

Human Health and Disease - 100 MCQs

NCERT Nichod : Biology Practice Series NEET 2025

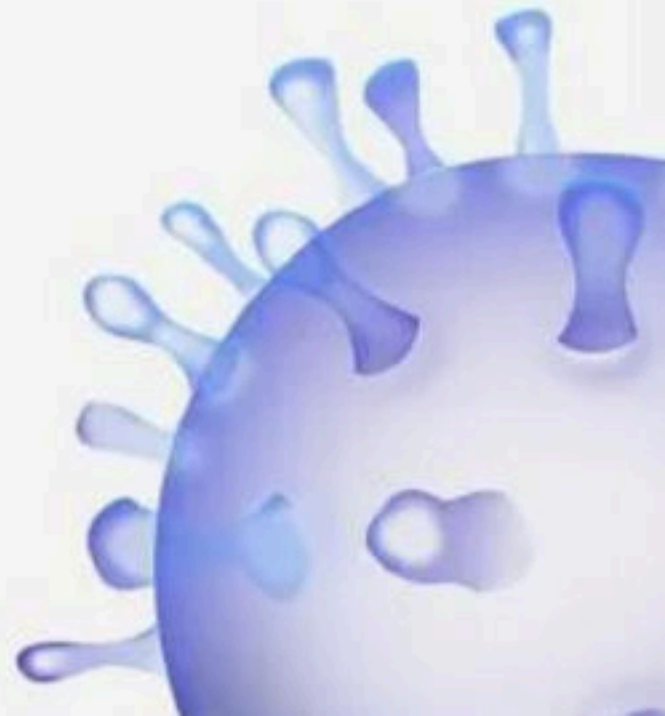

unacademy

Human Health and Disease

BIOLOGYLIVE

1. A drug that speeds up your Central Nervous System is called a:

- (1) Opiate
- (2) Stimulant
- (3) Inhalant
- (4) Depressant

2. What is the main lymphoid organ where all blood cells including lymphocytes are produced?

- (1) Bone marrow
- (2) Peyers patches
- (3) Tonsils
- (4) Spleen

3. Read the following statements :

Read the statements A and statement B carefully to mark the correct options given below.

Statement A : Morphine is obtained by acetylation of Heroin.

Statement B : Cannabinoids are known for their effect on cardiovascular system

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

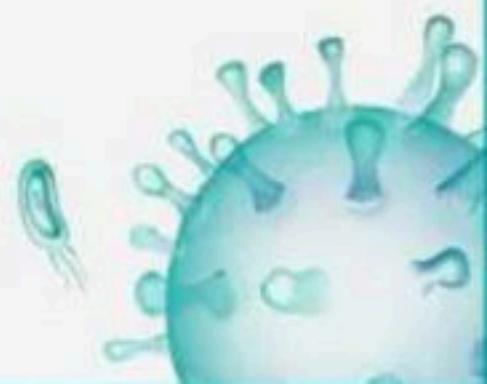

4. *Haemophilis influenzae* bacteria are responsible for

- (1) Influenza
- (2) Pneumonia
- (3) Haemophilia
- (4) Filariasis

5. HIV that causes AIDS, first starts destroying

- (1) B-lymphocytes
- (2) Leucocytes
- (3) Helper T-lymphocytes
- (4) Thrombocytes

6. Match the columns I and II

Column I		Column II	
A	Amoebiasis	P	<i>Gambusia</i>
B	Diphtheria	Q	Use only sterilized food and water
C	Malaria	R	DPT vaccine
D	Dengue	S	<i>Aedes</i>

- (1) A – R, B – P, C – Q, D – S
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – Q, C – S, D – R
(4) A – Q, B – R, C – P, D – S

7. Match the columns I and II.

Column I

A Tonsils

B Peyer's patches of

C Spleen

Column II

P Left side of abdomen

Q In the pharynx

R Small intestine and appendix

(1) A – R, B – P, C – Q

(2) A – Q, B – R, C – P

(3) A – P, B – R, C – Q

(4) A – Q, B – P, C – R

8. Match the columns I and II.

Column I

A Opioids

B Cannabinoids

C Cocaine

D Atropa belladonna

Column II

P Marijuana

Q Smack

R Coke

S Hallucinogens

(1) A – R, B – P, C – Q, D – S

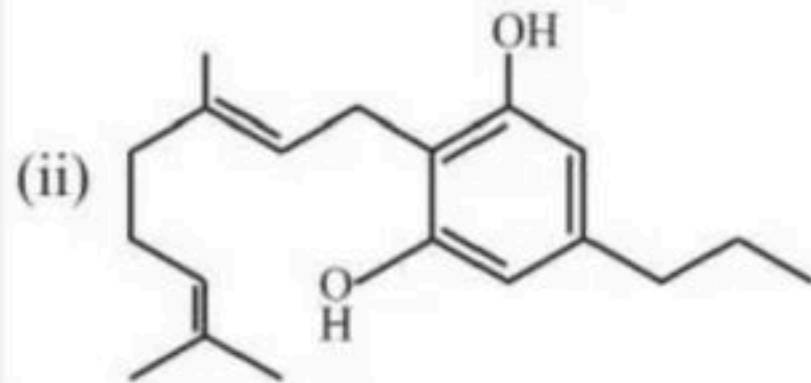

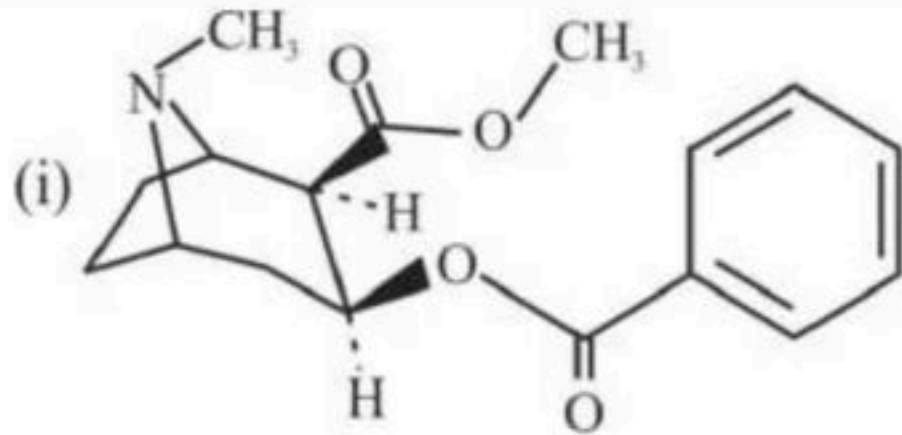

(2) A – S, B – R, C – P, D – Q

(3) A – P, B – R, C – Q, D – S

(4) A – Q, B – P, C – R, D – S

9. Identify the molecules (i) and (ii) given below and select the right option giving their source and use.

	Molecule	Source	Use
(1)	(i) Cocaine	<i>Erythroxylum coca</i>	Accelerates the transport of dopamine
(2)	(ii) Heroin	<i>Cannabis sativa</i>	Depressant and slows down body functions
(3)	(ii) Cannabinoid	<i>Atropa belladonna</i>	Produces hallucinations
(4)	(i) Morphine	<i>Papaver somniferum</i>	Sedative and pain killer

10. Which particular type of drug is obtained from the plant whose one flowering branch is shown below

- (1) Hallucinogen
- (2) Depressant
- (3) Stimulant
- (4) Pain-killer

11. The following figure represent.

- (1) Round worm infection
- (2) Flat worm infection
- (3) Ring worm infection
- (4) Pin worm infection

12. Statement A : Opium is derived from latex of unripe fruits of *Papaver somniferum*

Statement B : *Papaver* has multicarpellary, apocarpous pistil.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

13. Given below are two statements:

Statement A : Autoimmune disorder is a condition where body defense mechanism recognizes its own cells as foreign bodies.

Statement B : Rheumatoid arthritis is a condition where body does not attack self cells.

In the light of the above statements, choose the most appropriate answer from the options given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct.

14. Causative organism of dysentery caused by a protista is

- (1) Plasmodium vivax
- (2) Entamoeba histolytica
- (3) Streptococcus pneumoniae
- (4) Salmonella sp.

15. In ____ , a piece of the suspected tissue cut into thin sections is stained and examined under microscope ____ by a pathologist.

- (1) X-ray, MRI
- (2) Biopsy, histopathological studies
- (3) Biopsy, MRI
- (4) Histopathological studies, biopsy

16. Carcinoma refers to

- (1) Malignant tumours of the connective tissue
- (2) Malignant tumour of the skin or mucous membrane
- (3) Malignant tumour of the colon
- (4) Benign tumours of the connective tissue

17. The only blood cells that are not considered to be part of the immune system are:

- (1) Glial cells
- (2) Lymphocytes
- (3) RBC
- (4) Leucocytes

18. Identify the correct pair representing the causative agent of typhoid fever and the confirmatory test for typhoid.

- (1) Plasmodium vivax / UTI test
- (2) Streptococcus pneumoniae / Widal test
- (3) Salmonella typhi / Anthrone test
- (4) Salmonella typhi / Widal test

19. Characteristics of cancer are

- (1) All viruses are oncogenic
- (2) All tumours are cancers
- (3) Cancerous cells show property of contact inhibition
- (4) Cancer cells show metastasis

20. Full form of PMNL is

- (1) Poly Morpho-Nuclear Leucocytes
- (2) Poly Meta-Nuclear Lymphocytes
- (3) Poly Mega-Nuclear Leucocytes
- (4) Poly Morpho-Neutrophilo Lymphocytes

21. Decrease in platelet count is noted in following viral disease

- (1) Malignant malaria
- (2) Mumps
- (3) Dengue fever
- (4) Polio myelitis

22. The secondary lymphoid organs provide the sites for,

- (1) Interaction of lymphocytes with the antigen
- (2) Proliferation to become effector cells.
- (3) To become mature B and T cells
- (4) Both 1 and 2

23. Cocaine is commonly called as

- (1) Coke
- (2) Crack
- (3) Both (1) and (2)
- (4) Smack

24. Many diseases can be diagnosed by observing the symptoms in the patient. Which group of symptoms are indicative of pneumonia?

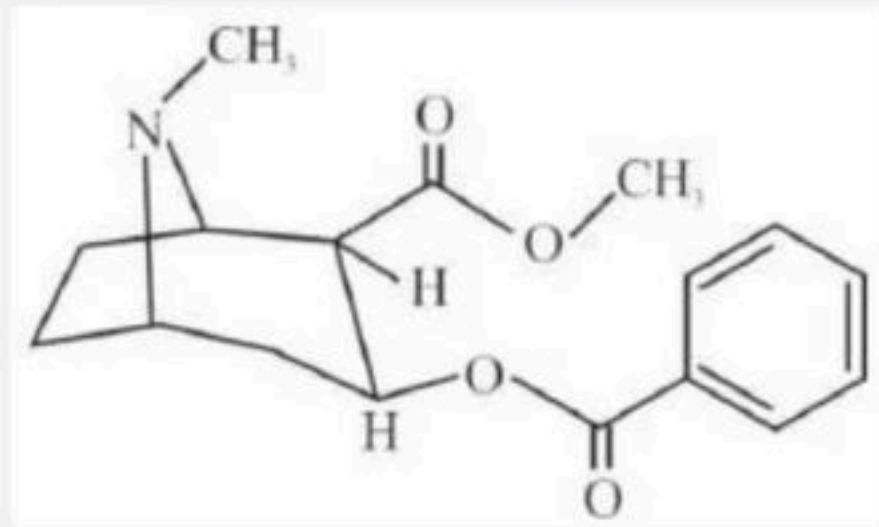

- (1) Difficulty in respiration, fever, chills, cough, headache
- (2) Constipation, abdominal pain, cramps, blood clots
- (3) Nasal congestion and discharge, cough, constipation, headache
- (4) High fever, weakness, stomach pain, loss of appetite and constipation

25. Salmonella typhi affects ____ to cause typhoid

- (1) Heart
- (2) Lungs
- (3) Intestine
- (4) Liver to cause typhoid

26. Identify the molecule shown below

- (1) Chemical structure of morphine
- (2) Chemical structure of marijuana
- (3) Chemical structure of coca
- (4) Chemical structure of LSD

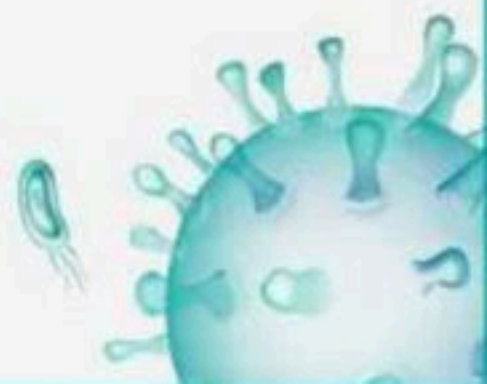

27. Which out of the following cells is present in tissues that can phagocytose and destroy microbes?

- (1) Monocyte
- (2) Macrophages
- (3) Neutrophils
- (4) Lymphocyte

28. Best match for transplants in order of preference is.

- (1) Parent > Sibling > Twin > Unrelated donor
- (2) Sibling > Twin > Parent > Unrelated donor
- (3) Twin > Unrelated donor > Parent > Sibling
- (4) Twin > Sibling > Parent > Unrelated donor

29. Two heavy chains and Two light chains are associated with ----- structure.

- (1) Antibody
- (2) Antigen
- (3) NK- cells
- (4) Both 2 and 3

30. Which of the following include the primary lymphoid organs?

- (1) Thymus, lymph nodes
- (2) Bone marrow and thymus
- (3) Bone marrow, Peyer's patches
- (4) Thymus, and tonsils

31. Treatment and detection of cancer can be done by

- (1) Chemotherapy
- (2) Radiography
- (3) Surgery
- (4) All of these

32. Identify the viral diseases from the following.

- (1) Chicken pox, polio, tuberculosis
- (2) Polio, mumps, cholera
- (3) Polio, chicken pox, malaria
- (4) Polio, chicken pox, small pox

33. Because of smoking which kind of change occurs in blood?

- (1) Proportion of CO_2 decrease and in Hb also decreases CO_2
- (2) Proportion of O_2 decreases and in Hb proportion of increases O_2
- (3) Proportion of O_2 increases and in Hb proportion of decreases O_2
- (4) Proportion of CO_2 increases and in Hb proportion of O_2 decreases

34. Which of the following is not an autoimmune disease?

- (1) Alzheimer's
- (2) Rheumatoid disease
- (3) Psoriasis
- (4) Vitiligo

35. Rhinovirus causing cold ____

- (1) Usually last for 3-7 days
- (2) Usually last for 13-17 days
- (3) Usually last for 20 days
- (4) Usually last for 3-7 weeks

36. Smack and Crack are produced from:

- (1) Cannabis sativa and Atropa belladonna
- (2) Papaver somniferum and Erythroxylon coca
- (3) Cannabis sativa and Papaver somniferum
- (4) Erythroxylon coca and Atropa belladonna

37. α - interferons are used in the treatment of

- (1) Bacterial infections
- (2) Typhoid
- (3) Pneumonia
- (4) Cancer

38. Which of the following glands is large sized at birth but reduces in size with ageing?

- (1) Pineal
- (2) Pituitary
- (3) Thymus
- (4) Thyroid

39. Which Plasmodium cause malignant malaria and it is the most serious one and can even be fatal?

- (1) Plasmodium vivax
- (2) Plasmodium malariae
- (3) Plasmodium falciparum
- (4) All of these

40. Which of the following is not the causal organism for ringworm?

- (1) Microsporum
- (2) Trichophyton
- (3) Epidermophyton
- (4) macrosporum

41. Which of the following is a communicable disease?

- (1) Malaria
- (2) Diabetes
- (3) Hypertension
- (4) Kwashiorkor

42. Plants with hallucinogenic properties are

- (1) Atropa belladonna
- (2) Datura
- (3) Both (1) and (2)
- (4) Papaver

43. Which of the following are the reason(s) for Rheumatoid arthritis? Choose the correct option.

- i. The ability to differentiate pathogens or foreign molecules from self cells increases.**
- ii. Body attacks self cells**
- iii. More antibodies are produced in the body**
- iv. The ability to differentiate pathogens or foreign molecules from self cells is lost**

(1) and ii

(2) ii and iv

(3) iii and iv

(4) and iii

44. Which of the following drug is extracted from the latex of poppy plant *Papaver somniferum*, generally taken by snorting and injection, is a depressant and slows down body functions?

- (1) LSD
- (2) Ganja
- (3) Barbiturate
- (4) Heroin

45. Antihistamine drug is effective in

- (1) Bacterial infection
- (2) Viral infection
- (3) Fungal infection
- (4) Allergy

46. Assertion : Amoebic dysentery can be diagnosed by stool test of the patient

Reason : Stool of the patient has cysts

- (1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.
- (2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.
- (3) Assertion is correct but Reason is incorrect.
- (4) Both Assertion and Reason are incorrect

47. Internal bleeding, muscular pain, fever, anaemia and blockage of the intestinal passage are the common symptoms of

- (1) Amoebiasis
- (2) Elephantiasis
- (3) Ascariasis
- (4) Typhoid

48. The function of histamine is

- (1) Vasoconstriction of blood vessels
- (2) Vasodilation of blood vessels
- (3) Phagocytosis
- (4) No effect on blood vessel

49. Select the incorrect option amongst the following.

i. Radiotherapy ____ tumor cells are irradiated lethally.

ii. Chemotherapy ____ drugs are used to kill cancerous cells.

iii. MRI ____ detect pathological and physiological changes in the living tissue

iv. Computed tomography ____ uses X-rays to generate a four-dimensional image of the internals of an object.

(1) i

(2) ii

(3) iii

(4) iv

50. Binding of antigen to antibody is through

- (1) Disulphide bridges
- (2) Amide formation
- (3) Covalent bonds
- (4) Electrostatic interactions

51. HIV enters human body and it enters into where RNA genome of virus replicates to form DNA

- (1) WBC
- (2) RBC
- (3) Macrophages
- (4) Erythrocytes

52. Match the following columns and choose the correct option:

Column I

A *Haemophilus influenzae*

B *Entamoeba histolytica*

C *Plasmodium falciparum*

D *Wuchereria bancrofti*

(1) A - R, B - S, C - P, D - Q

(3) A - R, B - P, C - Q, D - S

Column II

P Malignant malaria

Q Elephantiasis

R Pneumonia

S Amoebiasis

(2) A - S, B - P, C - Q, D - R

(4) A - Q, B - R, C - S, D - P

53. Match the column I with column II

Column I		Column II	
A	Primary lymphoid organ	P	Thymus
B	Autoimmunity	Q	Spleen
C	Lobe like organ near the heart, coloured pink	R	Bone marrow
D	Organ like bean shape	S	Myasthenia gravis

- (1) A – R, B – S, C – P, D – Q
- (2) A – S, B – R, C – P, D – Q
- (3) A – S, B – P, C – Q, D – R
- (4) A – Q, B – P, C – R, D – S

54. Match the column I with column II.

Column I		Column II	
A	Malaria	P	Plasmodium
B	Cold	Q	Rhino virus
C	Ring worm	R	HIV
D	AIDS	S	<i>Microsporum</i>

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – P, C – R, D – S

55. Match Column I with Column II

Choose the correct answer from the options given below:

Column I

A Heroin

B Marijuana

C Cocaine

D Morphine

Column II

P Effect on cardiovascular system

Q Slow down body function

R Painkiller

S Interfere with transport of dopamine

(1) A-Q, B-P, C-S, D-R

(2) A-P, B-Q, C-R, D-S

(3) A-S, B-R, C-Q, D-P

(4) A-R, B-S, C-P, D-Q

56. Match Column I with Column II :

Choose the correct answer from the options given below:

Column I

A Cocaine

B Heroin

C Morphine

D Marijuana

Column II

P Effective sedative in surgery

Q Cannabis sativa

R Erythroxylum

S Papaver somniferum

(1) A – S, B – R, C – P, D – Q

(2) A – P, B – R, C – Q, D – S

(3) A – Q, B – P, C – R, D – S

(4) A – R, B – S, C – P, D – Q

57. Match the following columns.

Column I		Column II	
A	Biopsy	P	Use of X-rays to generate a three-dimensional image
B	Oncogenic viruses	Q	Strong magnetic fields and nonionising radiations
C	MRI	R	Viral oncogenes
D	Computed tomography	S	A piece of the suspected tissue cut into thin sections, stained and examined under microscope

(1) A – S, B – P, C – R, D – Q

(2) A – S, B – R, C – Q, D – P

(3) A – R, B – S, C – P, D – Q

(4) A – Q, B – S, C – P, D – R

58. Match the items of Column I with those of Column II and choose the correct answer. Select the code for the correct answer from the options given below.

Column I		Column II	
A	Hepatitis B vaccine	P	IgA
B	Preformed antibodies	Q	Against snake venom
C	Colostrum	R	Neutrophils
D	PMNL	S	Yeast
		T	Basophils

- (1) A – S, B – Q, C – P, D – R
- (2) A – P, B – Q, C – S, D – R
- (3) A – S, B – Q, C – P, D – T
- (4) A – T, B – Q, C – S, D – P

59. Match Column I with Column II :

Choose the correct answer from the options given below:

Column I

A Typhoid

B Leishmaniasis

C Ringworm

D Filariasis

Column II

P Fungus

Q Nematode

R Protozoa

S Bacteria

(1) A – P, B – R, C – Q, D – S

(3) A – R, B – P, C – S, D – Q

(2) A – S, B – R, C – P, D – Q

(4) A – Q, B – S, C – R, D – P

60. Match Column I with Column II.

Choose the correct answer from the options given below:

Column I

A Ringworm

B Filariasis

C Malaria

D Pneumonia

(1) A-Q, B-R, C-S, D-P

(3) A-R, B-Q, C-P, D-S

Column II

P Haemophilus influenzae

Q Trichophyton

R Wuchereria bancrofti

S Plasmodium vivax

(2) A-Q, B-R, C-P, D-S

(4) A-R, B-Q, C-S, D-P

61. Match Column - I with Column - II

Choose the correct answer from the options given below.

Column I

A Filariasis

B Ameobiasis

C Pneumonia

D Ringworm

Column II

P Haemophilus influenzae

Q Trichophyton

R Wuchereria bancrofti

S Entamoeba histolytica

(1) A – S, B – P, C – R, D – Q

(3) A – P, B – Q, C – S, D – R

(2) A – R, B – S, C – P, D – Q

(4) A – Q, B – R, C – P, D – S

62. Match the columns I and II.

Column I

A Typhoid

B Ascariasis

C Filariasis

D Amoebiasis

Column II

P *Ascaris lumbricoides*

Q *Wuchereria bancrofti*

R *Entamoeba histolytica*

S *Salmonella typhimurium*

(1) A – R, B – P, C – Q, D – S

(3) A – P, B – R, C – Q, D – S

(2) A – S, B – P, C – Q, D – R

(4) A – Q, B – P, C – R, D – S

63. Match the column I with column II.

Column I

A AIDS reported first

B Diagnosis test of AIDS

C Group of retrovirus

D Time-lag for HIV

(1) A – Q, B – P, C – S, D – R

(3) A – R, B – S, C – P, D – Q

Column II

P HIV

Q 1981

R 5-10 years

S ELISA

(2) A – S, B – R, C – P, D – Q

(4) A – Q, B – S, C – P, D – R

64. Match the column I with column II.

Column I		Column II	
A	Sustained high fever (39° to 40°C)	P	Pneumonia
B	Finger nails turn gray to bluish in colour	Q	Typhoid
C	Nasal congestion and discharge	R	Common cold
D	Stools with excess mucous and blood clots	S	Amoebiasis

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

65. Match the types of immunity listed in Column I with the examples listed in Column II. Choose the answer that gives the correct combination of alphabets of the two columns.

Column I		Column II	
A	Natural active	P	Immunity developed by heredity
B	Artificial passive	Q	From mother to foetus through placenta
C	Artificial active	R	Injection of antiserum to travellers
D	Natural passive	S	Fighting infections naturally
		T	Induced by vaccination

- (1) A – T; B – ; S C – R; D – P
- (2) A – S; B – T; C – Q; D – R
- (3) A – S; B – R; C – T; D – Q
- (4) A – P; B – Q; C – R; D – T

66. Match the columns I and II

Column I		Column II	
A	<i>Salmonella typhi</i>	P	Amoeboid protozoa
B	<i>Entamoeba histolytica</i>	Q	Widal
C	<i>Plasmodium falciparum</i>	R	Malignant malaria
D	<i>Wuchereria bancrofti</i>	S	Lymph nodes

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – P, C – R, D – S

67. Match the columns I and II.

Column I

A Datura

B Cocaine

C Opioids

D Cannabinoids

Column II

P Erythroxylum coca

Q Papaver somniferum

R Hallucinogens

S Cannabisativa

(1) A – R, B – P, C – Q, D – S

(2) A – S, B – R, C – P, D – Q

(3) A – P, B – R, C – Q, D – S

(4) A – Q, B – P, C – R, D – S

68. Match the column I with column II

Column I		Column II	
A	Cellular barrier	P	Saliva
B	Physiological	Q	Mucus coating of the epithelial lining
C	Physical barrier	R	PMNL
D	Cytokine	S	Virus infected cell

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – R, C – P, D – S

69. Match the columns I and II.

Column I		Column II	
A	CMI	P	Antibodies are produced outside the body
B	PMNL	Q	Antibodies are produced inside the body
C	Active immunity	R	Cell Mediated Immunity
D	Passive immunity	S	Leucocytes

- (1) A – R, B – S, C – Q, D – P
(2) A – S, B – R, C – P, D – Q
(3) A – P, B – R, C – Q, D – S
(4) A – Q, B – P, C – R, D – S

70. Match Column I with Column II :

Choose the correct answer from the options given below:

Column I		Column II	
A	Common cold	P	<i>Plasmodium</i>
B	Haemozoin	Q	Typhoid
C	Widal test	R	Rhinoviruses
D	Allergy	S	Dust mites

- (1) A – Q, B – S, C – R, D – P
- (2) A – P, B – R, C – Q, D – S
- (3) A – R, B – P, C – Q, D – S
- (4) A – S, B – Q, C – R, D – P

71. Match the columns I and II.

Column I		Column II	
A	Active natural immunity	P	Antibodies transferred through the placenta
B	First line of defence	Q	Yeast
C	Passive natural immunity	R	Direct contact with the pathogens that have entered inside the body
D	Hepatitis B vaccine	S	Innate immunity

- (1) A – R, B – S, C – Q, D – P
- (2) A – S, B – R, C – P, D – Q
- (3) A – R, B – S, C – P, D – Q
- (4) A – Q, B – P, C – R, D – S

72. Match the following diseases with the causative organism and select the correct option.

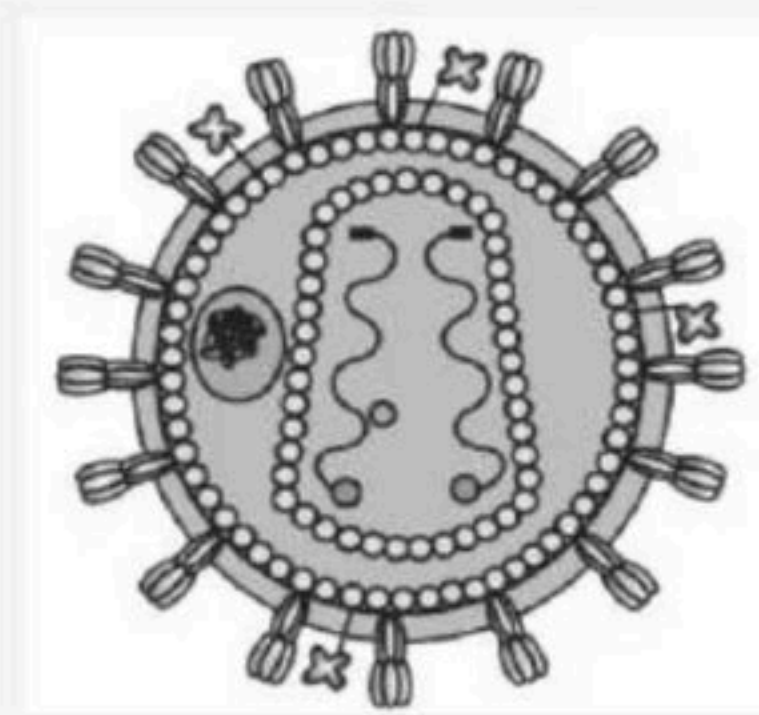

Column I		Column II	
A	Typhoid	P	Wuchereria
B	Pneumonia	Q	Plasmodium
C	Filariasis	R	Salmonella
D	Malaria	S	Haemophilus

- (1) A – R, B – S, C – P, D – Q
- (2) A – Q, B – P, C – R, D – S
- (3) A – S, B – P, C – Q, D – R
- (4) A – Q, B – R, C – P, D – S

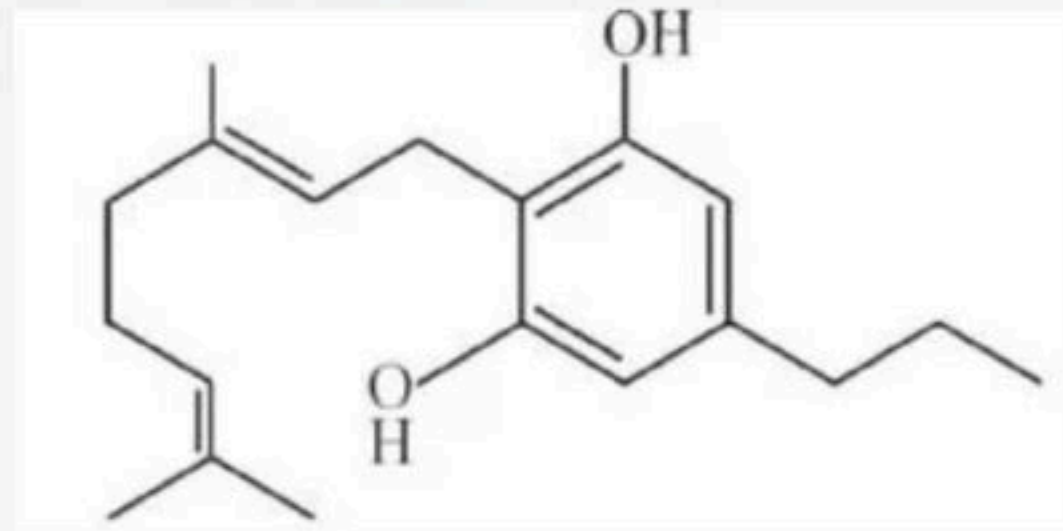

73. The following structure represents which bacteria?

- (1) Salmonella
- (2) Haemophilus
- (3) Mycobacterium
- (4) None of these

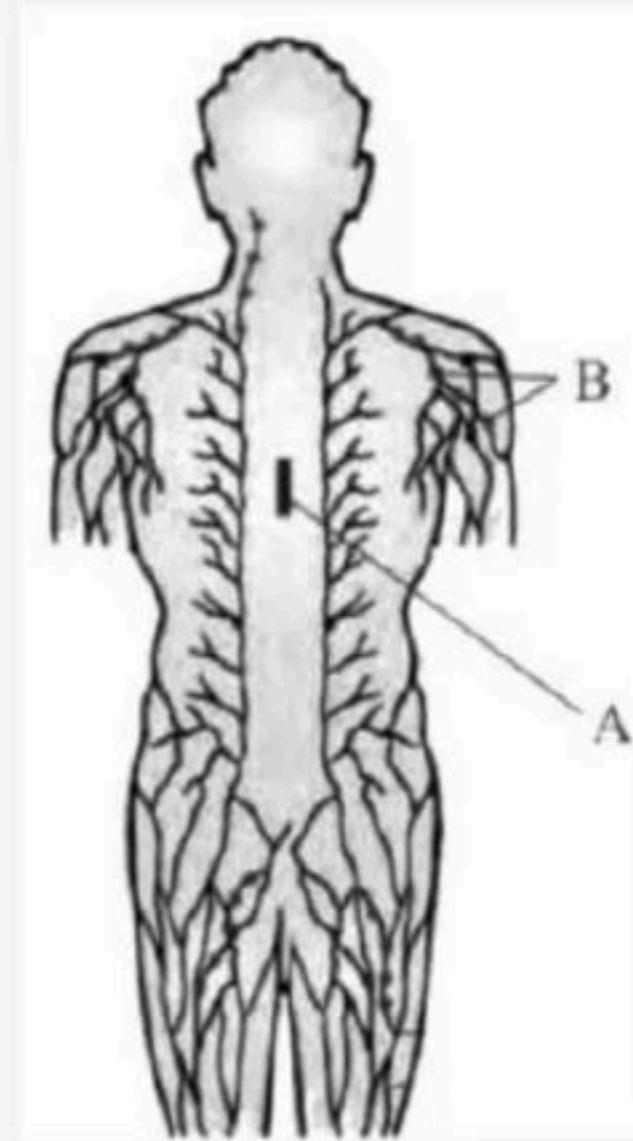

74. The following represents the structure of

- (1) Smack
- (2) Coca
- (3) Cannabinoids
- (4) LSD

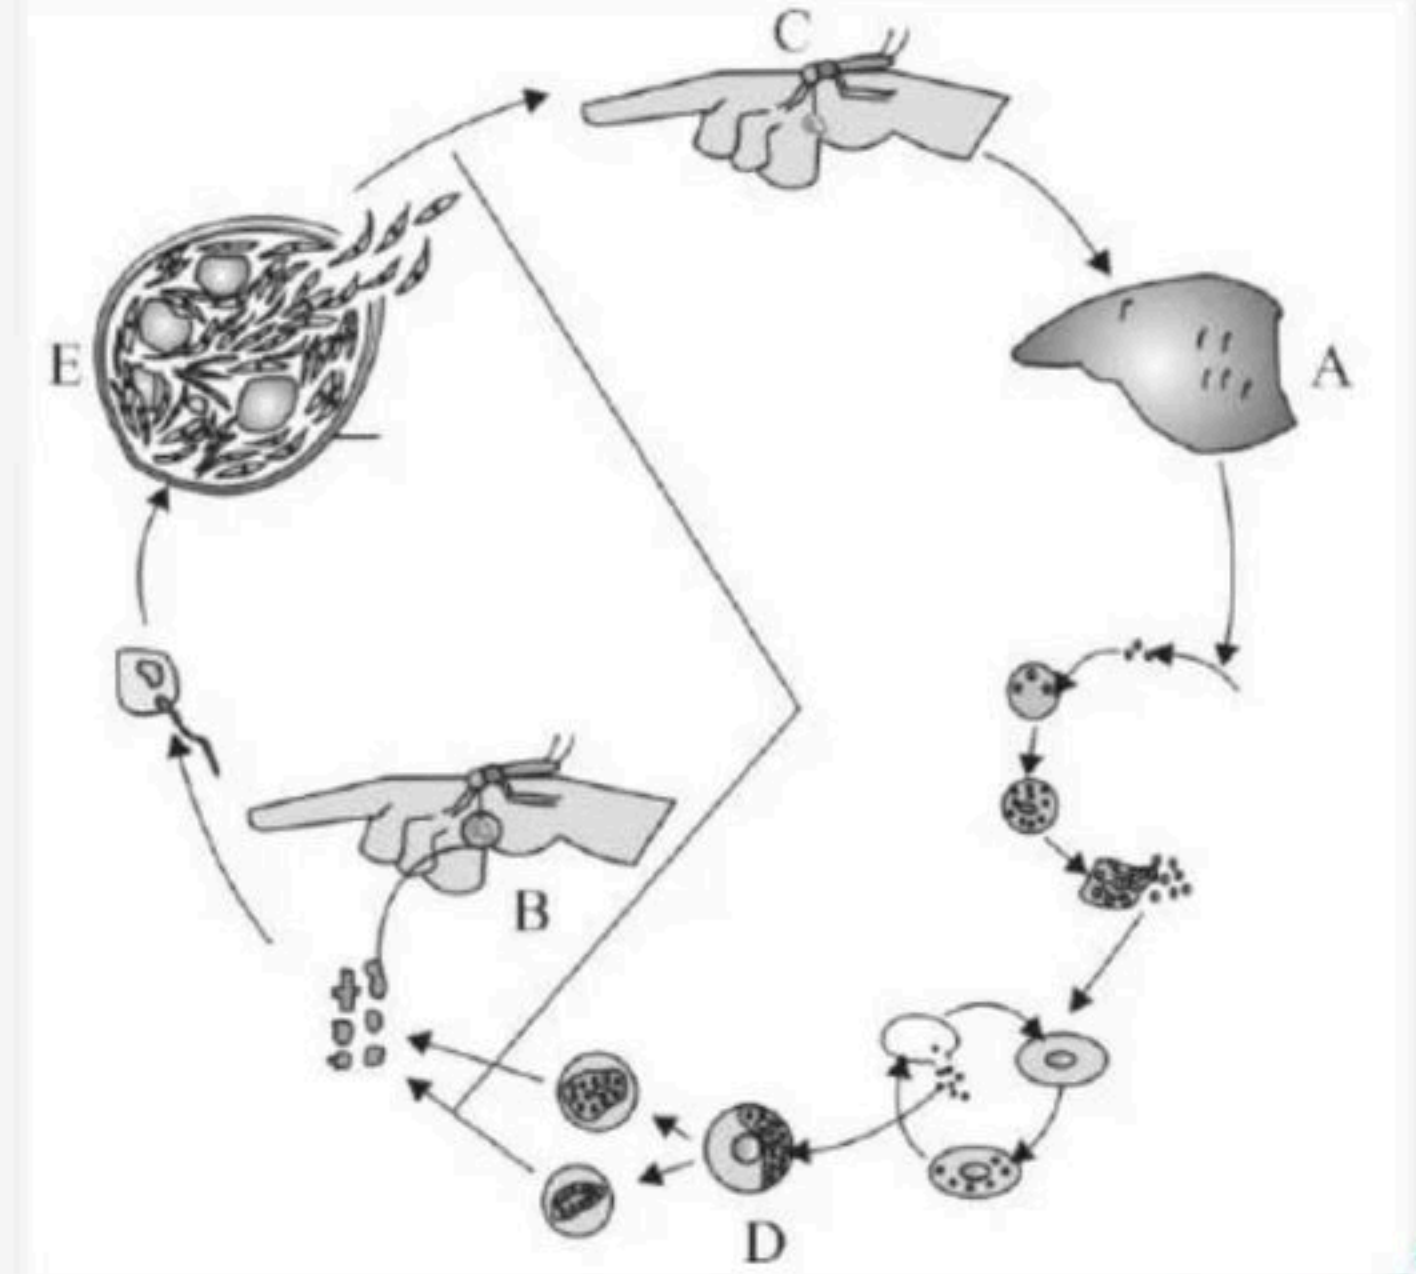

75. Identify the following structure labelled and .

- (1) A - Thymus, B - Lymphatic vessel
- (2) A - Thymus, B - Lymph nodes
- (3) A - Thyroid, B - Lymph nodes
- (4) A - Thyroid, B - Lymphatic vessel

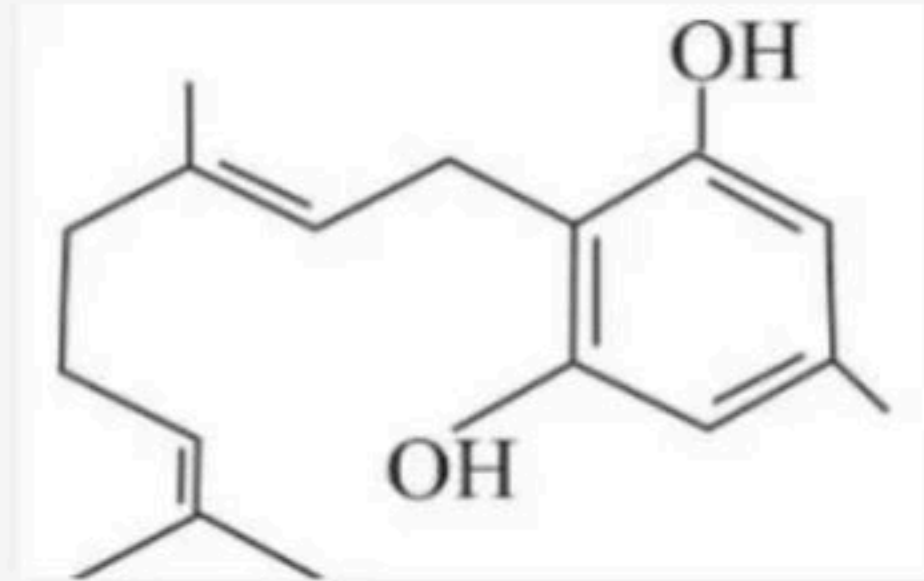

76. Identify the stage in which sporozite enters human

- (1) B
- (2) A
- (3) C
- (4) D

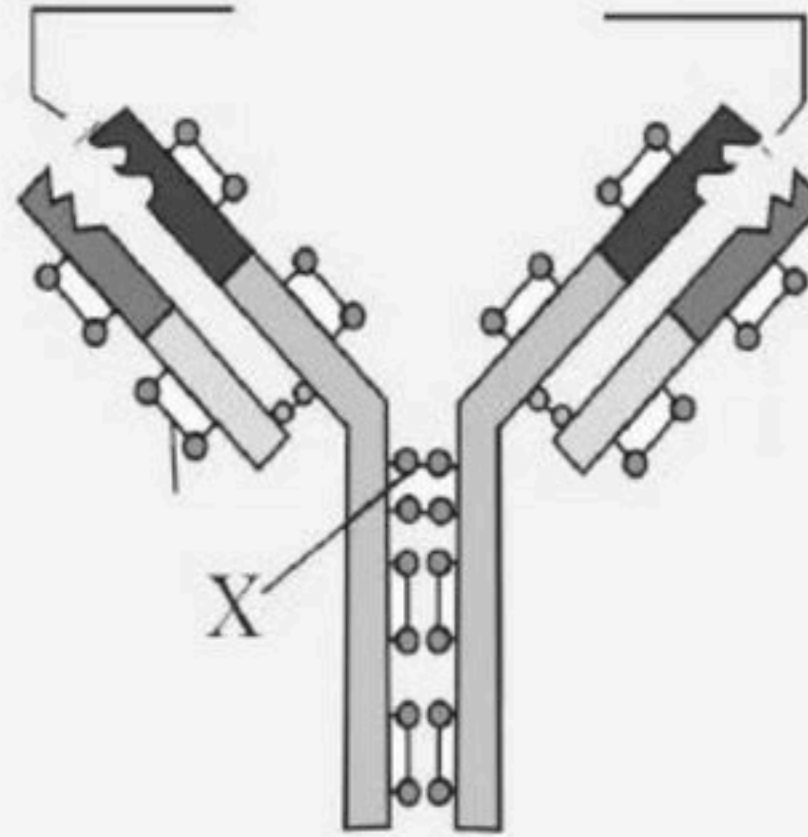

77. From which of the given plants is the drug whose skeletal structure is given below extracted?

- (1) Papaver somniferum
- (2) Atropa belladonna
- (3) Cannabis sativa
- (4) Erythroxylum coca

78. Identify the bond depicting ' X ' in the following diagram.

- (1) Hydrogen bond
- (2) Disulphide bond
- (3) Ester bond
- (4) Glycosidic bond

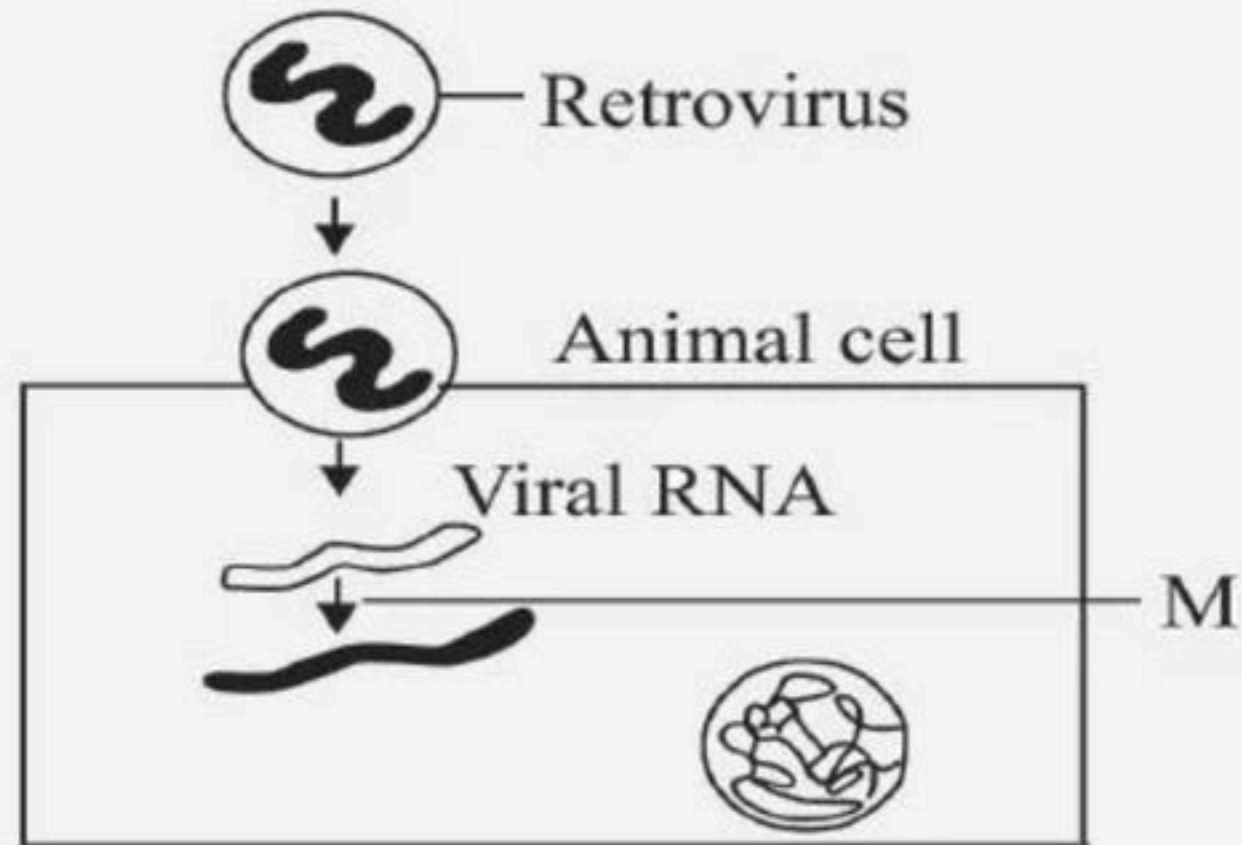

79. The plant depicted in the diagram produces the drug.

- (1) LSD
- (2) Smack
- (3) Coca
- (4) Ganja

80. Identify the enzyme that catalyses the step labelled as ' ' in the given schematic representation of replication of retrovirus

- (1) Reverse transcriptase
- (2) RNA polymerase
- (3) Recombinase
- (4) DNA ligase

81. Which kind of drug are obtained from given leaf of the plant?

- (1) Hashish
- (2) Charas
- (3) Ganja
- (4) All of these

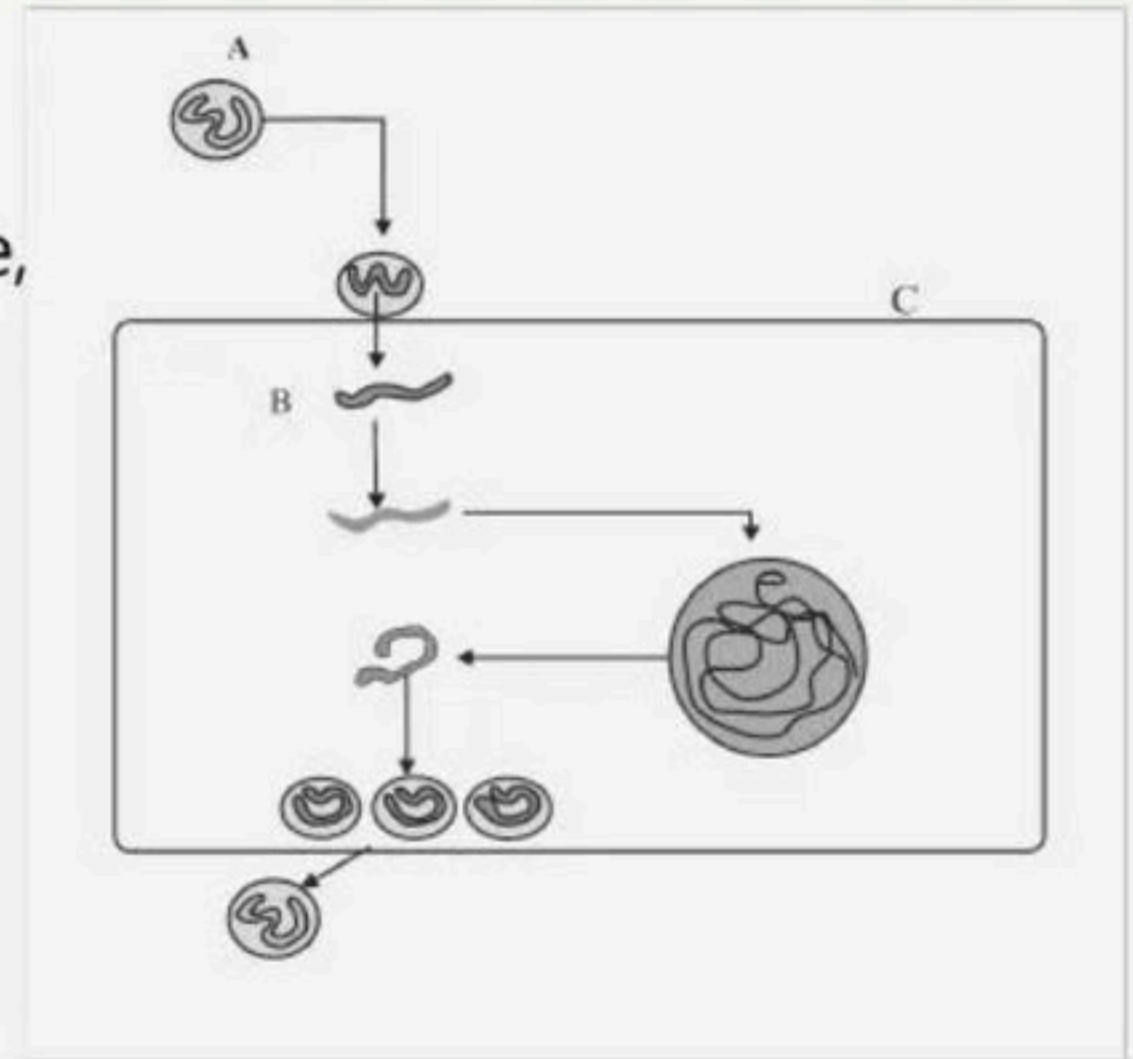

82. Identify A, B and C in the diagram.

(1) A - Retrovirus, B - Viral DNA produced by transcriptase,
C - Macrophage

(2) A - Retrovirus, B - Viral DNA produced by reverse
transcriptase, C - Macrophage

(3) A - Retrovirus, B - Viral DNA produced by
reverse transcriptase, C - RBC

(4) A - Retrovirus, B - Viral DNA produced by transcriptase C - RBC

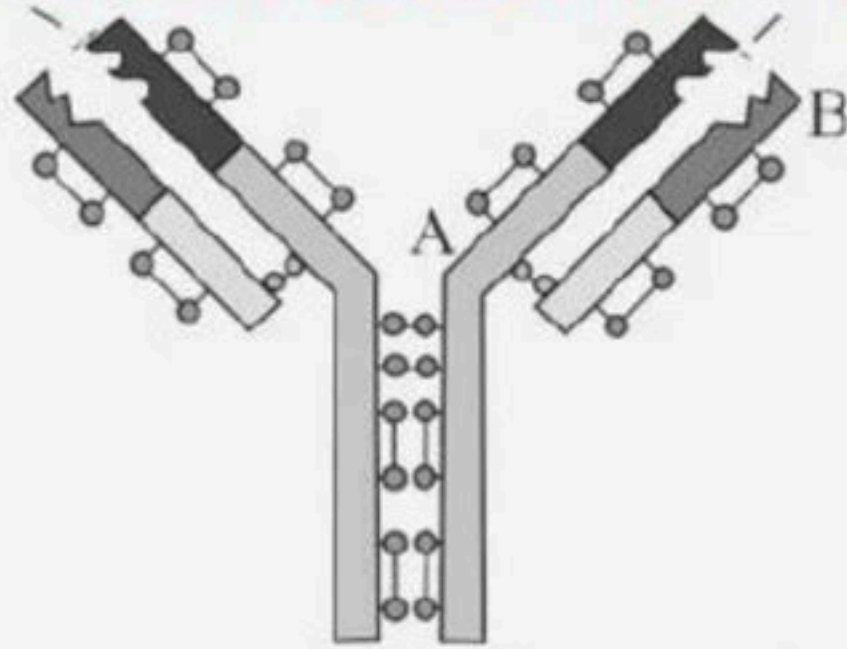

83. Identify the following.

- (1) Sporozoite in RBC
- (2) Sporozoite in salivary gland
- (3) Merozoite in salivary gland
- (4) Gametocyte in RBC

84. Identify A and B in the following figure.

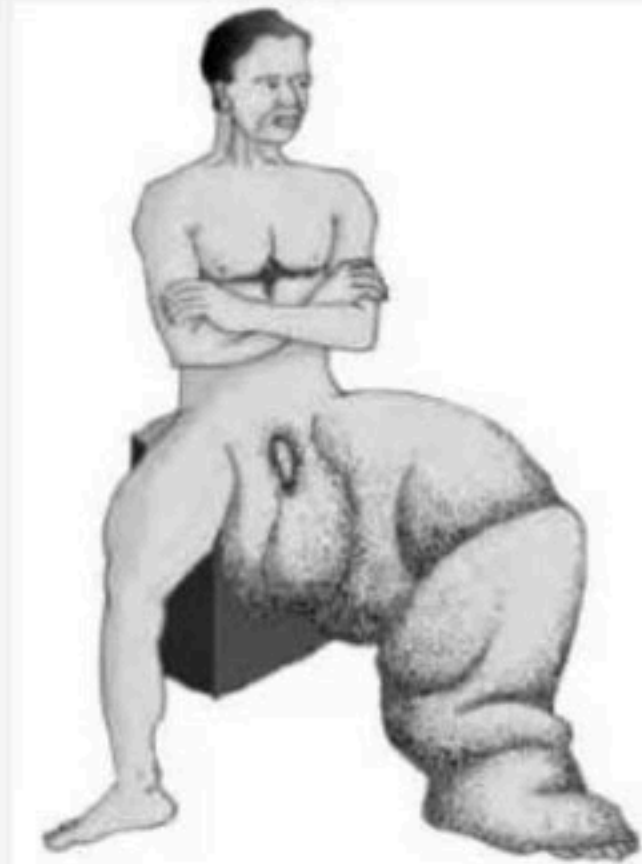

- (1) A - heavy chain, B - light chain
- (2) A - light chain, B - heavy chain
- (3) A - light chain, B - light chain
- (4) A - heavy chain, B - heavy chain

85. Which one is responsible for the disease from the given figure

- (1) Ringworm
- (2) Filarial worm
- (3) Amoebiasis
- (4) Plasmodium

86. Statement A : Dependence leads the patient to ignore all social norms in order to get sufficient funds to satiate his/her needs.

Statement B : Excessive doses of drugs may lead to coma and death due to respiratory failure, heart failure or cerebral hemorrhage

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

87. Statement A : Ringworms are generally grown in skin folds.

Statement B : Heat and moisture help ringworm to grow.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

88. Statement A : Interferons help eliminate viral infections

Statement B : Interferons released by infected cells reach

the nearly uninfected cells and make them resistant to viral infection.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

89. From the given statements, select the incorrect statement.

I. Health, for a long time, was considered as a state of body and mind where there was a balance of certain 'humors'.

II. This is what early Greeks like Hippocrates as well as Indian Ayurveda system of medicine asserted.

III. It was thought that persons with 'Brown bile' belonged to hot personality and would have fevers.

(1) I only

(2) II only

(3) III only

(4) All of them

90. Innate immunity consist of four types of barriers

- (1) Physiological, Physical
- (2) Cellular
- (3) Cytokine
- (4) All of them

91. Primary and secondary immune response are carried out with the help of two special types of types of cells .

They are ____

- (1) Macrophages, B-lymphocytes
- (2) B-lymphocytes and T-lymphocytes
- (3) Neutrophils and T-lymphocytes
- (4) Monocytes and T-lymphocytes

92. Identify the correct statement

I. T-cells themselves do not secrete antibodies but help IgB, IgM, IgE, IgG B cells produce them.

II. Antibodies in our body are ,

- (1) Only I is correct
- (2) Only II is correct
- (3) Both are correct
- (4) None are correct

93. Antivenom against snake poison contains:

- (1) Antigens
- (2) Antigen-antibody complexes
- (3) Antibodies
- (4) Enzymes

94. Transplantation of tissues/organs to save certain patients often fails due to rejection of such tissues/organs by the patient. Which type of immune response is responsible for such rejections?

- (1) Auto-immune response
- (2) Humoral immune response
- (3) Physiological immune response
- (4) Cell-mediated immune response

95. Ascaris normally inhabits in the lumen of

- (1) Stomach
- (2) Small intestine
- (3) Appendix
- (4) Large intestine

96. Out of the following diseases which caused due to bacterial infection?

a. Typhoid

b. Diphtheria

c. Cholera

d. Tuberculosis

(1) a & b only

(2) b & c only

(3) a, c & d only

(4) All of them

97. The fertilisation of gametocytes of Plasmodium takes place inside

- (1) Human RBC
- (2) Human Liver
- (3) Mosquito gut
- (4) Mosquito salivary gland

98. Wuchereria are transmitted to a healthy person through the ____

- (1) Bite by the female Culex vectors.
- (2) Bite by the female Anopheles vectors.
- (3) Bite by the female Aedes vectors.
- (4) Bite by the female house fly.

99. The malarial parasite requires two hosts ____ to complete its life cycle

- (1) Primary host - human and intermediate mosquitoes
- (2) Primary host- mosquitoes and intermediate human
- (3) Primary host- human male and intermediate human female
- (4) Primary host - Female mosquito and intermediate male mosquitoes

100. Haemozoin, a toxic substance is present in which cell?

- (1) Human RBC
- (2) Human WBC
- (3) Mosquito RBC
- (4) Mosquito WBC
