

Size, Cell, Disease, Gland, Data, Examples - 100 MCQs

NCERT Nichod : Biology Practice Series NEET 2025

Cell, Disease, Gland, Data, Examples NEET 2025

BIOLOGYLIVE

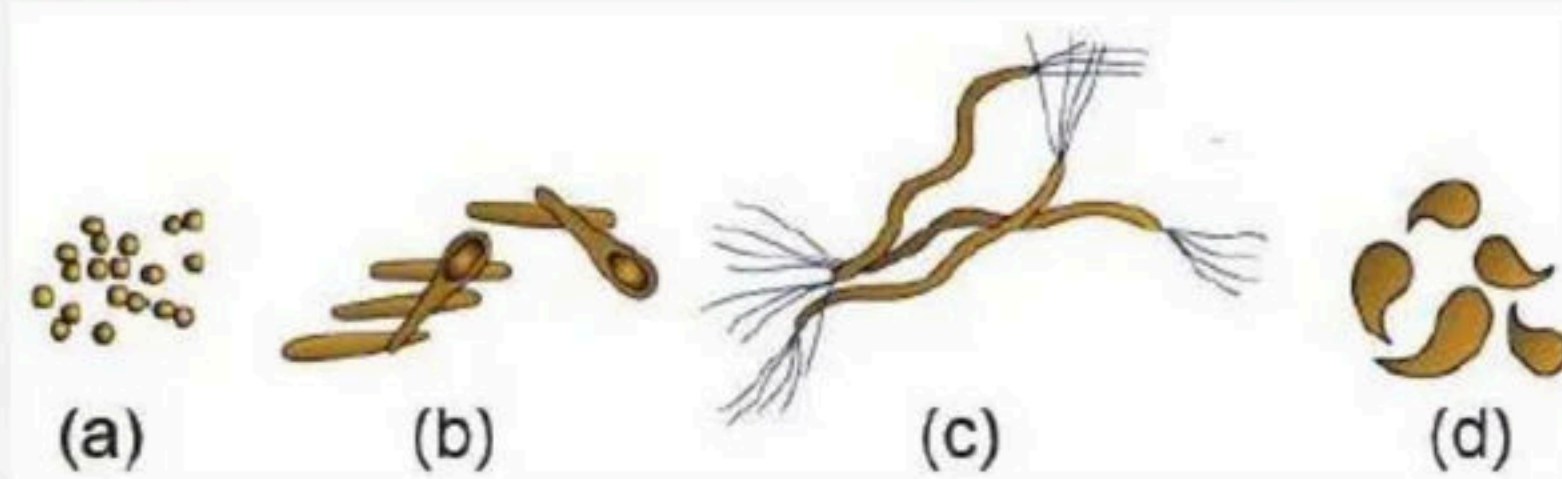

1. What is correct :

- (a) Genera is aggregate of closely related species.
- (b) Potato and Brinjal belong to same genus.
- (c) Mango and Poales belong to different division.
- (d) Each genus may have one or more than one specific epithets.

- (1) b, d
- (2) a, b
- (3) c, d
- (4) a, b, d

2. Cholera disease is related with :

(1) a

(2) b

(3) c

(4) d

3. How many matching are correct :

a. Entamoeba	free living	Ciliated protozoans
b. Trypanosoma	parasite	Flagellated protozoans
c. Plasmodium	parasite	Ciliated protozoans
d. Plasmodium	parasite	Sporozoans

(1) 2

(2) 3

(3) 4

(4) 1

4. Bladderwort and venus fly trap are examples of

- (1) Partially heterotrophic plants
- (2) Insectivorous plants
- (3) Totally heterotrophic plants
- (4) More than one options are correct

5. M.W. Beijerinck demonstrated that the extract of the infected plants of tobacco could cause infection in healthy plants and called the fluid as

- (1) Contagium vivum fluidum
- (2) Infectious living fluid
- (3) Both 1 and 2
- (4) Infectious non living fluid

6. In the given below examples. How many are viral diseases in animals :

Common cold, mumps, small pox, typhoid, cholera, influenza, herpes, tetanus, AIDS

(1) 6

(2) 5

(3) 4

(4) 3

7. How many matching are correct according to organisms and their life spans.

a- Butterfly - 7 - 14 days

b- Crocodile - 60 years

c- Tortoise - 100-150 years

d- Crow - 15 years

e- Parrot - 140 years

(1) 2 (2) 4

(3) 3 (4) 5

8. How many number of vegetative propagules from below mentioned examples are given:

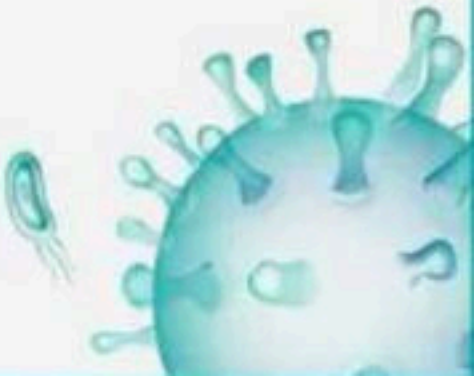

Rhizome, offset, tuber, bulbil, leaf buds, bulb, antherozoid, ovum, sperm

(1) 6

(2) 5

(3) 4

(4) 3

9. Statement-I: The unisexual flower, bearing male flower is staminate i.e. bearing stamens

Statements-II: Some examples of monoecious plants are cucurbits and papaya.

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

10. No. of ATP produced by 1 pyruvic Acid inside the mitochondria outside the ETS?

- (1) 1
- (2) 4
- (3) 3
- (4) 2

11. Match the following with respect to discovered species in India

- | | |
|------------------|---|
| a) Nearly 45,000 | i) Total animal discovered |
| b) About 90,000 | ii) Total plant discovered |
| c) 1 lac | iii) Animal living species waiting to be discovered |
| d) 3 lac | iv) Plant living species waiting to be discovered |
-
- | | |
|----------------------------|----------------------------|
| (1) a-i, b-ii, c-iii, d-iv | (2) a-iii, b-ii, c-i, d-iv |
| (3) a-ii, b-i, c-iv, d-iii | (4) a-i, b-iii, c-ii, d-iv |

12. Which statement is correct with respect to Bt toxin.

- (1) Insect group non-specific
- (2) Choice of genes depends upon only crop.
- (3) Choice of genes depends upon only targeted pest.
- (4) Choice of genes depends upon the crop and the targeted pest.

13. The Infectious abnormally folded protein are called

- (1) Rions
- (2) Prions
- (3) Trions
- (4) Viroids

14. Mad cow disease in cattle caused by an agent which has:

- (1) Polyhedrally arranged protein
- (2) Smaller size than bacteria
- (3) Similar size with bacteria
- (4) Larger size than bacteria

15. Which of the following organism have flegella and cause diseases:

- (1) Entamoeba
- (2) Trypanosoma
- (3) Plasmodium
- (4) Paramecium

16. Find the correct matching of the following :

- | | |
|---------------------|-----------------------------|
| (a) 1.7-1.8 million | (i) Infectious living fluid |
| (b) 1969 | (ii) Dmitri Ivanowsky |
| (c) Billion of year | (iii) Diatoms accumulates |
| (d) 1892 | (iv) R.H. Whittaker |
| (e) 1898 | (v) Species described |

- | | |
|---------------------------------|---------------------------------|
| (1) a-v, b-iv, c-iii, d-ii, e-i | (2) a-iv, b-v, c-iii, d-i, e-ii |
| (3) a-v, b-iv, c-ii, d-i, e-iii | (4) a-i, b-iv, c-iii, d-ii, e-v |

17. Match the column I and column II and choose correct answer:

Column I

A. Phycomycetes

B. Ascomycetes

C. Basidiomycetes

D. Deuteromycetes

Column II

i. Agaricus, Ustilago

ii. Mucor, Rhizopous

iii. Alternaria, Colletotricum

iv. Penicillium, Claviceps

(1) A - ii, B - iv, C - i, D - iii

(2) A - i, B - iii, C - ii, D - iv

(3) A - iv, B - i, C - ii, D - iii

(4) A - ii, B - iv, C - iii, D - i

18. The following period of days, months, year and chromosome are associated with

- | | |
|----------------------|-------------------|
| a) 50-100 years. | i) Butterfly |
| b) 12 years. | ii) Housefly |
| c) September-October | iii) Neelakuranji |
| d) 12 | iv) Strobilanthus |
| e) 380 | v) Bamboo plant |

- (1) a-v, b-iv, c-ii, d-i, e-iii
(2) a-iv, b-v, c-iii, d-i, e-ii
(3) a-v, b-iv, c-iii, d-ii, e-i
(4) a-i, b-iv, c-iii, d-ii, e-v

19. In the following how many matching is/are correctly matched :

- | | | |
|-----------------|---|---------|
| (a) Penicillium | – | Conidia |
| (b) Yeast | – | Budding |
| (c) Onion | – | Bulb |
| (d) Ginger | – | Tuber |

- (1) Two
- (2) Four
- (3) Three
- (4) One

20. The multicellular sex organ occurs in

- (1) Chara
- (2) Bryophyte
- (3) Both 1 and 2
- (4) Cyanobacteria

21. Volvox, Ulothrix, Spirogyra, Chara, Ectocarpus, Laminaria, Sargassum, Porphyra and Polysiphonia, etc., are the examples of green plants. Number of organism which having chlorophyll a and chlorophyll c are

- (1) Three
- (2) Four
- (3) Seven
- (4) Five

22. Match the following

- | | |
|----------------|-----------------|
| a. Lycopsidea | i) Pteris |
| b. Pteropsida | ii) Selaginella |
| c. Sphenopsida | iii) Psilotum |
| d. Psilopsida | iv) Equisetum |

(1) a(ii), b(iv), c(i), d(iii)

(2) a(i), b(iv), c(ii), d(iii)

(3) a(ii), b(i), c(iv), d(iii)

(4) a(ii), b(iii), c(iv), d(i)

23. Match the following with respect to salt concentration in different habitat

- | | |
|-----------------|-------------------------------|
| a) Less than 5% | i) In inland waters. |
| b) 30-35% | ii) some hypersaline lagoons. |
| c) > 100% | iii) In the sea |

(1) a-ii, b-i, c-iii

(2) a-i, b-ii, c-iii

(3) a-i, b-iii, c-ii

(4) a-iii, b-ii, c-i

24. Chlamydomonas, Chlorella, Paramecium and Amoeba are placed in which kingdom of Whittaker's classification :

- (1) Monera
- (2) Plantae
- (3) Fungi
- (4) Protista

25. Choanocytes or collar cells are the characteristic feature of :

- (1) Porifera
- (2) Coelenterata
- (3) Platyhelminthes
- (4) Aschelminthes

26. Which is incorrect :

- (1) Vegetative cell is bigger has abundant food reserve and large irregular shaped nucleus
- (2) Generative cell is small and float in the cytoplasm of vegetative cell
- (3) Generative cell is spindle shape
- (4) In 40% angiosperm pollen grain shed at 2 celled stage.

27. Match the column I with column II and choose correct option:

Column I

A. Viviparous Vertebrate

B. Oviparous Vertebrate

C. Flying vertebrate

Column II

(i) Scoliodon

(ii) Labeo

(iii) Pteropus

(iv) Macropus

(v) Neophron

(1) A - i,ii, B - ii,v, C-iii,v

(3) A - iii,iv, B - i,ii,v, C-iv

(2) A - i,iii,iv B - ii,v, C-iii,v

(4) A - iii,iv B -v, C-iii,iv,v

28. Which is incorrect :

- (1) Sporogenous tissue undergo meiotic division to form microspore tetrad.
- (2) A typical angiosperm embryo sac at maturity is 8 nucleate and 7 celled.
- (3) Method of embryo sac formation from a single megaspore is monosporic development.
- (4) Wind pollination requires heavy and sticky pollen grain for easy transportation.

29. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R) Assertion (A) : Genera *Selaginella* and *Salvinia* are known as heterosporous.

Reason (R) : They produce two kinds of spores, macro (large) and micro (small).

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

30. What set is correct regarding recent record of viable seed

- (1) Phoenix dactylifera/2000 years old/King Herod's Palace/Near Dead sea
- (2) Phoenix dactylifera/10000 years old/King Herod's Palace/Dead sea
- (3) Lupinus/2000 years old/Arctic Tundra
- (4) None

31. Bryophytes include

a. Mosses

b. Horsetail

c. Liverworts

d. Ferns

(1) a , b (2) a, c

(3) a,d (4) b,d

32. Match the following with respect to magnitude of r values in given option

- | | |
|------------|---|
| a) 0.015 | i) In 1981 the r value for human population |
| b) 0.12 | ii) Flour beetle |
| c) 0.0205. | iii) Norway rat |

(1) a-ii, b-i, c-iii

(2) a-iii, b-i, c-ii

(3) a-ii, b-iii, c-i

(4) a-iii, b-ii, c-i

33. Agar a type of chemical are obtained from which algae and their uses respectively

- (1) Gelidium, For grow microbes
- (2) Gracilaria, Preparation of Ice-cream
- (3) Gelidium, preparation of jellies
- (4) All of these

34. Given below are two statements :

Statement I : FSH act at the leyding cells and stimulates synthesis and secretion of androgens.

Statement-II: LH act on sertoli cells and stimulates secretion of some factor which help in the process of spermiogenesis.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

35. Given below are two statements :

Statement I : Progesterone play a major role in maintnance of preganany as well as in mammary gland development.

Statement II : The ovary secretes estrogen, progesterone, L.H. and F.S.H

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

36. Choose the correct :

- (1) Poisonous snake - Naja, Testudo
- (2) Pneumatic bones - Columba
- (3) Aves - Poikilothermal
- (4) Hyla - No eyelid

37. The functions of male accessory duct and glands are maintained by :

- (1) Pituitary hormones
- (2) Hypophyseal hormones
- (3) Androgens
- (4) All

38. Interstitial cells found in human testis are secretory

source of :

- (1) Glucagon
- (2) Androgens
- (3) Progesterone
- (4) hCG

39. Match the following Column I and II

Column -I

a. Hypogynous

b. Perigynous

c. Epigynous

Column-II

i. Mustard

ii. Peach

iii. Guava

(1) a-iii, b-ii, c-i

(2) a-ii, b-iii, c-i

(3) a-i, b-iii, c-ii

(4) a-i, b-ii, c-iii

40. Select the correct match :

- | | |
|-----------------|------------------------|
| (i) Tomato | – Actinomorphic flower |
| (ii) Canna | – Asymmetric flower |
| (iii) Trifolium | – Zygomorphic flower |
| (iv) Cassia | – Asymmetric flower |

(1) (i), (ii) & (iii) only

(2) (i) and (iii) only

(3) (ii) and (iv) only

(4) (ii), (iii) and (iv) only

41. Each testis have around how many testicular lobules

- (1) 100
- (2) 50
- (3) 250
- (4) 150

42. Which of the following stem are modified to store food :

- (1) Potato, ginger, turmeric
- (2) Sweet potato, turmeric, ginger
- (3) Potato, carrot, turnip
- (4) All of these

43. Which one is product of ductless gland :

- (1) Mucus
- (2) Saliva
- (3) Milk
- (4) Hormone

44. Common cold is not cured by antibiotics because it is :

- (1) Caused by a virus
- (2) Caused by a Gram-positive bacterium
- (3) Caused by Gram-negative bacterium
- (4) Not an infectious disease

45. "Jaya" and "Ratna" developed for green revolution in India are the varieties of :

- (1) Bajra
- (2) Maize
- (3) Rice
- (4) Wheat

46. Which of the following does not differ in E.coli and Spirogyra :

- (1) Ribosome
- (2) Cell wall
- (3) Cell membrane
- (4) Mitochondria

Title: Cell, Disease, Gland, Data, Examples NEET 2025

47. Match the following scientists with their discovery and research year.

- a) 1838 i- Matthias Schleiden
- b) 1839 ii- Theodore Schwann
- c) 1954 iii- Rudolf Virchow
- d) 1855 iv- G. N. Ramachandran

- (1) a-iii, b-iv, c-ii, d-i
- (2) a-i, b-ii, c-iv, d-iii
- (3) a-ii, b-iv, c-iii, d-i
- (4) a-i, b-iv, c-iii, d-ii

48. Match the column I and column II

Column I

a) 1-2 μm

b) 0.2 to 1.0 μm

c) 3-5 μm

d) 2-4 μm

(1) a-iii, b-iv, c-ii, d-i

(3) a-ii, b-iv, c-iii, d-i

Column II

i) Typical bacteria

ii) Diameter of mitochondria

iii) Size of bacteria

iv) Chloroplast width

(2) a-i, b-ii, c-iv, d-iii

(4) a-i, b-ii, c-iii, d-iv

49. In which among the following cell organelle, steroidal hormones are being synthesised in animal cells :

- (1) Smooth endoplasmic reticulum
- (2) Rough endoplasmic reticulum
- (3) Golgi complex
- (4) Vacuoles.

50. Match the following columns :

Column I

Column II

a. Typical bacteria	i. $0.02 - 0.2 \mu\text{m}$
b. PPLO	ii. $0.1 \mu\text{m}$
c. Viruses	iii. $10 - 20 \mu\text{m}$
d. Eukaryotic cell	iv. $1 - 2 \mu\text{m}$

(1) a-ii, b-iii, c-i, d-iv

(2) a-i, b-ii, c-iii, d-iv

(3) a-iv, b-ii, c-i, d-iii

(4) a-iii, b-i, c-ii, d-iv

51. How many plants among these are ornamental-

Lupin, Sweet pea, Petunia, Tulip, Gloriosa, Asparagus

(1) 6

(2) 5

(3) 4

(4) 3

52. Brunner's gland are found in which of the following layers :

- (1) Submucosa of stomach
- (2) Mucosa of ileum
- (3) Submucosa of duodenum
- (4) Mucosa of oesophagus

53. Given below are two statements :

Statement I : Hapatitis B and genital herpes Infections are completely curable if detected early and treated properly.

Statement-II : S.T.D. can cause complications a like pelvic inflammatory diseases (PID), abortion still birth, ectopic pregnancies infertility or even cancer of reproductive tract.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

54. Given below are two statements :

Statement I : Nuclei in cells of columnar epithelium are located at the base.

Statement-II : Ciliated epithelium is modified columnar or cuboidal cells and bear cilia on their free surface.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct.

55. How many radial spokes are present in a cilium :

(1) 18

(2) 9

(3) 27

(4) 36

56. In cockroach each compound eye consist of how many ommatidia :

- (1) 4000
- (2) 3000
- (3) 2000
- (4) 5000

57. Given below are two statements :

Statement I : Some of the columnar or cuboidal cells get specialised for secretion and are called glandular epithelium.

Statement II : Exocrine glands secrete mucus, saliva, Earwax, oil , milk, digestive enzyme and other product.

Choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both, Statement I and Statement II are correct

58. Given below are two statements :

Statement I : Viruses cause diseases like mumps, small pox herpes and influenza in animal.

Statement II : In T.M.V capsomere are arranged helicaly to form capsid which protect nucleic acid.

Choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both, Statement I and Statement II are correct

59. In over 60 percent of angiosperms, pollen grains

- (1) 2 celled stage
- (2) 3-celled stage
- (3) 1 celled stage
- (4) 4-celled stage.

60. Match the following

- | | |
|-------------------|--|
| a) Every 24 hours | i) Yeast completes its cell cycle |
| b) 1 hour | ii) Typical eukaryotic human cells divide once |
| c) 95% time | iii) Interphase |
| d) 90 minutes | iv) Duration of M-phase in human cell |

(1) a-i, b-ii, c-iii, d-iv

(2) a-ii, b-iii, c-iv, d-ii

(3) a-ii, b-iv, c-iii, d-i

(4) a-ii, b-iii, c-iv, d-i

61. Gynaecomastia is the symptom of :

- (1) Down syndrome
- (2) Klinefelter syndrome
- (3) Turner's syndrome
- (4) Edward syndrome

62. The β -thalassemia controlling genes are present on which chromosome :

- (1) 10
- (2) 11
- (3) 16
- (4) 12

63. In sickle cell anaemia defective m-RNA has which genetic code for valine amino acid

- (1) CTC
- (2) GAG
- (3) CAC
- (4) GUG

64. In phenylketonuria mental retardation takes place due to accumulation of

- (1) Tyrosine
- (2) Phenylalanine
- (3) Phenylpyruvic acid
- (4) Dopamine

65. Given below are two statements :

Statement I : Chromosomal disorder may be occur due to trisomy or monosomy.

Statement-II : Chromosomal disorder maybe dominant or recessive.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

66. A disease caused by an autosomal primary nondisjunction is :

- (1) Klinefelter's Syndrome
- (2) Turner's Syndrome
- (3) Sickel Cell Anemia
- (4) Down's Syndrome

67. Pick out the correct statements.

- (a) Haemophilia is a sex-linked recessive disease.**
- (b) Down's syndrome is due to aneuploidy.**
- (c) Phenylketonuria is an autosomal recessive gene disorder.**
- (d) Sickle cell anaemia is an X-linked recessive gene disorder.**

- (1) (a), (c) and (d) are correct**
- (2) (a), (b) and (c) are correct**
- (3) (a) and (d) are correct**
- (4) (b) and (d) are correct**

68. Phenotypically females having rudimentary ovaries, under developed breast, short stature, webbing neck, often subnormal intelligence suggest

- (1) Down's syndrome
- (2) Turner's syndrome
- (3) Edward's syndrome
- (4) Klinefelter's syndrome

69. Find the correct option with respect to chromosome number:

- | | |
|------------------|-----------------------------|
| a) 32 | i) Down's syndrome |
| b) 16 | ii) Klienfelter's syndromes |
| c) 45 | iii) Turner's syndrome |
| d) 47 (AA + XXY) | iv) Drones |
| e) 47 (AAA + XX) | v) Worker bees |

- (1) a-v, b-iv, c-iii, d-ii, e-i
(2) a-v, b-iv, c-ii, d-i, e-iii
(3) a-iv, b-v, c-iii, d-i, e-ii
(4) a-i, b-iv, c-iii, d-ii, e-v

70. Colour blindness is a kind of

- (1) X-linked dominant
- (2) Autosomal dominant
- (3) X-linked recessive
- (4) Autosomal recessive

71. Match the following with respect to nucleic acid

- | | |
|------------------------|--------------------------------|
| a) $5' \rightarrow 3'$ | i) Different bases in RNA |
| b) 3.4 nm | ii) Polarity of DNA/RNA |
| c) 0.34 nm | iii) Pitch of helix of DNA |
| d) Two | iv) Distance between bp |
| e) Four | v) Polynucleotide chain in DNA |

(1) a-iv, b-v, c-iii, d-i, e-ii

(2) a-v, b-iv, c-ii, d-i, e-iii

(3) a-i, b-iv, c-iii, d-ii, e-v

(4) a-ii, b-iii, c-iv, d-v, e-i

72. Match the following with respect to various aspects of DNA

- | | |
|----------------------|--|
| a) 2.2 meter | i) Nucleosome in mammalian cell |
| b) 1.36mm | ii) Histone protein |
| c) 200 bp | iii) Length of E. coli DNA |
| d) Eight molecules | iv) Length of DNA double helix in typical mammalian cell |
| e) 3.3×10^7 | v) Typical nucleosome |

(1) a-iv, b-v, c-iii, d-i, e-ii

(2) a-v, b-iv, c-ii, d-i, e-iii

(3) a-iv, b-iii, c-v, d-ii, e-i

(4) a-i, b-iv, c-iii, d-ii, e-v

73. Match the following with respect to element :

- | | |
|--------------------------------------|--|
| a) > 60 | i) Element found in different plants. |
| b) 105 | ii) Element discovered so far |
| c) 10^{-8} g/ mL | iii) Concentration of element can detect in plant by techniques |

(1) a-iii, b-ii, c-i

(2) a-i, b-iii, c-ii

(3) a-iii, b-i, c-ii

(4) a-i, b-ii, c-iii

74. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : In animal cells like muscles during exercise pyruvic acid is reduced to lactic acid by lactate dehydrogenase.

Reason (R) : During exercise oxygen is inadequate for cellular respiration.

choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

75. Match the following with respect to scientist and their related discoveries :

- | | |
|--------------|--|
| a) 1860 | i) Role of air in the growth of green plants. |
| b) 1770 | ii) Julius von Sachs, Hydroponics |
| c) 1854 | iii) Cornelius van Niel |
| d) 1897-1985 | iv) Julius von Sachs provided evidence for production of glucose when plants grow. |

(1) a-iv, b-iii, c- i, d-ii

(2) a-iv, b-ii, c- iii, d-i

(3) a-i, b-iii, c- ii, d-iv

(4) a-ii, b-i, c- iv, d-iii

76. In yeast cell continuous fermentation of glucose

causes death of yeast cell :

- (1) Suffocation
- (2) Unavailability of oxygen
- (3) High ethyl alcohol
- (4) All of these

77. Earth was supposed to have been formed about :

- (1) 4.5 million years back
- (2) 4.0 billion years back
- (3) 3.5 billion years back
- (4) 4.5 billion years back

78. Match the following with respect to evolution of different group of organism/other:

- | | |
|------------------------------|---|
| a) 4000 years old | i) Sea weeds existed |
| b) 2000 million years | ii) Earth is formed ago according to conventional religious literature |
| c) 500 million year | iii) First cellular form of ago life appeared on earth |
| d) 350 million year | iv) Invertebrates formed ago |
| e) 320 million years | v) Jawless fish evolved |

(1) a-v, b-iv, c-iii, d-ii, e-i

(2) a-v, b-iv, c-ii, d-i, e-iii

(3) a-iv, b-v, c-iii, d-i, e-ii

(4) a-ii, b-iii, c-iv, d-v, e-i

Title: Cell, Disease, Gland, Data, Examples NEET 2025

79. Match the following with respect to discovery and experiments associated years.

- | | |
|----------|---|
| a) 1938 | i) Fossil discovered in Java |
| b) 1920 | ii) S.L Miller created closed flask experiment |
| c) 1850s | iii) A fish caught in South Africa |
| d) 1953 | iv) More dark winged moths in the same area of England observed |
| e) 1891 | v) Collection of moth before industrilization |

(1) a-iv, b-v, c-iii, d-i, e-ii

(2) a-v, b-iv, c-ii, d-i, e-iii

(3) a-iii, b-iv, c-v, d-ii, e-i

(4) a-i, b-iv, c-iii, d-ii, e-v

80. Agriculture came into existence around :

- (1) 75,000 years back
- (2) 50,000 years back
- (3) 10,000 years back
- (4) None

81. Eye of the octopus and mammals show :

- (1) Analogy
- (2) Homology
- (3) Atavism
- (4) Vestigeal organ

82. Among the human ancestors, the brain size was more than 1000 cc in :

- (1) Homo erectus
- (2) Ramapithecus
- (3) Homo habilis
- (4) Neanderthal man

83. The biggest land reptile were :

- (1) Turtles
- (2) Ichthyosaurs
- (3) Tyrannosaurus rex
- (4) Tortoises

84. Diseases or infections which are transmitted through sexual intercourse are called:

- (1) Sexually transmitted diseases (STDs)
- (2) Venereal diseases (VD)
- (3) Reproductive tract infections (RTI)
- (4) All of the above

Title: Cell, Disease, Gland, Data, Examples NEET 2025

85. Match Column - I with Column - II and select the correct option from the codes given below:

Column I

- (A) Turner's syndrome
- (B) Linkage
- (C) Klinefelter's syndrome
- (D) Down's syndrome

(1) A-ii, B-i, C-iv, D-iii

(3) A-iv, B-ii, C-i, D-iii

Column II

- (i) Trisomy
 - (ii) AA + XO
 - (iii) Morgan
 - (iv) AA+XXY
- (2) A-iv, B-i, C-ii, D-iii
- (4) A-ii, B-iii, C-iv, D-i

86. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Secondary immune response is quicker and stronger than the primary one.

Reason (R) : Our body appears to have memory of first encounter and subsequent encounter with same pathogen elicits a highly intensified.

choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

87. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Cancereous cell just continue to divide giving rise to masses of cell called tumour.

Reason (R) : Cancer cells appears to have lost property of contact inhibition.

choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

88. Cells in a watermelon may increase in size by upto:

- (1) 2,000 times
- (2) 3,00,000 times
- (3) 3,50,000 times
- (4) 2,50,000 times

89. Houseflies act as mechanical carriers for :

- (1) HIV
- (2) Filariasis
- (3) Amoebiasis
- (4) Malaria

90. A person is suffering from frequent nasal discharge, nasal congestion and hoarseness.

He may suffer from :

- (1) Constipation
- (2) Rhinitis
- (3) Common cold
- (4) Both 2 and 3

91. Which of the following is a pair of bacterial disease:

- (1) Common cold, AIDS
- (2) Dysentary, common cold
- (3) Typhoid, tuberculosis
- (4) Ringworm, AIDS

92. Which of the following drug is used to reduce the symptoms of allergy :

- (1) Histamine, Serotonin, Steroid
- (2) Anti - histamine, Serotonin, Steroid
- (3) Anti-histamine, Adrenalin, Steroid
- (4) Adrenalin, Histamine, Steroid

93. Metastasis is the most feared property of :

- (1) AIDS
- (2) Benign Tumors
- (3) Malignant tumors
- (4) Common cold

94. Which one of the following is not a species of malaria causing Plasmodium :

a. *P. falciparum*

b. *P. somniferum*

c. *P. belladonna*

d. *P. malayi*

(1) Only b, c

(2) b, c, d

(3) a, b, d

(4) Only c, d

95. How many of the following are congenital disease

- a. Haemophilia
- b. Typhoid
- c. Ascariasis
- d. Pneumonia
- e. Malaria

(1) 2 (2) 3

(3) 4 (4) 1

96. AIDS and cancer are examples of

- (1) Infectious disease
- (2) Non-infectious disease
- (3) AIDS infectious and cancer non infectious
- (4) AIDS non- infectious and cancer infectious

97. Pathogen of typhoid enters the body through

- (1) Mosquito bite
- (2) Inhaling the aerosols released by an infected person
- (3) Contaminated water and food
- (4) All of these

98. Widal test is the confirmation test for

- (1) Malaria
- (2) Pneumonia
- (3) Common cold
- (4) Typhoid

99. Elephantiasis is characterized by

- (1) Chronic inflammation in lymphatic vessels of lower limb
- (2) Internal bleeding
- (3) Often gross deformities in genital organs
- (4) Both 1 and 3

100. Elephantiasis is caused by which pathogen

- (1) Plasmodium vivax
- (2) Wuchereria malayi
- (3) Microsporum
- (4) Epidermophyton

101. Which of the following is an autoimmune disease

- (1) Cancer
- (2) Pneumonia
- (3) Common cold
- (4) Rheumatoid arthritis

102. AIDS is caused by

- (1) Haploid Immuno deficiency virus
- (2) Human Immuno deficiency virus
- (3) Host Immuno deficiency virus
- (4) None of these

103. HIV doesn't spread through

- (1) Children born to an HIV infected mother
- (2) By sharing infected needles
- (3) Touching infected person
- (4) None of these

104. Which cells of body is known as HIV factory

- (1) Lymphocytes
- (2) Macrophages
- (3) Eosinophils
- (4) Basophils

105. The Anxiety, Shakiness, Nausea are symptoms of:

- (1) Withdrawal syndrome
- (2) Turners syndrome
- (3) Down syndrome
- (4) Ringworms

106. Given below are two statements :

Statement I :

Mendelian disorder are mainly determined by alteration or mutation in the single gene.

Statement-II :

Cystic fibrosis, phenylketonuria and thalassemia are mendelian disorder.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

Title: Cell, Disease, Gland, Data, Examples NEET 2025

107. Match the following with column I and column II choose the correct answer

Column-I

(Aestivation)

a. Valvate

b. Twisted

c. Imbricate

d. Vexillary

(1) a-i, b-iii, c-ii, d-iv

(3) a-i, b-iv, c-iii, d-ii

Column-II

(Example)

i. Cotton

ii. Calotropis

iii. Gulmohur

iv. Bean

(2) a-ii, b-i, c-iv, d-iii

(4) a-ii, b-i, c-iii, d-iv

108. Which of the following organism act as carcinogen in plant body?

- (1) Agrobacterium
- (2) Retrovirus
- (3) Both (1) and (2)
- (4) None of these

109. The number of chloroplast in each mesophyll is :

- (1) 80 - 120
- (2) 150 - 200
- (3) 20 - 40
- (4) 100 - 150.

110. How many hepatic caecae are present in cockroach:

- (1) 100-150 at the junction of foregut and midgut
- (2) 100-150 at the junction of midgut and hindgut
- (3) 6-8 at the junction of foregut and midgut
- (4) 6-8 at the junction of hindgut and midgut

111. An organism has eukaryotic cell type and photosynthetic. Which among the following has this character :

- (1) Desmids
- (2) Albugo
- (3) Mucor
- (4) Trichoderma.

112. How many matching are correct :

- | | | |
|---------------|---|--------------------|
| a. Sycon | - | Scypha |
| b. Ctenoplana | - | Marine |
| c. Euspongia | - | Bath sponge |
| d. Spongilla | - | Fresh water |
| e. Adamsia | - | Bilateral symmetry |

(1) 3 (2) 2

(3) 4 (4) 1

113. Which one of the following option incorrect

- (1) Mannitol is the stored food material of Brown algae
- (2) Volvox is an example of colonial green alga
- (3) Carrageen are found in brown agae
- (4) Chlorella and Spirulina are used as food supplement by space travellers

114. Read the following statement and find out correct statement :

(a) Vomiting is reflex action controlled by vomit centre of hypothalamus

(b) In jaundice liver is affected, skin and eyes

tuns yellow due to deposition of bile salts

(c) In constipation, the faeces are retained with

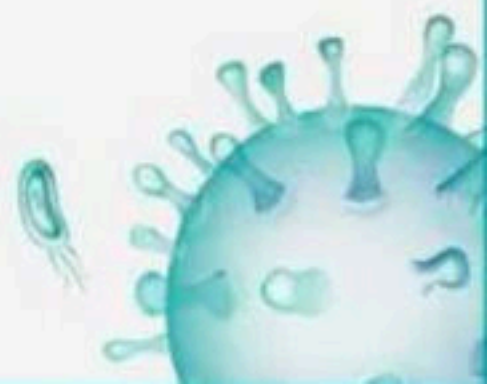

in colon as the bowl movement occur irregularly

(1) Only b, c

(2) Only c

(3) Only a and c

(4) a, b and c

115. Which of the following secrete gastric acid in stomach :

- (1) Parietal cell
- (2) Peptic cell
- (3) Chief cell
- (4) 1 and 3 both

116. An enzyme secreted by peptic cell is convert into an active enzyme by :

- (1) Hydrochloric acid
- (2) Enterokinase
- (3) Tripsinogen
- (4) (1) and (2) both

117. Which of the following statement is incorrect :

- (1) Liver is largest gland of body wighting about 1.2 to 1.5 kg
- (2) In liver bile secreted by hepatic cell
- (3) Bile also secreted by gall bladder
- (4) None of these

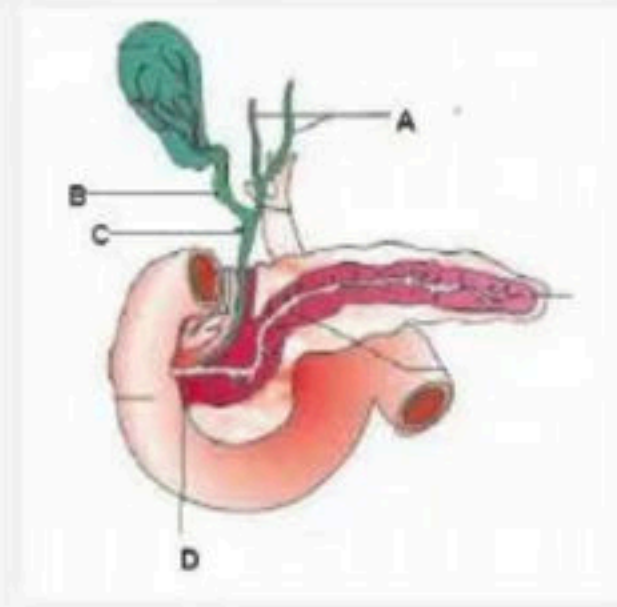

118. Brunner's glands are present in :

- (1) Mucosa of duodenum
- (2) Submucosa of duodenum
- (3) Mucosa of stomach
- (4) Submucosa of stomach

119. Labeled A, B, C, D in given diagram

- (1) A - Hepatic duct, B - Common bile duct, C – Cystic duct, D - Hepato pancreatic duct
- (2) A - Hepatic duct, B - Cystic duct ,C - Common bile duct, D - Hepato-pancreatic duct
- (3) A - Cystic duct, B - Hepatic duct ,C - Common bile duct, D - Hepato-pancreatic duct
- (4) A - Cystic duct, B - Hepatic duct, C - Common bile duct, D - Pancreatic duct

120. Match the following with respect to number of different teeth of human :

- | | |
|-------|----------------------|
| a) 20 | i) Incisors |
| b) 32 | ii) Canines |
| c) 4 | iii) Permanent teeth |
| d) 8 | iv) Milky teeth |

(1) a-iii, b-iv, c-ii, d-i

(2) a-iv, b-iii, c-ii, d-i

(3) a-iv, b-iii, c-i, d-ii

(4) a-iii, b-iv, c-i, d-ii

Title: Cell, Disease, Gland, Data, Examples NEET 2025

121. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : JGA play a complex regulatory role on kidney.

Reason (R) : A fall in GFR can activate the JG cells to release angiotensin.

Choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

122. Partial pressure of oxygen in alveoli, atmosphere and oxygenated blood in mm Hg are :

- (1) 104 , 159, 40 respectively
- (2) 104 , 159, 95 respectively
- (3) 104 , 95, 45 respectively
- (4) 159 , 104, 95 respectively

123. Name the blood cells, whose reduction in number can cause clotting disorder, leading to excessive loss of blood from the body :

- (1) Erythrocytes
- (2) Leucocytes
- (3) Neutrophils
- (4) Thrombocytes

124. Which of the following is correct for percentage and transport medium :

a - 3% O₂ transport by plasma

b - 70% CO₂ transport by HCO₃⁻

c - 7% CO₂ transport by RBCs

d - 97% O₂ transport by RBCs

e - 20 - 25% CO₂ transport by plasma

(1) a, b, d

(2) a, b, e

(3) b, c, d

(4) a, b, c, d, e

125. Volumes of air that will remain in the lungs after normal expiration :

(1) $E.R.V + R.V = 2300 \text{ mL}$

(2) $E.R.V + R.V = 3600 \text{ mL}$

(3) $E.R.V + T.V = 1600 \text{ mL}$

(4) $E.R.V + T.V = 3500 \text{ mL}$

Title: Cell, Disease, Gland, Data, Examples NEET 2025

126. Match the types of W.B.C. with their percentage in W.B.C.

Types of W.B.C	% in W.B.C
a. Basophils	i. 2 - 3
b. Neutrophils	ii. 20 - 25
c. Eosinophils	iii. 6 - 8
d. Monocytes	iv. 60 - 65
e. Lymphocytes	v. 0.5 - 1

(1) a - v, b - iv, c - iii, d - i, e - ii

(2) a - v, b - iv, c - i, d - iii, e - ii

(3) a - i, b - iv, c - v, d - iii, e - ii

(4) a - ii, b - iv, c - i, d - iii, e - v

Title: Cell, Disease, Gland, Data, Examples NEET 2025

127. Match the column I and column II :

Column I

a. Basophils

b. Neutrophils

c. Plasma cells

d. Platelets

Column II

i. Inflammation

ii. Blood clotting

iii. Phagocytosis

iv. Antibodies

(1) a - i, b - iii, c - iv, d - ii

(2) a - i, b - iii, c - ii, d - iv

(3) a - iii, b - ii, c - iv, d - i

(4) a - iii, b - i, c - iv, d - ii

128. Erythroblastosis foetalis can be avoided by administering A to the mother immediately after the delivery of first child :

- (1) A - anti Rh antibodies
- (2) A - Rh antibodies
- (3) A - Anti Rh antigen
- (4) A - Rh antigen

129. Which of the following type cells lack nucleus in most of mammals :

- (1) Erythrocytes
- (2) Eosinophils
- (3) Neutrophils
- (4) Monocyte

130. Match the following

a) pH 6.8

i) pH of pancreatic juice

b) pH 7.8

ii) pH of Gastric juice

c) pH 1.8

iii) pH of saliva is

(1) a-ii, b-i, c-iii

(2) a-iii, b-ii, c-i

(3) a-iii, b-i, c-ii

(4) a-i, b-iii, c-ii

131. Given below are two statements :

Statement I :

In mung bean, resistance to yellow mosaic virus and powdery mildew were induced by mutation

Statement II :

Resistance to yellow mosaic virus in *abelmoschus esculntus* from wild species

Choose the correct answer from the options given below.

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both, Statement I and Statement II are correct

132. "Hill bunt" disease resistant crop is grown for :

- (1) Cowpea
- (2) Wheat
- (3) Chili
- (4) All

133. In which year, high yielding varieties of wheat and rice developed:

- (1) 1970
- (2) 1920
- (3) Mid-1960
- (4) Mid-1930

134. India is mainly an Agricultural country. Agriculture account for approximately% of India GDP and employ% of the population :

(1) 33, 52

(2) 62, 33

(3) 33, 62

(4) 52, 33.

135. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) :

Peptic cells secrete intrinsic factor.

Reason (R) :

Intrinsic factor essential for absorption of vitamin B₁₂.

Choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

136. A patient brought to a hospital with myocardial infraction in general, he is treated with :

- (1) Cyclosporin - A
- (2) Statins
- (3) Penicillin
- (4) Streptokinase

137. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : The immune responses of old persons become weak.

Reason (R) : Thymus is degenerated in old, individual resulting in a decreased production of thymosins.

Choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

138. Melatonin is a hormone secreted by :

- (1) Pituitary gland
- (2) Pineal gland
- (3) Thymus gland
- (4) Adrenal cortex

139. Given below are two statements :

Statement I :

Prolonged hyperglycemia lead to a complex disorder called diabetes mellitus.

Statement II :

Diabetes mellitus patients are successfully treated with insulin therapy.

Choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both, Statement I and Statement II are correct

140. Match the following

a) > 10 species

b) Nearly 25%

c) 1920's

i) Prickly pear cactus introduced into Australia

ii) of invertebrates became extinct within a year

iii) insects are known to be phytophagous

(1) a-ii, b-i, c-iii

(2) a-i, b-ii, c-iii

(3) a-ii, b-iii, c-i

(4) a-iii, b-ii, c-i

141. Graves' disease is caused due to :

- (1) hyposecretion of thyroid gland
- (2) hypersecretion of thyroid gland
- (3) hyposecretion of adrenal gland
- (4) hypersecretion of adrenal gland.

142. Match the hormone with its source

- | | |
|-----------------|-------------------------|
| a. somatostatin | i. Pineal gland |
| b. Melatonin | ii. Corpus luteum |
| c. Aldosterone | iii. Placenta |
| d. Progesterone | iv. Adrenal cortex |
| e. HCG | v. Islets of Langerhans |
| | vi. Adenohypophysis |

- (1) a-v, b-i, c-vi, d-iii, e-ii
(2) a-i, b-ii, c-iv, d-iii, e-v
(3) a-ii, b-vi, c-iv, d-v, e-iii
(4) a-v, b-i, c-iv, d-ii, e-iii

143. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Arthritis is inflammation of joints.

Reason (R) : Inflammation of joints due to accumulation of uric acid crystals.

Choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

144. Which of the following can be a permanent cure for ADA deficiency?

- (1) Bone marrow transplantation
- (2) Enzyme replacement therapy
- (3) Introduction of functional ADA cDNA using retroviral vectors, into the lymphocytes
- (4) Introduction of ADA gene into cells at early embryonic stage.

145. Today, transgenic models exist for many human diseases which includes

(a) Cancer

(b) Cystic fibrosis

(c) Rheumatoid arthritis

(d) Alzheimer's disease

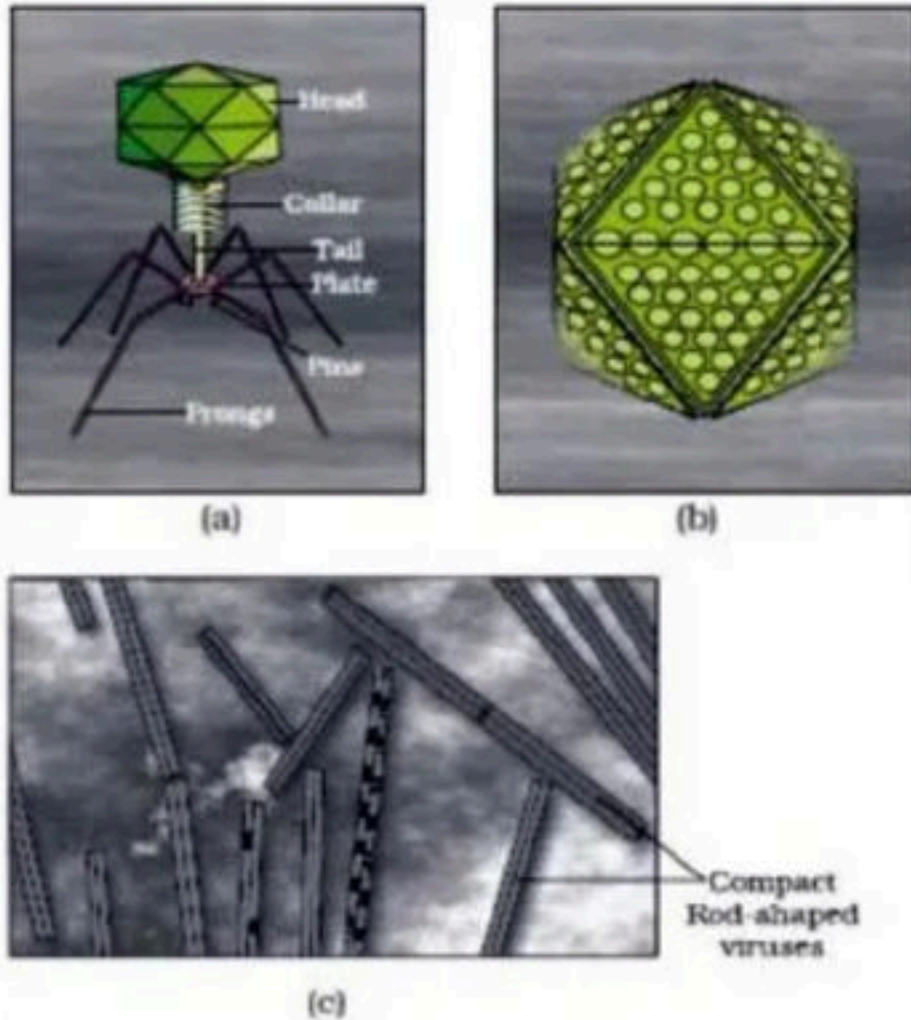

(1) Only (a) and (c) (2) Only (b) and (c)

(3) Only (a), (b) and (c) (4) All of these

Title: Cell, Disease, Gland, Data, Examples NEET 2025

146. Which one of the following are correct statements with reference to the given diagram :

- (1) All are viroids
- (2) Some are infectious agent
- (3) None are infectious agent
- (4) All are acellular

147. Disease resistant variety of *Abelmoschus esculentus* called :

- (1) Parbhani Kranti
- (2) Pusa Gaurav
- (3) Pusa swarnim
- (4) Arjun

148. Which among the following is not a prokaryotic cell:

- (1) Bacteria
- (2) Blue green algae
- (3) Mycoplasma
- (4) Yeast

149. Which among the statement is incorrect :

- a. Basic unit of life is the cell in some living organism
- b. Unicellular organisms are capable of independent existence
- c. Unicellular organisms are capable of performing the essential function of life.

Choose the option :

- (1) Only a and b
- (2) Only b and c
- (3) Only a
- (4) Only c

150. Total indirect ATP synthesized in glycolysis :

(1) 2

(2) 4

(3) 6

(4) 8

151. The reaction centre in PS II is :

(1) P_{500}

(2) P_{680}

(3) P_{780}

(4) P_{400}

152. In which of the following R.Q. value is 1 :

- (1) Fats
- (2) Carbohydrates
- (3) Protein
- (4) None

153. Bacteria are divided into Gram positive and negative on the basis of

- (1) Differences in cell envelopes
- (2) Manner in which they respond to Gram's stain
- (3) Causes diseases in human
- (4) Both 1 and 2

154. Read the following statement and choose correct option :

- (a) Boron deficiency causes calcium deficiency in plants**
 - (b) The deficiency of any element can cause multiple symptoms**
 - (c) Due to deficiency of potassium and magnesium first necrosis than chlorosis occurs in plants**
 - (d) Chlorine helps in Anion – cation balance in cell**
- (1) a, b correct and c, d incorrect
 - (2) b, c correct and a, d incorrect
 - (3) a, b, d correct and c incorrect
 - (4) a, b, c, d correct

155. Match the column I and column II :

Column I

- a. 2C compound
- b. 3C compound
- c. 4C compound
- d. 5C compound

Column II

- i. Citric acid
- ii. Pyruvic acid
- iii. Malic acid
- iv. Acetyl CoA
- v. α -Ketoglutaric acid

- (1) a – iv, b – iii, c – ii, d – v
- (2) a – iv, b – ii, c – iii, d – i
- (3) a – iv, b – ii, c – iii, d – v
- (4) a – ii, b – iii, c – iv, d – i

156. Which of the following is correct :

- (1) Auxin was isolated by F.W. Went from tips of coleoptiles of oat seedlings.
- (2) 'bakane' (foolish seedling) a disease of rice seedlings, was caused by a fungal pathogen *Gibberella fujikuroi*
- (3) E. Kurosawa reported the appearance of symptoms of the disease in uninfected rice seedlings when they were treated with sterile filtrates of the fungus.
- (4) All of these

157. Match the following :

a) P700

i) PS II

b) P680

ii) PS I

c) P680 & P700

iii) Cyclic photophosphorylation

iv) Non-cyclic photophosphorylation

(1) a-ii, b-i, c-iii & iv

(2) a-ii, b-i & iii, c-iv

(3) a-ii & iii, b-i, c-iv

(4) a-ii, b-iii, c-i & iv

158. Given below are two statements :

Statement I :

ELISA is based on the principle of antigen-Antibody interaction.

Statement II :

PCR is now routinely used to detect HIV in suspected AIDS patients.

Choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both, Statement I and Statement II are correct

159. In order for gene therapy to be most effective, gene should be inserted in :

- (1) WBC
- (2) RBC
- (3) Stem cells
- (4) All of these

160. Approximately how many varieties of rice are there in India alone

- (1) 100000
- (2) 200000
- (3) 300000
- (4) 400000

161. Which of the following are includes only in digestive glands :

- (1) Liver, gallbladder, pancreas, salivary gland
- (2) Liver, thyroid gland, pancreas, gallbladder
- (3) Liver, pancreas, salivary gland
- (4) All of these

162. Match the following with respect to productivity of biosphere

- | | |
|-----------------------------|--|
| a) 170 billion tons | i) Whole biosphere productivity |
| b) 55 billion tons | ii) Productivity of the oceans |
| c) 115 billion tones | iii) productivity of the 30% surface area of land |

(1) a-ii, b-i, c-iii

(2) a-i, b-ii, c-iii

(3) a-i, b-iii, c-ii

(4) a-iii, b-ii, c-i

163. Due to increasing air borne allergens and pollutants, many people urban area are suffering from respiratory disorder causing wheezing due to :

- (1) Benign growth on mucous lining of nasal cavity
- (2) Inflammation of bronchi and bronchioles
- (3) Proliferation of fibrous tissue and damage of the alveoli wall
- (4) Reduction in the secretion of surfactants by pneumocytes

164. Which of the following is incorrect :

- (1) Deposition of calcium, cholesterol and fibrous tissue in coronary artery called antherosclerosis
- (2) Angina commonly occur during middle age
- (3) 120/80 is normal blood pressure
- (4) When heart muscles suddenly damaged by an inadequate blood supply is called heart failure

165. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Heart failure means the state of heart when it is not pumping blood effectively enough to meet the needs of the body.

Reason (R) : Heart failure is the same as cardiac arrest or a heart attack.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

166. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Kidney transplantation is the ultimate method in the correction of acute renal failure (kidney failure).

Reason (R) : A functional kidney is used in transplantation from a donor to a failure person.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

167. Due to insulin secretion is :

- (1) Increase in the level of ketone bodies in the blood
- (2) Increase in the level of glucose in the blood
- (3) Increase in level of glucose and ketone body in blood
- (4) Decrease in the level of glucose in the blood

Title: Cell, Disease, Gland, Data, Examples NEET 2025

168. Match the item given in column I with those in column II select the correct option given below :

Column I

- a) Glycosuria**
- b) Gout**
- c) Renal calculi**
- d) Glomerulonephritis**

(1) a-iii, b-ii, c-iv, d- i

(3) a-i, b-ii, c-iii, d- iv

Column II

- i) Accumulation of uric acids in joints**
- ii) Mass of crystallised salts within the kidney**
- iii) Inflammation of glomeruli**
- iv) Presence of glucose in urine**

(2) a-ii, b-iii, c-iii, d- iv

(4) a-iv, b-i, c-ii, d- iii

169. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Analysis of urine helps in clinical diagnosis of many metabolic disorders as well as malfunctioning of the kidney.

Reason (R) : Presence of glucose (Glycosuria) and ketone bodies (Ketonuria) in urine are indicative diabetes mellitus.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

170. HCl is secreted by :

- (1) Chief cell
- (2) Peptic cell
- (3) Parietal cell
- (4) Zymogen cell

171. Pepsinogen is secreted by :

- (1) Oxyntic cell
- (2) Peptic cell
- (3) Parietal cell
- (4) G cell

Title: Cell, Disease, Gland, Data, Examples NEET 2025

172. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Tetany : Rapid spasm (wild contractions) in muscle due to low Ca^{++} in body fluid.

Reason (R) : Tetany: Rapid spasm (wild contractions) in muscle due to high Ca^{++} in body fluid.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

173. In which disease ejection of stomach contents through the mouth :

- (1) Jaundice
- (2) Vomiting
- (3) Diarrhoea
- (4) Constipation

174. In which disease skin and eyes turn yellow due to the deposit of bile pigments :

- (1) Jaundice
- (2) Vomiting
- (3) Diarrhoea
- (4) Constipation

175. The vomit centre found in :

- (1) Cerebellum
- (2) Hypothalamus
- (3) Cerebrum
- (4) Medulla

176. Every 100 ml of deoxygenated blood delivers approximately how much of CO_2 to the alveoli :

- (1) 20 ml
- (2) 10 ml
- (3) 40 ml
- (4) 4 ml

Title: Cell, Disease, Gland, Data, Examples NEET 2025

177. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : The pineal gland is located in the dorsal side of mid brain

Reason (R) : Pineal gland secretes a hormone called melatonin

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

178. Wild contractions in muscles due to hypocalcemic condition is called as :

- (1) Arthritis
- (2) Tetany
- (3) Osteoporosis
- (4) Gout

179. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A) : Vomiting is the ejection of stomach content through the mouth.

Reason (R) : This reflex action is control by vomit center in the Hypothalamous.

In the light of the above statements, choose the correct answer from the options given below

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correction explanation of (A)

180. If a prokaryotic cell has tubules and lamellae which are the extension or extended form of plasma membrane then what is the name and function of that structure:

- (1) Vesicles; DNA replication and Transcription
- (2) Chromatophores; cell wall formation
- (3) Mesosome; cell wall formation, help in respiration and secretion
- (4) Both 1 and 2

181. Given below are two statements :

Statement I :

Trichomes in the shoot system are usually unicellular

Statement-II :

Trichomes may be branched or unbranched

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

182. Given below are two statements :

Statement I :

Companion cells help in maintaining the pressure gradient in Sieve tubes.

Statement-II :

In gymnosperm companion cells absent and albuminous cells present

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

183. Many bacteria have small circular DNA outside the genomic DNA. These smaller DNA are called as:

- (1) Genomic DNA
- (2) snDNA
- (3) Plasmid
- (4) siDNA.

184. Arrange the following cells in an ascending order of their sizes

(I) Mycoplasma

(II) Ostrich egg

(III) Human RBC

(IV) Bacteria

(1) I, II, III, IV

(2) I, IV, III, II

(3) II, IV, I, III

(4) IV, III, II, I

185. Match the following

- | | |
|------------------|--|
| a) less than 50% | i) It is PAR of the incident solar radiation |
| b) 2-10% | ii) Plants capture only this % of the PAR. |
| c) 10% | iii) One trophic level transfers only this % of energy to next trophic level |
| d) 1% | iv) The total global carbon in the atmosphere |

(1) a-i, b-ii, c-iii, d-iv

(2) a-i, b-ii, c-iii, d-iv

(3) a-ii, b-i, c-iii, d-iv

(4) a-iii, b-ii, c-i, d-iv

186. Given below are two statements :

Statement I : Cytokinesis in plant cell takes place by cell-plate formation

Statement-II : Cytokinesis in animal cells by furrowing and is centripetal.

Choose the correct answer from the option given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct

187. Match the following with respect to carbon per cent

- | | |
|--|--|
| a) 49 % | i) Constitutes of dry weight of organisms |
| b) 71% | ii) Carbon is fixed in the biosphere |
| c) 4×10^{13} kg | iii) Carbon found dissolved in oceans |
| d) 1% | iv) The total global carbon in the atmosphere |

(1) a-iv, b-iii, c-ii, d-i

(2) a-i, b-iv, c-ii, d-iii

(3) a-ii, b-iii, c-i, d-iv

(4) a-i, b-iii, c-ii, d-iv

188. Which of these belong to the family Liliaceae

(i) Gloriosa

(ii) Aloe

(iii) Petunia

(iv) Colchicum autumnale

(v) Asparagus

(vi) Chilli

(1) (i), (ii), (iii), (iv)

(2) (i), (ii), (iv), (v)

(3) (i), (ii), (v), (vi)

(4) (ii), (iv), (v), (vi)

189. Match the disease with vector and choose correct option :

Disease	Vector
a. Dengue	i. Culex
b. Malaria	ii. Aedes
c. Chikungunia	iii. Female Anopheles
d. Filariasis	iv. Plasmodium

(1) a – ii, b – iv, c – i, d – iii

(2) a – ii, b – iii, c – ii, d – i

(3) a – i, b – ii, c – iii, d – iv

(4) a – i, b – iii, c – ii, d – i

Title: Cell, Disease, Gland, Data, Examples NEET 2025

190. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : *Salmonella typhi* is a pathogenic bacterium

Reason (R) : It generally enter the large Intestine through food and water and produce typhoid.

choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

191. Malarial parasite attacks on which after liver in Human body

- (1) WBC
- (2) RBC
- (3) lungs
- (4) brain

192. Match the following with respect to diversity of the organism in biosphere

- | | |
|---------------------|-------------------------|
| a) More than 20,000 | i) Species of beetles. |
| b) Nearly 20,000 | ii) Species of ants. |
| c) 3,00,000 | iii) species of fishes |
| d) 28,000 | iv) Species of orchids. |

- (1) a-iv ,b-i, c-ii, d-iii
(2) a-iii ,b-iv, c-i, d-ii
(3) a-ii ,b-iv, c-i, d-iii
(4) a-i ,b-iv, c-ii, d-iii

193. What is the meaning of T in T-lymphocyte :

- (1) Thyroid gland
- (2) Temperature
- (3) Triplet
- (4) Thymus gland

194. If in a person shows the production of interferons in his body, chances are that he is not suffering from:

- (1) Polio
- (2) Diphtheria
- (3) Plague
- (4) Both 2 and 3

195. Which one of the following is the correct match :

- (1) Bacteriophage lambda – 148502 bp
- (2) $\phi \times 174$ – 538600 bp
- (3) Bacteriophage lambda – 48502 bp
- (4) E. coli – 4.6×10^9 bp

196. The total number of nucleosome are formed in human cell :

- (1) 6.6×10^7
- (2) 3.3×10^9
- (3) 6.6×10^6
- (4) 3.3×10^7

197. How many matching are correct with reference to evolution :

- | | |
|--|-------------------|
| a. First cellular forms of life appeared | – 2000 mya |
| b. Invertebrates | – 5000 mya |
| c. Sea weeds | – 320 mya |
| d. Jaw less fish | – 350 mya |
| e. Dinosaurs suddenly disappeared from earth. | – 165 mya |

(1) 4 (2) 3

(3) 2 (4) 1

198. Symptoms of common cold usually last for how many days :

- (1) 30-70 days
- (2) 3-7 days
- (3) 15-30 days
- (4) 40-50 days

199. Which pathogen causes pneumonia :

- (1) *Salmonella typhi*
- (2) *Haemophilus influenzae*
- (3) *Plasmodium vivax*
- (4) *Entamoeba histolytica*

200. Which disease is caused by helminths :

- (1) Ascariasis
- (2) Amoebiasis
- (3) Filariasis
- (4) 1 and 3

THANK YOU

BIOLOGYLIVE
