

NEW LIGHT INSTITUTE

Important Shapes & Sizes In NCERT

@AakashPapers

- Pollen grains are generally: Spherical
- **Nucleolus: Spherical**
- Centriole: Cylindrical
- **Mitochondria: Sausage shaped or cylindrical**
- RBCs: Round & biconcave
- **Mesophyll Cell: Round & oval**
- Tracheid: Elongated
- **Columnar Epithelium: Long & narrow**
- WBCs: Amoeboid
- **Nerve cell (longest cell): Long & branched**
- Henle's loop: Hairpin bend
- **Stomach: J-shaped**
- Spleen & Kidney: Bean shaped
- **Thymus: Lobed organ**
- Patella: Cup shaped
- **Bowman's capsule: Double walled cup-like structure**
- Heart: Clenched fist (size)
- **Oxygen dissociation curve: Sigmoid**
- Diaphragm: Dome shaped
- **Smooth muscle: Fusiform**
- Setae: S-shaped
- **Intestinal caecae: Conical**
- Root hair: Thread like
- **Root cap: Thimble like**
- Tongue of frog: Bilobed

- **Nucleus of vegetative cells: Irregular**
- **Generative cell: Spindle shaped**
- **Ommatidia of cockroach: Hexagonal**
- **Anther: Four sided (Tetragonal)**
- **Cotyledon (maize/grass): Shield shaped**
- **Archegonium of bryophytes: Flask shaped**
- **Gills of Molluscs: Feather like**
- **Radula of Molluscs: File like**
- **Chiasmata: X-Shaped**
- **Testis: Oval**
- **Uterus: Inverted pear**
- **Fimbriae & Clitoris: Finger like**
- **Vasa recta & hyoid bone: U-shaped**
- **Duodenum: C-shaped**
- **Verhulst-Pearl logistic growth curve: Sigmoid**
- **Exponential or geometric growth curve: J-shaped**
- **In female cockroach, 7th sternum is: Boat shaped**
- **Antennae & anal styles of cockroach: Thread like**
- **Head of cockroach, scapula and sinus venosus of frog: Triangular**
