Polysiphonia*, C–*Fucus*

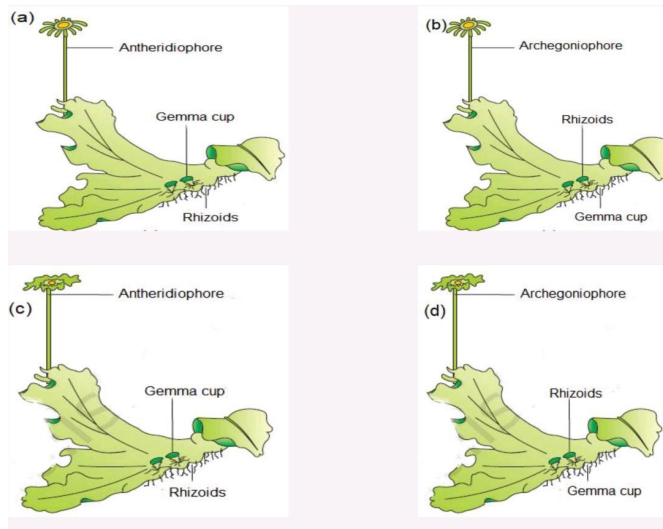

Mark the correct label

- a. (ii)- guard cell
- b. (iii)- chloroplast
- c. (i)- subsidiary cell
- d. (iv)- epidermal cell

Which is the correct option

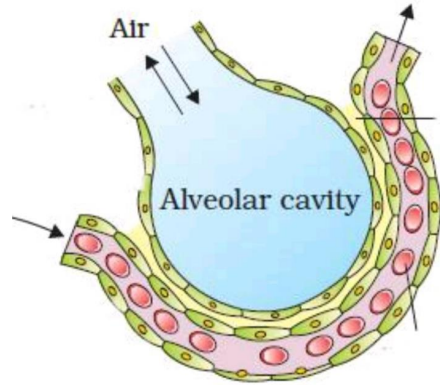

Smart Naukri

34

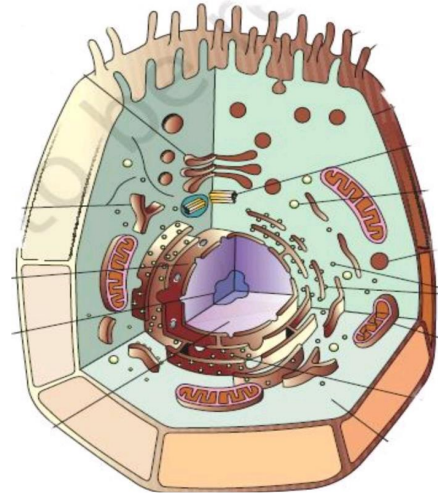

What is the type of epithelium shown in the diagram

- a. Cuboidal
- b. Squamous
- c. Columnar
- d. Ciliated

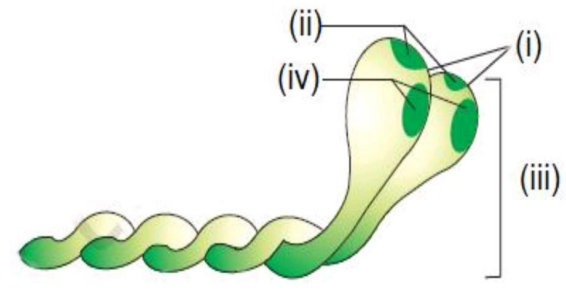

Which organelle is unique to this cell

- a. Centriole
- b. Peroxisome
- c. Cell wall
- d. Vacuole

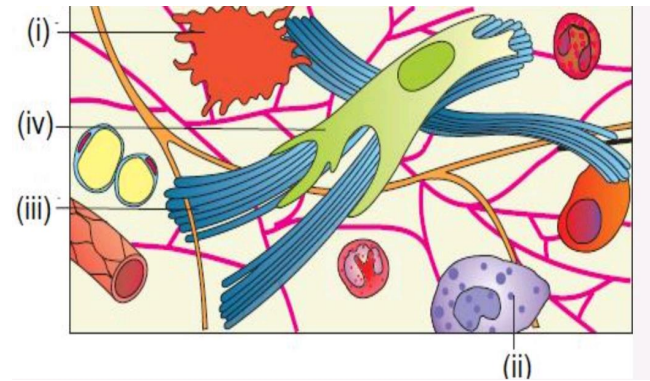

The diagram represents a Myosin Monomer. Mark the correct statement

- a. (iv)- Actin binding site
- b. (ii)- ATP binding site
- c. (i)- Actin binding site
- d. (iv) ATP binding site

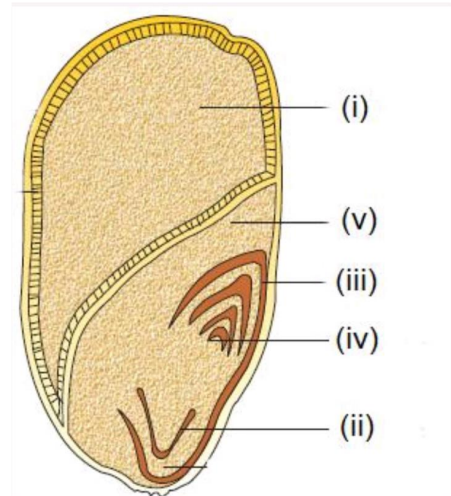

Which of the following correctly labels the cell responsible for release of histamine

- a. (iv)
- b. (ii)
- c. (i)
- d. (iii)

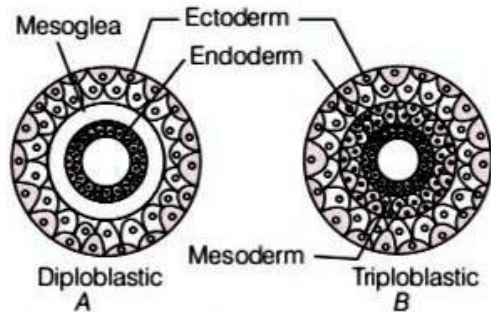

Scutellum is represented by

- a. (i)
- b. (iii)
- c. (v)
- d. (iv)

The diagram below shows the diploblastic and triploblastic germ layers in the animals. Identify the correct option in which they are found.

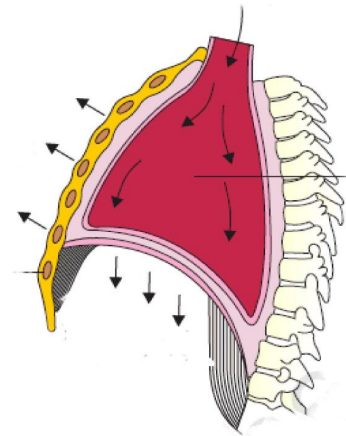

- (a) A–Molluscs, B–Chordates
- (b) A–Annelida, B–Porifera
- (c) A–Coelenterates, B–Platyhelminthes
- (d) A–Porifera, B–Cnidaria

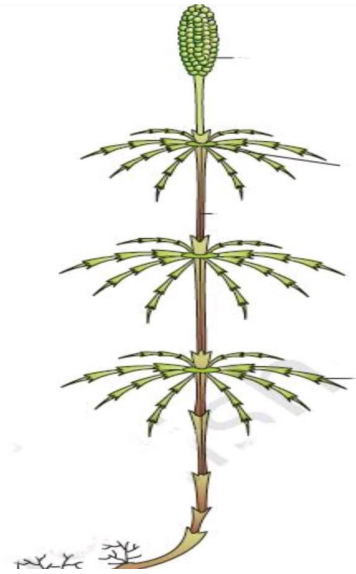

What is happening to diaphragm in the given figure

- a. Relaxation
- b. Contraction
- c. Neither contraction nor relaxation
- d. First contraction then relaxation

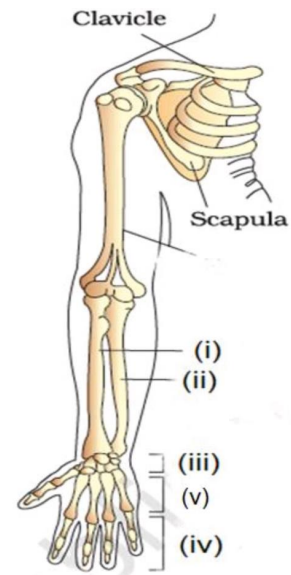

What is the scientific name of the member of plantae kingdom represented in the figure

- a. Selaginella
- b. Salvinia
- c. Sphagnum
- d. Equisetum

Which of the following is the correct label

- a. (v)- metatarsals
- b. (iii)- tarsals
- c. (ii)- ulna
- d. (iv)- carpals

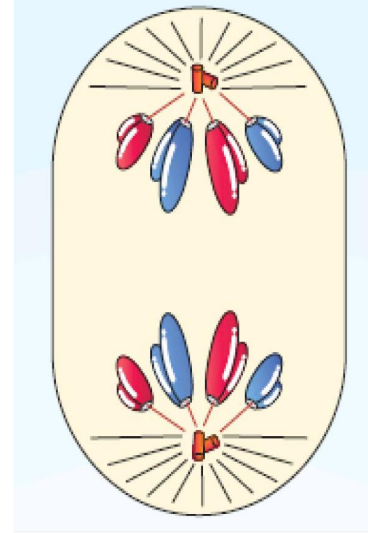

Smart Naukri

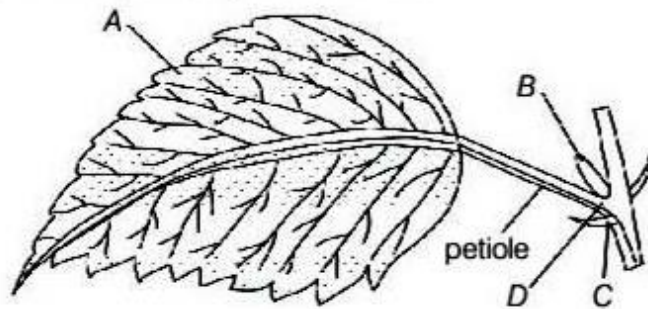

Which stage of M phase is represented in the figure

- a. Metaphase
- b. Anaphase
- c. Telophase
- d. Prophase

Given below is the diagram of a typical leaf. In which of the following all the four parts labelled as *A*, *B*, *C* and *D* are correctly identified?

	A	B	C	D
(a)	Lamina	Axillary bud	Stipule	Leaf base
(b)	Lamina	Stipule	Axillary bud	Leaf base
(c)	Lamina	Axillary bud	Stipule	Pedicel
(d)	Leaflet	Axillary bud	Stipule	Leaf base

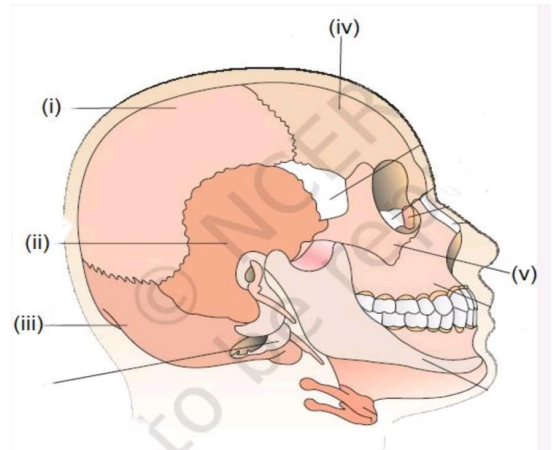

What is the site of action of ADH

- a. PCT
- b. Descending limb of Loop of Henle
- c. Ascending limb of Loop of Henle
- d. DCT

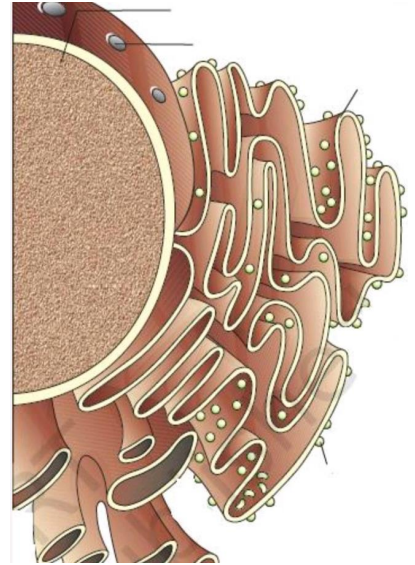

Which of the following bones doesn't exist in pair

- a. Parietal bone
- b. Temporal bone
- c. Occipital bone
- d. Zygomatic bone

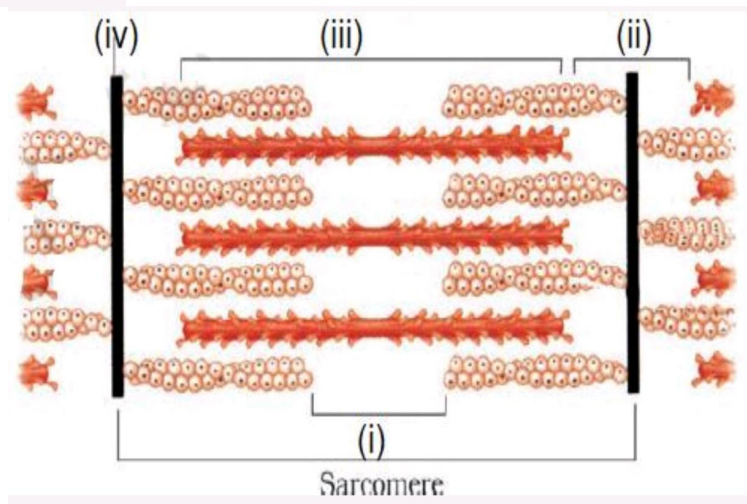

Which is incorrect with respect to the organelle shown in the figure

- a. Forms part of endomembrane system
- b. Is of two types
- c. Synthesise steroidal hormone
- d. Synthesise ATP

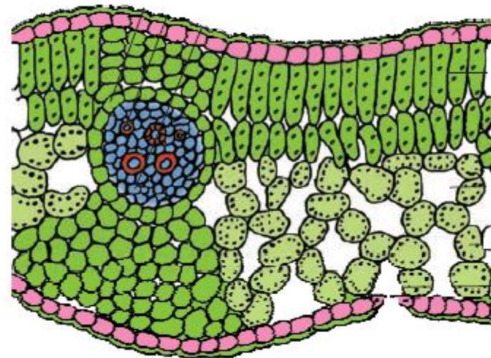

The diagram represents a sarcomere. Which of the following is the correct option

- a. (iv)- A line
- b. (iii)- Z band
- c. (i)- H zone
- d. (ii)- I line

The given diagram represents

- a. Dicot leaf
- b. Monocot leaf
- c. Dicot stem
- d. Monocot stem

Answer Key

- 1.a
- 2.b
- 3.a
- 4.c
- 5.b
- 6.c
- 7.d
- 8.d
- 9.c
- 10.a

Answer Key

- 11.c
- 12.b
- 13.a
- 14.c
- 15.d
- 16.c
- 17.a
- 18.a
- 19.b
- 20.a

Answer Key

- 21.c
- 22.c
- 23.d
- 24.c
- 25.a
- 26.c
- 27.c
- 28.b
- 29.a
- 30.b

Answer Key

- 31.c
- 32.b
- 33.b
- 34.c
- 35.b
- 36.a
- 37.d
- 38.b
- 39.c
- 40.c

Answer Key

- 41.b
- 42.d
- 43.c
- 44.b
- 45.b
- 46.d
- 47.c
- 48.d
- 49.c
- 50.a
