The Living World & Biological Classification

BIOLOGYLIVE1

Who I am?

1. Doctor by Profession and Teacher by passion.
2. 1000+ Students Score 360/360 in Biology Past Years.
3. NCERT Appreciated For Finding 80+ Error in Biology NCERT.
4. Govt. of India Nominated for Padma Bhushan NEET 2025.

Surprises Last Mein....!!!

NCERT Appreciated For Finding 80+ Error in Biology NCERT.

F.No. 1-18/DESM/2024-25

Department of Education in Science and Mathematics

Dated: 18.09.2024

Subject: Discrepancy in NCERT Class 11 Biology Textbook – RTI No.
NSERT/R/E/24/00434

Reference: Email Dated 09 September 2024 received at 22:21 p.m.

On page # 336 under section 22.2.7, the present statement “Our body has one pair of adrenal glands, one at the anterior part of each kidney” shall be corrected to “Our body has one pair of adrenal glands, one at above of each kidney”.

Thanks for pointing it out and the correct statement shall be reflected in the upcoming published book.

(Sunita Farkya)
Professor & Head

F.No. 1-18/DESM/2024-25

Department of Education in Science and Mathematics

Dated: 18.09.2024

Subject: Discrepancy in NCERT Class 11 Biology Textbook – RTI No.
NSERT/R/E/24/00439

Reference: Email Dated 11 September 2024 received at 13:50 p.m.

On page # 309 under section 20.3, the present statement “A single U-shaped bone called hyoid is present at the base of the buccal cavity and it is also included in the skull” shall be corrected to “A single U-shaped bone called hyoid is present at the base of the buccal cavity”.

Thanks for pointing it out and the correct statement shall be reflected in the upcoming published book.

(Sunita Farkya)
Professor & Head

Anmol Sharma
anmolsharma12385@gmail.com

F.No. 1-1/DESM/2024-25
Department of Education in Science and Mathematics

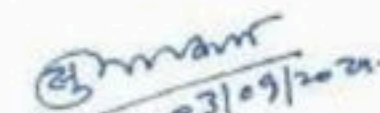

Dated: 03/09/2024

Subject: Discrepancy in NCERT Class 11 Biology Textbook – RTI No.
NSERT/R/E/24/00406.

Thanks for pointing out the issue concerning “a discrepancy in the NCERT Class 11 Biology textbook, specifically in Chapter “Cell: The Unit of Life,” Under the sections “An Overview of Cell” and “Prokaryotic Cells.”

The sentence “The fluid matrix filling the cell is the cytoplasm” shall be corrected to “The semi-fluid matrix filling the cell is the cytoplasm” on page number 90.

We have taken note of the point raised and the correction will reflect in the upcoming updated issue of the book.

(Sunita Farkya)

Sub: Information under RTI Act 2005 regarding.

Kindly refer to your RTI Registration Number NSERT/R/T/24/00099 dated 04.07.2024. This application has been received to this Department on 08.08.2024 through RTI Cell. Reply of your query is given below:

S. No.	Question	Reply
1	Query No. 1	Thanks for pointing out the issues concerning the topic of respiration in plants specifically under the sub-topic Electron Transport System (ETS). We have taken note of the point raised and the correction will reflect in the upcoming updated issue of the book.

In case you are not satisfied with the reply, you may appeal to the Appellate Authority. The address of the Appellate Authority is as follows:

Joint Director
NCERT
Sri Aurobindo Marg
New Delhi – 110016

12/08/24

Brief write up/citation on the work done by this person :

"Anmol Sharma's Contribution to NCERT Textbook Accuracy"

Anmol Sharma, a meticulous scholar, has made an outstanding contribution to the field of education and literature by identifying and correcting over 50 conceptual errors in the NCERT Biology textbooks for Classes 11th and 12th. These textbooks serve as the foundation for students preparing for the NEET exam, a highly competitive medical entrance examination in India.

Anmol's efforts have been acknowledged by the National Council of Educational Research and Training (NCERT). His keen attention to detail and dedication towards enhancing the accuracy of these key educational resources demonstrate his unwavering commitment to ensuring that students receive correct and precise knowledge.

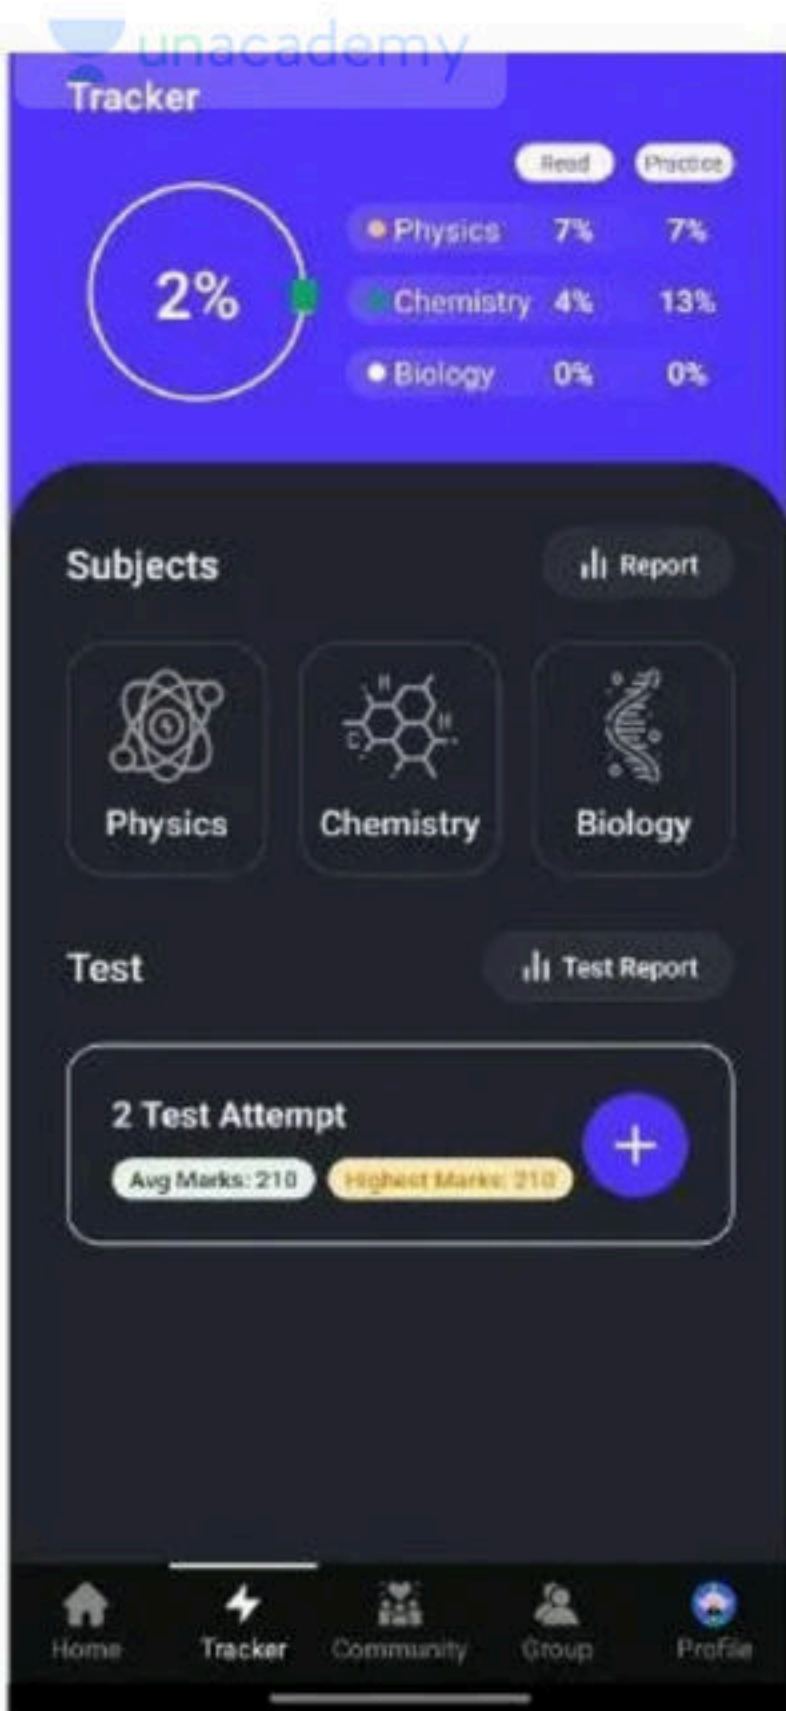

NCERT, in response to Anmol's findings, has not only accepted the corrections but also assured that his name will be featured as a contributor in the upcoming updated editions of these textbooks. This exceptional initiative showcases his dedication to improving the quality of education for future generations.

Given the significant impact of his work on the educational landscape, Anmol Sharma's nomination for the Padma Bhushan in the field of Literature and Education is well-deserved. His contributions underscore the importance of accuracy and diligence in educational content, ensuring that students preparing for critical exams are equipped with the most reliable resources.

Significant contribution made by this person :

Govt. of India Nominated for Padma Bhushan NEET 2025.

CRACK NEET 2025

The Living World & Biological Classification

By : Anmol Sharma Sir

Title: The living world & Biological classification

1. How many matching are correct according cell wall:

- | | |
|--------------|-------------------------|
| (a) Monera | - Present |
| (b) Protista | - Present in all member |
| (c) Fungi | - Present with chitin |
| (d) Animalia | - Absent |
- (1) Two (2) Three
(3) One (4) Four

2. On the basis of nuclear membrane which of the following matching is incorrect:

- | | |
|--------------|-----------|
| (1) Monera | - Absent |
| (2) Protista | - Absent |
| (3) Fungi | - Present |
| (4) Animalia | - Present |

3. Which of the following statements is correct?

- (1) Lichens do not grow in polluted areas
(2) Algal component of lichens is called mycobiont
(3) Fungal component of lichens is called phycobiont
(4) Lichen are not good pollution indicators.

4. Which of the following statements is incorrect:

- (1) Viruses are obligate parasites
(2) Infective constituent in viruses is the protein coat
(3) Prions consist of abnormally folded proteins
(4) Viroids lack a protein coat

5. Which of the following is incorrectly matched:

Common name	Class
(1) Housefly	Insecta
(2) Mango	Dicotyledonae
(3) Gorilla	Primata
(4) Tiger	Mammalia

6. Select the incorrect statement :

- (1) Alsatians belong to family canidae
(2) Cats belong to family Felidae
(3) Lion belong to genus *lio*
(4) All of these

7. Which of the following option correct for families:

- (1) Families are charaterised on basis of vegetative characteristics
(2) Families are charaterised on basis of reproductive characteristics
(3) Families are group of related genera
(4) All of these

8. *Homo*, *Mangifera* and *Triticum* are

- (1) Species (2) Genus
(3) Family (4) Order

9. Find correct option regarding this diagram:

- (a) Colour of this organism appear as yellow, brown blue and red but not green.
(b) Releases toxins that kills fishes and other marine animal
(c) Spores posses true wall
(d) It is autotrophic protist

- (1) a, b (2) c
(3) a, b and c (4) d

10. Given below are two statements :

Statement I : The boundaries of the kingdom protista are not welldefined

Statement II : Most protozoans are saprophytic and absorb organic matter from dead substance.

In the light of the above statements, choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
(2) Statement I is correct but Statement II is incorrect
(3) Statement I is incorrect but Statement II is correct
(4) Both Statement I and Statement II are correct.

11. Given below are two statements one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Kingdom Protista forms a link with the other kingdoms.

Title: The living world & Biological classification

Reason (R) : It is believed that Protista evolved from the kingdom Monera and is the ancestor of multicellular eukaryotes.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

12. Number of statement which are correct for given both organism:

- (a) Both belongs to kingdom protista
- (b) Both belongs to kingdom monera
- (c) Both are unicellular organism
- (d) Both have motile structure cilia

- (1) 1
- (2) 2
- (3) 4
- (4) 3

13. Which of the following are a type of Archaeobacteria :

- (1) Halophiles
- (2) Thermoacidophiles
- (3) Methanogens
- (4) All of these

14. The two kingdom classification was given by :

- (1) Carolus Linnaeus
- (2) Copeland
- (3) Whittaker
- (4) Haeckel

15. In five kingdom classification system. The five kingdom are :

- (1) Monera, Protista, Fungi, Plantae, Animalia
- (2) Monera, Protozoa, Fungi, Plantae, Animalia
- (3) Cyanobacteria, Protista, Fungi, Plantae, Animalia
- (4) Monera, Protista, Fungi, Angiosperm, Animalia

16. The main criteria for five Kingdom of classification includes:

- (1) Mode of nutrition, reproduction
- (2) Cell structure and body organisation
- (3) Phylogenetic relationship
- (4) All of these

17. Bacteria which play a great role in recycling nutrient like nitrogen, phosphorous, iron and sulphur are:

- (1) Anoxygenic photosyntheter
- (2) Blue green algae
- (3) Chemosynthetic autotrophic
- (4) Photosynthetic autotrophic

18. Which of the following is incorrect about chrysophytes:

- (1) Chrysophytes includes diatoms and golden Algae
- (2) Chrysophytes are found in freshwater as well as in marine water
- (3) They are microscopic and float passively in water current
- (4) Most of them heterotrophic

19. Euglenoids have protein rich layer instead of cell wall this layer is called:

- (1) Pellicle
- (2) Chitin
- (3) Cellulose
- (4) Pectin

20. Which of the following is correct about slime moulds:

- (1) During unfavourable condition slimemoulds form aggregation called plasmodium
- (2) During favourable condition the plasmodium differentiate and form fruiting bodies bearing spore at their tip
- (3) Spores are dispersed by air current
- (4) All of these

21. Assertion: *Mangifera indica* and *Triticum aestivum* belongs to same division.

Title: The living world & Biological classification

Reason: *Homo sapiens* and *Musca domestica* belongs to same phylum

- (1) If both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- (2) If both Assertion and Reason are true but Reason is not the correct explanation of Assertion.
- (3) If Assertion is true but Reason is false.
- (4) If both Assertion and Reason are false.

22. Match column I with column II and select the correct option :

Column I	Column II
a. <i>Panthera</i>	i. Mango
b. <i>Solanum</i>	ii. Wheat
c. <i>Triticum</i>	iii. Makoi
d. <i>Mangifera</i>	iv. Leopard
(1) a-iv, b-ii, c-iii, d-i	(2) a-ii, b-i, c-iv, d-iii
(3) a-ii, b-i, c-iii, d-iv	(4) a-iv, b-iii, c-ii, d-i

23. What is correct :

- (a) Genera is aggregate of closely related species.
- (b) Potato and Brinjal belong to same genus.
- (c) Mango and wheat belong to different division.
- (d) Each genus may have one or more than one specific epithets.

- (1) b, d
- (2) a, b
- (3) c, d
- (4) a, b, d

24. Select the correct statement in the following universal rules of Nomenclature :

- a. Biological names are generally in Latin and written in italics. They are Latinised or derived from Latin irrespective of their origin.
- b. The first word in a biological name represents the genus while the second component denotes the specific epithet.
- c. Both the words in a biological name, when handwritten, are separately underlined, or printed in italics to indicate their Latin origin.
- d. The first word denoting the genus starts with a capital letter while the specific epithet starts with a small letter.

- (1) a, b are correct
- (2) a, c and d are correct
- (3) a, b, c and d all are correct
- (4) a, b and c are correct

25. There are many species of *Panthera* genus, which of the following is not the species of *Panthera* genus:

- (1) *leo*
- (2) *nigram*
- (3) *tigris*
- (4) *pardus*

26. Which of the following process is/are basics to taxonomy:

- (1) Identification
- (2) Classification
- (3) Nomenclature
- (4) All of these

27. Order Carnivora includes family:

- (1) Felidae
- (2) Canidae
- (3) 1 and 2 both
- (4) None

28. Which of the following not correctly match for *Mangifera indica*

- (1) Biological Name – *Mangifera indica*
- (2) Family – Anacardiaceae
- (3) Division – Angiospermae
- (4) Order – Poales

29. Founder of binomial nomenclature was:

- (1) Linnaeus
- (2) Mendel
- (3) Darwin
- (4) Lamarck

30. Select the correctly written zoological name:

- (1) *Solanum nigrum*
- (2) *Panthera tigris*
- (3) *Solanum melongena*
- (4) All of these

31. Most names in the biological nomenclature of living organisms are taken from which language?

- (1) Hindi
- (2) Latin
- (3) German
- (4) Greek

32. Branch of biology dealing with classification of living organism and their relationship is :

- (1) Systematics
- (2) Taxa
- (3) Ecology
- (4) Genetics

33. The plants of wheat are belongs to :

- (1) Family poaceae
- (2) Order poales

Title: The living world & Biological classification

(3) Both 1 and 2 (4) Class dicotyledonae

34. Which of the following is/are correct:

- A. Bacteria are most abundant microorganism
- B. Bacteria are individually show most extensive metabolic diversity
- C. Bacteria are very simple in structure but complex in behaviour
- D. Bacteria may be photosynthetic autotrophic or chemosynthetic autotrophic

(1) A,B only (2) A, C and D only

(3) A,D only (4) A,B,C and D

35. Earlier classification systems included bacteria, blue green algae, fungi, mosses, ferns, gymnosperm and the angiosperms under plants.

Which character are taken for this classification :

- (1) Cell membrane (2) Cell wall
- (3) Mode of nutrition (4) Type of reproduction

36. In five kingdom classification system which kingdom are unicellular eukaryotes :

- (1) Protista (2) Fungi
- (3) Protozoa (4) Monera

37. In which kingdom autotrophic mode of nutrition are never occur :

- (1) Monera (2) Protista
- (3) Fungi (4) Plantae

38. How many matching are correct :

- a. Spherical – Coccus
- b. Rod shaped – Bacillus
- c. Comma shaped – Vibrium
- d. Spiral – Vibrio

(1) 3 (2) 2

(3) 4 (4) 5

39. Which taxonomic category are real basic unit of classifications :

- (1) Family (2) Genus
- (3) Species (4) Order

40. Which of the followings are not specific epithets :

(1) *indica* (2) *tuberosum*

(3) *Solanum* (4) *leo*

41. Cats are included in which genus :

- (1) *Panthera* (2) *Felis*
- (3) *Homo* (4) All of these

42. The three different genera *Solanum*, *Petunia* and *Datura* are placed in which family :

- (1) Solanaceae (2) Brassicaceae
- (3) Convolvulaceae (4) All of these

43. The plants of wheat are belongs to :

- (1) Family poacea (2) Order Sapindales
- (3) Class Dicotyledonae (4) All of these

44. How many matching are correct according to different organisms and their genus :

- a. Man – *Homo*
- b. Housefly – *Musca*
- c. Mango – *Mangifera*
- d. Wheat – *Triticum*

(1) 3 (2) 4

(3) 1 (4) 2

45. Arrange the following in ascending order of similar characteristic.

- I. Family II. Genus
- III. Class IV. Species
- V. Order

- (1) Class < Family < Genus < Species
- (2) Family < Class < Genus < Species
- (3) Species < Order < Family < Class
- (4) Class < Genus < Species < Family

46. Classes comprising animals like fishes, amphibians, reptiles, birds along with mammals constitute the next higher category called as :

- (1) Division (2) Phylum
- (3) Kingdom (4) All of these

47. Which of the following is correct :

- (1) As we go higher from species to kingdom, the number of common characteristics goes on increasing

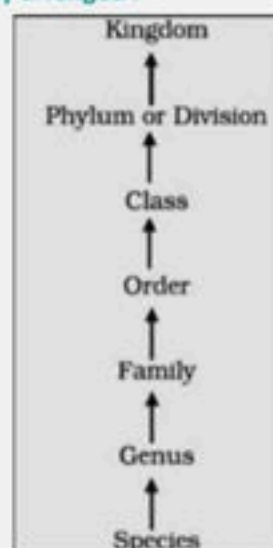

Title: The living world & Biological classification

(2) As we go lower from kingdom to species the number of common characteristics goes on decreasing

(3) Lower the taxa, less are the characteristics that the members within the taxon share.

(4) Higher the category, greater is the difficulty of determining the relationship to other taxa at the same level

48. Taxonomic categories showing hierarchical arrangement is given below. Can you tell in which order are they arranged :

- (1) Haphazard order (2) Odd order
(3) Descending order (4) Ascending order

49. Dikaryon formation is characteristic of:

- (1) Phycomycetes and Basidiomycetes
(2) Ascomycetes and basidiomycetes
(3) Ascomycetes and phycomycetes
(4) Phycomycetes and deuteromycetes

50. Match the column I and column II and choose correct answer:

Column I	Column II
A. Phycomycetes	i. <i>Agaricus</i> , <i>Ustilago</i>
B. Ascomycetes	ii. <i>Mucor</i> , <i>Rhizopus</i>
C. Basidiomycetes	iii. <i>Alternaria</i> , <i>Colletotricum</i>
D. Deuteromycetes	iv. <i>Penicillium</i> , <i>Claviceps</i>

- (1) A - ii, B - iv, C - i, D - iii
(2) A - i, B - iii, C - ii, D - iv
(3) A - iv, B - i, C - ii, D - iii
(4) A - ii, B - iv, C - iii, D - i

51. Asexual spore are produced exogenously inA..... and endogenously inB.....:

- (1) A - Ascomycetes, B - Phycomycetes
(2) A - Basidiomycetes, B - Ascomycetes
(3) A - Ascomycetes, B - Basidiomycetes
(4) A - Basidiomycetes, B - Phycomycetes

52. Many drawbacks was in two kingdom classifications system, because this system did not distinguish between which :

- (1) Eukaryotes and Prokaryotes
(2) Unicellular and multicellular organisms
(3) Photosynthetic and non photosynthetic
(4) All of these

53. In six kingdom classifications which kingdom is divided into two domains :

- (1) Protista (2) Monera
(3) Fungi (4) Plantae

54. Red tide is caused by

- (1) Anabaena (2) Euglena
(3) Gonyaulax (4) Amoeba

55. Bacteriophages (viruses that infect bacteria) are usually :

- (1) Circular RNA virus
(2) Single stranded RNA virus
(3) Single stranded DNA virus
(4) Double stranded DNA viruses.

56. Which is the following is true about basidiomycetes:

- (a) Also called sac fungi
(b) Sex organs absent, but plasmogamy is brought about by fusion of two vegetative cells of different genotypes
(c) Karyogamy and meiosis takes place outside the basidium

Title: The living world & Biological classification

(d) Basidiospores are produced exogenously

(1) a and b are correct

(2) b and d are correct

(3) a, b, c and d all are correct

(4) a, b and d are correct

57. Match the different types of spores listed under column-I with the names of the organisms given under column-II

Column-I (Spores) Column-II (Organisms)

a. Ascospores

f. Ustilago

b. Basidiospores

g. Aspergillus

c. Zygosporangia

h. Rhizopus

d. Conidia

i. Penicillium

(1) a-g, b-f, c-h, d-i

(2) a-g, b-h, c-f, d-i

(3) a-h, b-i, c-g, d-f

(4) a-f, b-h, c-g, d-i

58. Fungi reproduce by only asexual and vegetative methods in

(1) Phycomycetes

(2) Ascomycetes

(3) Basidiomycetes

(4) Deuteromycetes

59. How many matchings are correct :

a. Extreme salty areas – Methanogens

b. Hot springs – Thermoacidophiles

c. Marshy areas – Halophiles

d. Methanogens – Ruminant animals

(1) 3

(2) 4

(3) 2

(4) 1

60. Which of the following statements are incorrect about cyanobacteria :

(1) They have chlorophyll 'a'

(2) They often forms Blooms in polluted water bodies

(3) They are called chemosynthetic autotrophs

(4) None of these

61. The group of organisms which are helpful in making curd from milk, production of antibiotics, fixing nitrogen in legume roots. This group of organisms are :

(1) Heterotrophic bacteria

(2) Archaeobacteria

(3) Cyanobacteria

(4) Chemosynthetic autotrophic bacteria

62. Which of the following are bacterial disease :

(1) Small pox

(2) Cholera

(3) Mumps

(4) All of these

63. Viroids are made up of

(1) Low molecular weights of DNA

(2) High molecular weights of RNA

(3) Low molecular weights of RNA

(4) High molecular weights of DNA

64. Fungal cell wall is composed of :

(1) Chitin and polysaccharides

(2) Cellulose and polysaccharides

(3) Lignin

(4) Both 1 and 3

65. Mycorrhiza is :

(1) Symbiotic association of a soil fungus and roots of higher plants

(2) Parasitic association between a fungus and roots of seed plants

(3) Saprophytic association between a fungus and root of seed plants

(4) Symbiotic association between an alga and root of seed plants.

66. Plant families like convolvulaceae, solanaceae are included in which order :

(1) Poales

(2) Poaceae

(3) Polymoniales

(4) Sapindales

67. Select the correct sequence of various taxonomic categories from lower to higher rank :

(1) Species → Genus → Family → Order → Class → Phylum

(2) Species → Genus → Family → Order → Division → Class

(3) Division → Class → Order → Family → Genus → Species

Title: The living world & Biological classification

(4) Phylum → Order → Class → Family → Genus → Species

68. Assertion: Most fungi are saprophytic.

Reason: They absorb organic matter from dead substance.

(1) If both Assertion and Reason are true and Reason is the correct explanation of Assertion.

(2) If both Assertion and Reason are true but Reason is not the correct explanation of Assertion.

(3) If Assertion is true but Reason is false.

(4) If both Assertion and Reason are false.

69. In class Ascomycetes the mycelium is:

(1) Coenocytic and aseptate

(2) Septate

(3) Multinucleated and aseptate

(4) 1 and 3 both

70. Which component of lichen prepared/ synthesized food:

(1) Mycobiont

(2) Phycobiont

(3) Fungi

(4) All of these

71. According to given figure which of the following option is correct :

(1) A – Anabaena,

B – Mucilagenous Sheath

(2) A – Nostoc, B – Heterocyst

(3) A – Oscillatoria, B – Heterocyst

(4) A – Colonial algae, B – Mucilagenous Sheath

72. On the basis of body organisation. How many matching is incorrect :

(a) Fungi Only cellular

(b) Protista Cellular

(c) Plantae Only tissue

(d) Monera Tissue

(1) One

(2) Two

(3) Three

(4) Four

73. According to five kingdom classification. Which of the matching is correct:

(1) Chlorella

- Unicellular protist without

cell wall

(2) Paramoecium - Unicellular protist with cell wall

(3) Chlamydomonas - Unicellular protist with cell wall

(4) All of these

74. Select the wrong statements :

(1) Cell wall is present in members of fungi and plantae

(2) Mushroom belong to basidiomycetes

(3) Pseudopodia are locomotory and feeding structures in sporozoans.

(4) None of these

75. Select the wrong statements :

(1) Diatoms are chief producers in the ocean

(2) Diatoms are microscopic and float passively in water

(3) The walls of diatoms are easily destructible

(4) 'Diatomaceous earth' is formed by the cell wall of diatoms.

76. Which one of the following is not a criterion for classification of fungi?

(1) Mode of spore formation

(2) Fruiting body

(3) Morphology of mycelium

(4) Mode of nutrition

77. Which of the following statements is correct?

(1) Some of the organisms can fix atmospheric nitrogen in specialized cells called sheath cells

(2) Fusion of two cells is called karyogamy

(3) Fusion of protoplasts between two motile or nonmotile gametes is called plasmogamy

(4) Organism that depend on living plants are called saprophytes.

78. Which kingdom forms a link with the others dealing with plants, animals and fungi :

(1) Monera (2) Plantae

(3) Protista (4) Animalia

Title: The living world & Biological classification

79. In which organisms the cell walls form two thin overlapping shells, which fit together as in a soap box:

- (1) Slime moulds (2) Protozoans
(3) Diatoms (4) Euglenoids

80. How many statements are correct with reference to sporozoans

- (a) All are parasite
(b) Locomotory structure present
(c) Malaria causing agent belongs to sporozoans
(d) Nuclear membrane are present

- (1) 1 (2) 4
(3) 3 (4) 2

81. Bladderwort and venus fly trap are examples of

- (1) Partially heterotrophic plants
(2) Parasitic plants
(3) Totally heterotrophic plants
(4) More than one options are correct

82. How many statements are correct according to kingdom Animalia

- a. They directly or indirectly depend on plants for food.
b. They digest their food in an internal cavity
c. They store food reserves as glycogen or fat
d. Some of them are capable of locomotion
e. Their mode of nutrition is holozoic

- (1) 4 (2) 3
(3) 2 (4) 5

83. Viruses could be crystallised and crystals are made up of

- (1) Largely of nucleic acids
(2) Largely of protein
(3) Largely of carbohydrates
(4) Largely of carbohydrates and protein both

84. In the given below examples. How many are viral diseases in animals :

Common cold, mumps, typhoid, cholera, influenza, herpes, tetanus, AIDS

- (1) 6 (2) 5
(3) 4 (4) 3

85. The viruses contains

- (1) Only RNA (2) Only DNA
(3) Either RNA or DNA (4) Both RNA and DNA

86. Which of the following organism are insectivorous:

- (1) *Cuscuta* and *Albugo*
(2) Bladderwort and *Albugo*
(3) Bladderwort and venus fly trap
(4) All of these

87. Which of the following is incorrect about basidiomycetes:

- (1) Sexual reproduction take place by fusion of two vegetative or somatic cell of different strain or genotype
(2) Plasmogamy, Karyogamy and meiosis takes place in basidium
(3) Four haploid basidiospore are exogenously produced on basidium
(4) Asexual spore generally not found

88. Correct sequence of sexual cycle in fungi is:

- (1) Karyogamy → Plasmogamy → meiosis
(2) Plasmogamy → Karyogamy → meiosis
(3) Plasmogamy → meiosis → Karyogamy
(4) meiosis → Plasmogamy → Karyogamy

89. How many of the following statements are correct with reference to given diagram of organism :

- a. This organism is prokaryote
b. Nuclear membrane present
c. They are hetrotropic in nature
d. It is comma shaped

- (1) 4 (2) 3
(3) 2 (4) 1

Title: The living world & Biological classification

90. An infectious agent which are similar in size to the viruses

- (1) Viroids (2) Bacteria
(3) Prions (4) Mycoplasma

91. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion: Deuteromycetes commonly known as imperfect fungi.

Reason: In deuteromycetes only the Asexual or vegetative phase are known.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
(2) (A) is true but (R) is false
(3) (A) is false but (R) is true
(4) Both (A) and (R) are true and (R) is the correct explanation of (A)

92. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion: Cynobacteria have chlorophyll 'a' similar to green plant and are photosynthetic autotrophs.

Reason: Some cynobacteria can fix atomospheric nitrogen in specialised cell called heterocyst.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
(2) (A) is true but (R) is false
(3) (A) is false but (R) is true
(4) Both (A) and (R) are true and (R) is the correct explanation of (A)

93. Mad cow disease in cattle caused by an agent which has:

- (1) Polyhedrally arranged protein
(2) Smaller size than bacteria

(3) Abnormally folded protein

(4) 2 and 3

94. Which of the following is a member of ascomycetes

- (1) Trichoderma (2) Morels
(3) Rust and smut (4) Both 1 and 3

95. Mycelium of *Neurospora* are

- (1) Branched and septate (2) Coenocytic
(3) Aseptate (4) Septate and coenocytic

96. By using which characters the plants classify into Herbs, Shrubs and Trees :

- (1) Simple anatomical characters
(2) Simple morphological characters
(3) Simple reproductive characters
(4) All of these

97. Which of the following organisms group are not included in the five kingdom system of classification

- (1) Chrysophytes, viroids, lichens
(2) Bacteriophages, Dinoflagellates, lichens
(3) Bacteriophages, viroids, Lichens
(4) Viroids, slime moulds, fungi

98. Statement- I: Archaeobacteria is a type of bacteriophage

Statement-II: Bactriophase is member of kingdom monera

- (1) Statement (I) correct & (II) incorrect
(2) Statement (I) & (II) both are correct
(3) Statement (II) correct & (I) incorrect
(4) Both statement are incorrect

99. Match the following column I and column II :

Column I	Column II
(i) Mango	(a) <i>Felis</i>
(ii) Leopard	(b) <i>Mangifera indica</i>
(iii) Tiger	(c) <i>Panthera pardus</i>
(iv) Cat	(d) <i>Panthera tigris</i>
(1) i-b, ii-c, iii-d, iv-a	(2) i-a, ii-c, iii-d, iv-b
(3) i-c, ii-b, iii-d, iv-a	(4) i-c, ii-b, iii-a, iv-d

Title: The living world & Biological classification

100. The process by which anything is grouped into convenient categories based on easily observable characters is :

- | | |
|----------------------|--------------------|
| (1) Nomenclature | (2) Identification |
| (3) Characterisation | (4) Classification |

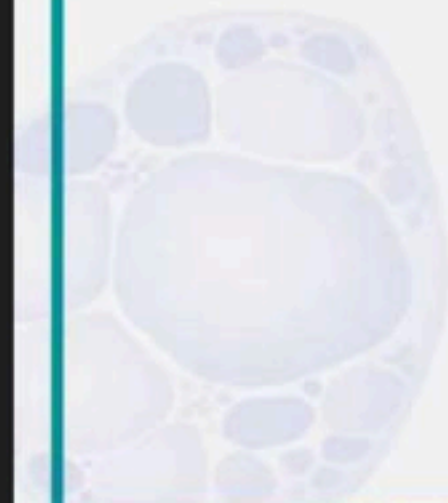

Anmol Sharma Sir

Anmol Sharma Sir

Anmol Sharma Sir

Anmol Sharma Sir

Anmol Sharma Sir

1. How many matching are correct according cell wall:

- | | | |
|--------------|---|-----------------------|
| (a) Monera | - | Present |
| (b) Protista | - | Present in all member |
| (c) Fungi | - | Present with chitin |
| (d) Animalia | - | Absent |
- (1) Two (2) Three
(3) One (4) Four

2. On the basis of nuclear membrane which of the following matching is incorrect:

(1) Monera	-	Absent
(2) Protista	-	Absent
(3) Fungi	-	Present
(4) Animalia	-	Present

3. Which of the following statements is correct?

- (1) Lichens do not grow in polluted areas
- (2) Algal component of lichens is called mycobiont
- (3) Fungal component of lichens is called phycobiont
- (4) Lichen are not good pollution indicators.

4. Which of the following statements is incorrect:

- (1) Viruses are obligate parasites
- (2) Infective constituent in viruses is the protein coat
- (3) Prions consist of abnormally folded proteins
- (4) Viroids lack a protein coat

5. Which of the following is incorrectly matched :

Common name

Class

(1) Housefly

Insecta

(2) Mango

Dicotyledonae

(3) Gorilla

Primata

(4) Tiger

Mammalia

6. Select the incorrect statement :

- (1) Alsatians belong to family canidae
- (2) Cats belong to family Felidae
- (3) Lion belong to genus *lio*
- (4) All of these

7. Which of the following option correct for families:

- (1) Families are characterised on basis of vegetative characteristics
- (2) Families are characterised on basis of reproductive characteristics
- (3) Families are group of related genera
- (4) All of these

8. *Homo*, *Mangifera* and *Triticum* are

- (1) Species
- (2) Genus
- (3) Family
- (4) Order

9. Find correct option regarding this diagram:

(a) Colour of this organism appear as yellow, brown blue and red but not green.

(b) Releases toxins that kills fishes and other marine animal

(c) Spores posses true wall

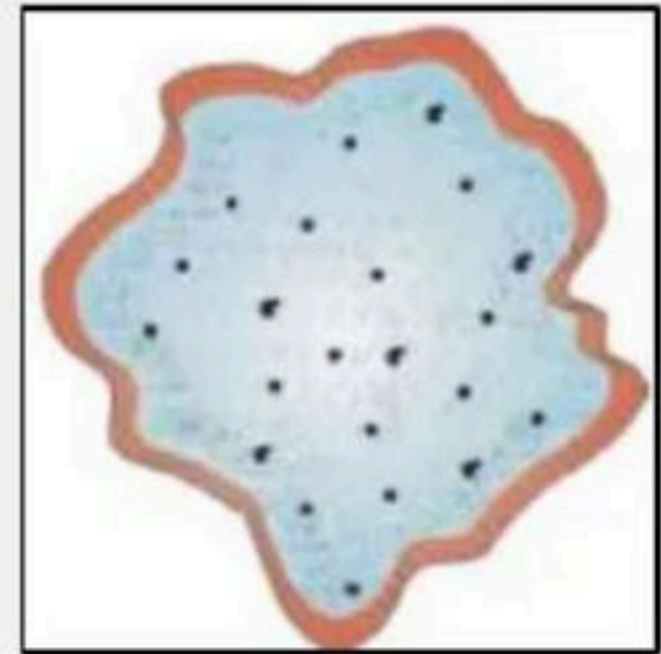

(d) It is autotrophic protist

(1) a, b

(2) c

(3) a, b and c

(4) d

10. Given below are two statements :

Statement I : The boundaries of the kingdom protista are not welldefined

Statement II : Most protozoans are saprophytic and absorb organic matter from dead substance.

In the light of the above statements, choose the correct answer from the options given below

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct.

11. Given below are two statements one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A) : Kingdom Protista forms a link with the other kingdoms.

Reason (R) : It is believed that Protista evolved from the kingdom Monera and is the ancestor of multicellular eukaryotes.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (2) (A) is correct but (R) is not correct
- (3) (A) is not correct but (R) is correct
- (4) Both (A) and (R) are correct and (R) is the correct explanation of (A)

12. Number of statement which are correct for given both organism:

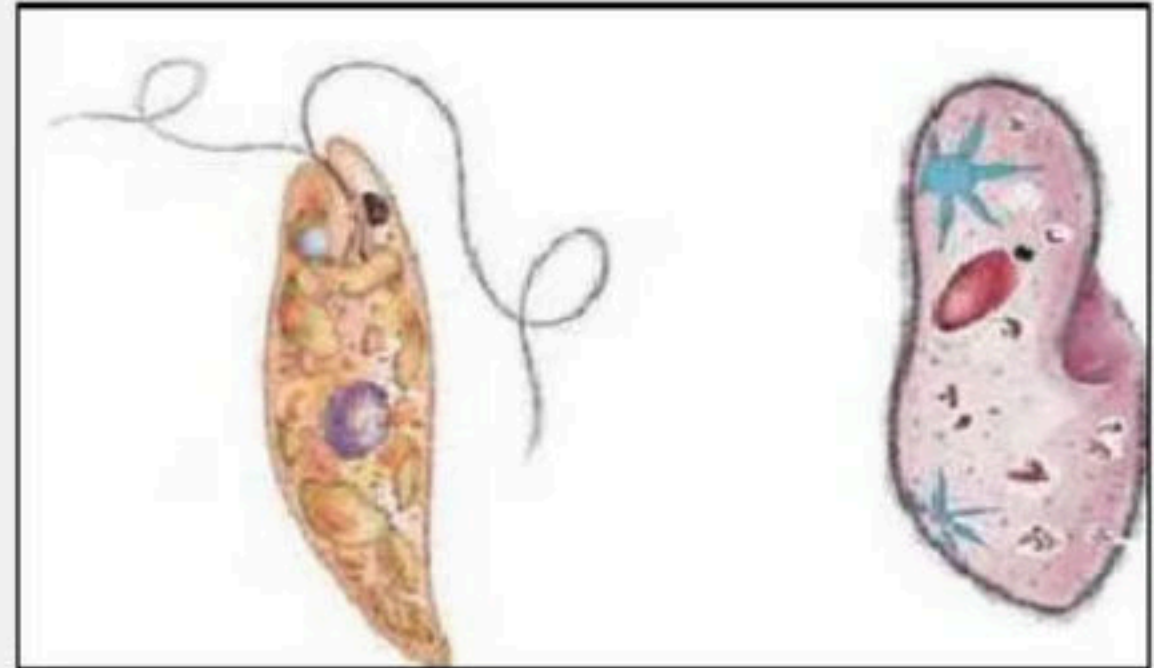

- (a) Both belongs to kingdom protista
- (b) Both belongs to kingdom monera
- (c) Both are unicellular organism
- (d) Both have motile structure cillia

(1) 1

(2) 2

(3) 4

(4) 3

13. Which of the following are a type of Archaeobacteria :

- (1) Halophiles
- (2) Thermoacidophiles
- (3) Methanogens
- (4) All of these

14. The two kingdom classification was given by :

- (1) Carolus Linnaeus
- (2) Copeland
- (3) Whittaker
- (4) Haeckel

15. In five kingdom classification system. The five kingdom are :

- (1) Monera, Protista, Fungi, Plantae, Animalia
- (2) Monera, Protozoa, Fungi, Plantae, Animalia
- (3) Cyanobacteria, Protista, Fungi, Plantae, Animalia
- (4) Monera, Protista, Fungi, Angiosperm, Animalia

16. The main criteria for five Kingdom of classification

Includes:

- (1) Mode of nutrition, reproduction
- (2) Cell structure and body organisation
- (3) Phylogenetic relationship
- (4) All of these

17. Bacteria which play a great role in recycling nutrient like nitrogen, phosphorous, iron and sulphur are:

- (1) Anoxygenic photosyntheter
- (2) Blue green algae
- (3) Chemosynthetic autotrophic
- (4) Photosynthetic autotrophic

18. Which of the following is incorrect about chrysophytes:

- (1) Chrysophytes includes diatoms and golden Algae
- (2) Chrysophytes are found in freshwater as well as in marine water
- (3) They are microscopic and float passively in water current
- (4) Most of them heterotrophic

19. Euglenoids have protein rich layer instead of cell wall this layer is called:

- (1) Pellicle
- (2) Chitin
- (3) Cellulose
- (4) Pectin

20. Which of the following is correct about slime moulds:

- (1) During unfavourable condition slimemoulds form aggregation called plasmodium
- (2) During favourable condition the plasmodium differentiate and form fruiting bodies bearing spore at their tip
- (3) Spores are dispersed by air current
- (4) All of these

21. Assertion: *Mangifera indica* and *Triticum aestivum* belongs to same division.

Reason: *Homo sapiens* and *Musca domestica* belongs to same phylum

- (1) If both Assertion and Reason are true and Reason is the correct explanation of Assertion.
- (2) If both Assertion and Reason are true but Reason is not the correct explanation of Assertion.
- (3) If Assertion is true but Reason is false.
- (4) If both Assertion and Reason are false.

22. Match column I with column II and select the correct option :

Column I

a. *Panthera*

b. *Solanum*

c. *Triticum*

d. *Mangifera*

Column II

i. Mango

ii. Wheat

iii. Makoi

iv. Leopard

(1) a-iv, b-ii, c-iii, d-i

(3) a-ii, b-i, c-iii, d-iv

(2) a-ii, b-i, c-iv, d-iii

(4) a-iv, b-iii, c-ii, d-i

23. What is correct :

- (a) Genera is aggregate of closely related species.**
- (b) Potato and Brinjal belong to same genus.**
- (c) Mango and wheat belong to different division.**
- (d) Each genus may have one or more than one specific epithets.**

(1) b, d

(2) a, b

(3) c, d

(4) a, b, d

a. Biological names are generally in Latin and written in italics. They are Latinised or derived from Latin irrespective of their origin.

b. The first word in a biological name represents the genus while the second component denotes the specific epithet.

c. Both the words in a biological name, when handwritten, are separately underlined, or printed in italics to indicate their Latin origin.

d. The first word denoting the genus starts with a capital letter while the specific epithet starts with a small letter.

(1) a, b are correct

(2) a, c and d are correct

(3) a, b, c and d all are correct

(4) a, b and c are correct

25. There are many species of *Panthera* genus, which of the following is not the species of *Panthera* genus:

- (1) *leo*
- (2) *nigram*
- (3) *tigris*
- (4) *pardus*

26. Which of the following process is/are basics to taxonomy:

- (1) Identification
- (2) Classification
- (3) Nomenclature
- (4) All of these

27. Order Carnivora includes family:

- (1) Felidae
- (2) Canidae
- (3) 1 and 2 both
- (4) None

28. Which of the following not correctly match for *Mangifera indica*

- | | | |
|---------------------|---|-------------------------|
| (1) Biological Name | – | <i>Mangifera indica</i> |
| (2) Family | – | Anacardiaceae |
| (3) Division | – | Angiospermae |
| (4) Order | – | Poales |

29. Founder of binomial nomenclature was:

- (1) Linnaeus
- (2) Mendel
- (3) Darwin
- (4) Lamarck

30. Select the correctly written zoological name:

- (1) *Solanum nigrum*
- (2) *Panthera tigris*
- (3) *Solanum melongena*
- (4) All of these

31. Most names in the biological nomenclature of living organisms are taken from which language?

- (1) Hindi
- (2) Latin
- (3) German
- (4) Greek

32. Branch of biology dealing with classification of living organism and their relationship is :

- (1) Systematics
- (2) Taxa
- (3) Ecology
- (4) Genetics

33. The plants of wheat are belongs to :

- (1) Family poaceae
- (2) Order poales
- (3) Both 1 and 2
- (4) Class dicotyledonae

34. Which of the following is/are correct:

A. Bacteria are most abundant microorganism

B. Bacteria are individually show most extensive metabolic diversity

C. Bacteria are very simple in structure but complex in behaviour

**D. Bacteria may be photosynthetic autotrophic
or chemosynthetic autotrophic**

(1) A,B only

(2) A, C and D only

(3) A,D only

(4) A,B,C and D

35. Earlier classification systems included bacteria, blue green algae, fungi, mosses, ferns, gymnosperm and the angiosperms under plants.

Which character are taken for this classification :

- (1) Cell membrane
- (2) Cell wall
- (3) Mode of nutrition
- (4) Type of reproduction

36. In five kingdom classification system which kingdom are unicellular eukaryotes :

- (1) Protista
- (2) Fungi
- (3) Protozoa
- (4) Monera

37. In which kingdom autotrophic mode of nutrition are never occur :

- (1) Monera
- (2) Protista
- (3) Fungi
- (4) Plantae

38. How many matching are correct :

- a. Spherical – Coccus**
- b. Rod shaped – Bacillus**
- c. Comma shaped – Vibrium**
- d. Spiral – Vibrio**

(1) 3

(2) 2

(3) 4

(4) 5

39. Which taxonomic category are real basic unit of classifications :

- (1) Family
- (2) Genus
- (3) Species
- (4) Order

40. Which of the followings are not specific epithets :

- (1) *indica*
- (2) *tuberosum*
- (3) *Solanum*
- (4) *leo*

41. Cats are included in which genus :

- (1) *Panthera*
- (2) *Felis*
- (3) *Homo*
- (4) All of these

42. The three different genera *Solanum*, *Petunia* and *Datura* are placed in which family :

- (1) Solanaceae
- (2) Brassicaceae
- (3) Convolvulaceae
- (4) All of these

43. The plants of wheat are belongs to :

- (1) Family poacea
- (2) Order Sapindales
- (3) Class Dicotyledonae
- (4) All of these

44. How many matching are correct according to different organisms and their genus :

- | | | |
|-------------|---|------------------|
| a. Man | – | <i>Homo</i> |
| b. Housefly | – | <i>Musca</i> |
| c. Mango | – | <i>Mangifera</i> |
| d. Wheat | – | <i>Triticum</i> |

(1) 3

(2) 4

(3) 1

(4) 2

45. Arrange the following in ascending order of similar characteristic.

I. Family

II. Genus

III. Class

IV. Species

V. Order

(1) Class < Family < Genus < Species

(2) Family < Class < Genus < Species

(3) Species < Order < Family < Class

(4) Class < Genus < Species < Family

46. Classes comprising animals like fishes, amphibians, reptiles, birds along with mammals

constitute the next higher category called as :

- (1) Division
- (2) Phylum
- (3) Kingdom
- (4) All of these

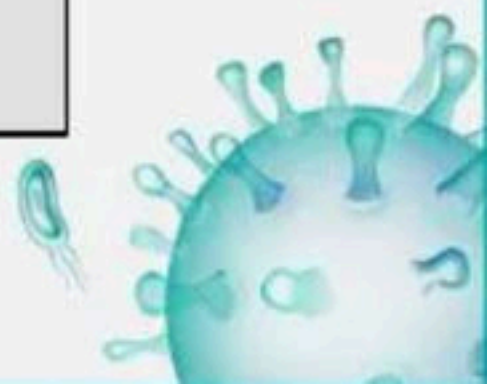

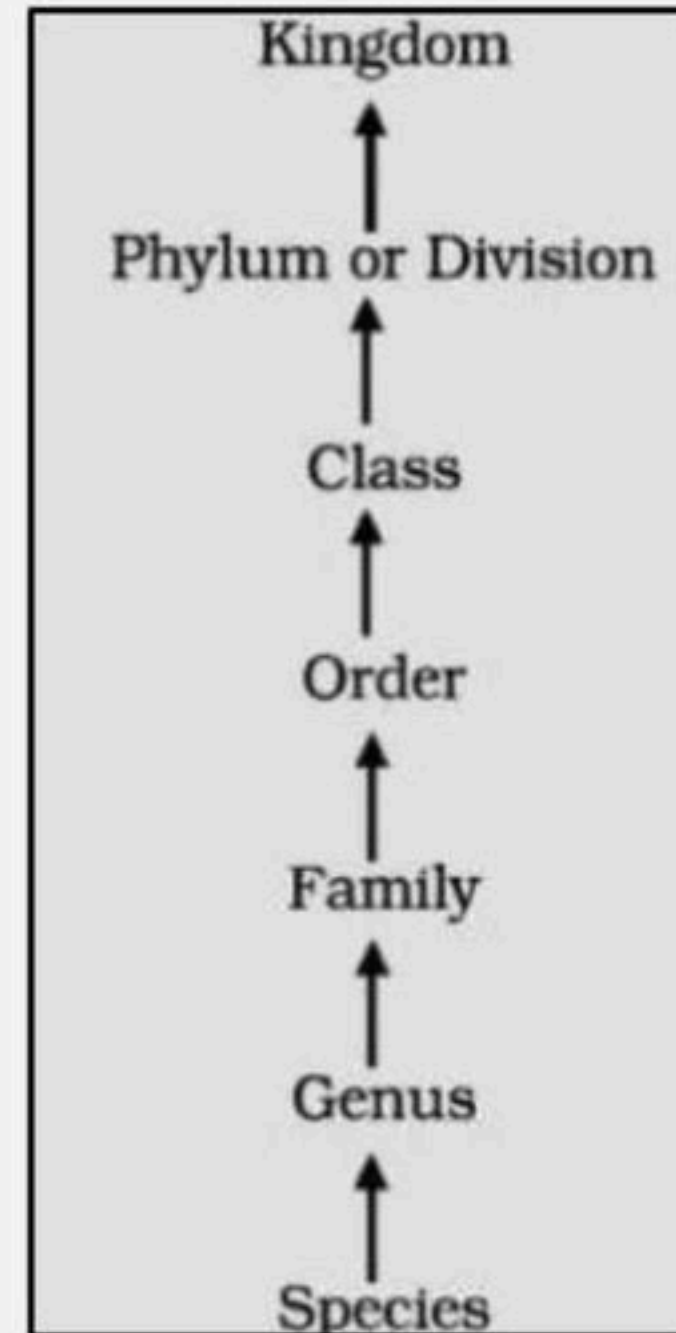

47. Which of the following is correct :

- (1) As we go higher from species to kingdom, the number of common characteristics goes on increasing
- (2) As we go lower from kingdom to species the number of common characteristics goes on decreasing
- (3) Lower the taxa, less are the characteristics that the members within the taxon share .
- (4) Higher the category, greater is the difficulty of determining the relationship to other taxa at the same level

48. Taxonomic categories showing hierarchial arrangement is given below. Can you tell in which order are they arranged :

- (1) Haphazard order
- (2) Odd order
- (3) Descending order
- (4) Ascending order

49. Dikaryon formation is characteristic of:

- (1) Phycomycetes and Basidiomycetes
- (2) Ascomycetes and basidiomycetes
- (3) Ascomycetes and phycomycetes
- (4) Phycomycetes and deuteromycetes

50. Match the column I and column II and choose correct answer:

Column I

Column II

A. Phycomycetes

i. *Agaricus, Ustilago*

B. Ascomycetes

ii. *Mucor, Rhizopous*

C. Basidiomycetes

iii. *Alternaria, Colletotricum*

D. Deuteromycetes

iv. *Penicillium, Claviceps*

(1) A - ii, B - iv, C - i, D - iii

(2) A - i, B - iii, C - ii, D - iv

(3) A - iv, B - i, C - ii, D - iii

(4) A - ii, B - iv, C - iii, D - i

51. Asexual spore are produced exogenously inA..... and endogenously inB.....:

- (1) A – Ascomycetes, B – Phycomycetes
- (2) A – Basidiomycetes, B – Ascomycetes
- (3) A – Ascomycetes, B – Basidiomycetes
- (4) A – Basidiomycetes, B – Phycomycetes

52. Many drawbacks was in two kingdom classifications system, because this system did not distinguish between which :

- (1) Eukaryotes and Prokaryotes
- (2) Unicellular and multicellular organisms
- (3) Photosynthetic and non photosynthetic
- (4) All of these

53. In six kingdom classifications which kingdom is divided into two domains :

- (1) Protista
- (2) Monera
- (3) Fungi
- (4) Plantae

54. Red tide is caused by

- (1) Anabaena
- (2) Euglena
- (3) Gonyaulax
- (4) Amoeba

55. Bacteriophages (viruses that infect bacteria) are usually :

- (1) Circular RNA virus
- (2) Single stranded RNA virus
- (3) Single stranded DNA virus
- (4) Double stranded DNA viruses.

56. Which of the following is true about basidiomycetes:

- (a) Also called sac fungi**
- (b) Sex organs absent, but plasmogamy is brought about by fusion of two vegetative cells of different genotypes**
- (c) Karyogamy and meiosis takes place outside the basidium**
- (d) Basidiospores are produced exogenously**

- (1) a and b are correct
- (2) b and d are correct
- (3) a, b, c and d all are correct
- (4) a, b and d are correct

57. Match the different types of spores listed under column-I with the names of the organisms given under column-II

Column-I (Spores)

a. Ascospores

b. Basidiospores

c. Zygosporoes

d. Conidia

(1) a-g, b-f, c-h, d-i

(3) a-h, b-i, c-g, d-f

Column-II (Organisms)

f. Ustilago

g. Aspergillus

h. Rhizopus

i. Pencillium

(2) a-g, b-h, c-f, d-i

(4) a-f, b-h, c-g, d-i

58. Fungi reproduce by only asexual and vegetative methods in

- (1) Phycomycetes
- (2) Ascomycetes
- (3) Basidiomycetes
- (4) Deuteromycetes

59. How many matchings are correct :

a. Extreme salty areas – Methanogens

b. Hot springs – Thermoacidophiles

c. Marshy areas – Halophiles

d. Methanogens – Ruminant animals

(1) 3

(2) 4

(3) 2

(4) 1

60. Which of the following statements are incorrect about cyanobacteria :

- (1) They have chlorophyll 'a'
- (2) They often forms Blooms in polluted water bodies
- (3) They are called chemosynthetic autotrophs
- (4) None of these

61. The group of organisms which are helpful in making curd from milk, production of antibiotics, fixing nitrogen in legume roots. This group of organisms are :

- (1) Heterotrophic bacteria
- (2) Archaeobacteria
- (3) Cyanobacteria
- (4) Chemosynthetic autotrophic bacteria

62. Which of the following are bacterial disease :

- (1) Small pox
- (2) Cholera
- (3) Mumps
- (4) All of these

63. Viroids are made up of

- (1) Low molecular weights of DNA
- (2) High molecular weights of RNA
- (3) Low molecular weights of RNA
- (4) High molecular weights of DNA

64. Fungal cell wall is composed of :

- (1) Chitin and polysaccharides
- (2) Cellulose and polysaccharides
- (3) Lignin
- (4) Both 1 and 3

65. Mycorrhiza is :

- (1) Symbiotic association of a soil fungus and roots of higher plants
- (2) Parasitic association between a fungus and roots of seed plants
- (3) Saprophytic association between a fungus and root of seed plants
- (4) Symbiotic association between an alga and root of seed plants.

66. Plant families like convolvulaceae, solanaceae are included in which order :

- (1) Poales
- (2) Poaceae
- (3) Polymoniales
- (4) Sapindales

67. Select the correct sequence of various taxonomic categories from lower to higher rank :

- (1) Species → Genus → Family → Order → Class → Phylum
- (2) Species → Genus → Family → Order → Division → Class
- (3) Division → Class → Order → Family → Genus → Species
- (4) Phylum → Order → Class → Family → Genus → Species

68. Assertion: Most fungi are saprophytic.

Reason: They absorb organic matter from dead substance.

(1) If both Assertion and Reason are true and Reason is the correct explanation of Assertion.

(2) If both Assertion and Reason are true but Reason is not the correct explanation of Assertion.

(3) If Assertion is true but Reason is false.

(4) If both Assertion and Reason are false.

69. In class Ascomycetes the mycelium is:

- (1) Coenocytic and aseptate
- (2) Septate
- (3) Multinucleated and aseptate
- (4) 1 and 3 both

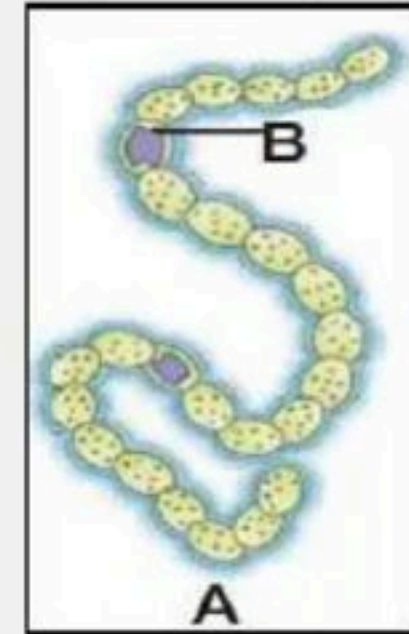

70. Which component of lichen prepared/ synthesised food:

- (1) Mycobiont
- (2) Phycobiont
- (3) Fungi
- (4) All of these

71. According to given figure which of the following option is correct :

- (1) A – *Anabaena*, B – Mucilagenous Sheath
- (2) A – *Nostoc*, B – Heterocyst
- (3) A – *Oscillatoria*, B – Heterocyst
- (4) A – Colonial algae, B – Mucilagenous Sheath

72. On the basis of body organisation. How many matching is incorrect :

(a) Fungi Only cellular

(b) Protista Cellular

(c) Plantae Only tissue

(d) Monera Tissue

(1) One

(2) Two

(3) Three

(4) Four

73. According to five kingdom classification. Which of the matching is correct:

- | | | |
|-------------------|---|---------------------------------------|
| (1) Chlorella | - | Unicellular protist without cell wall |
| (2) Paramecium | - | Unicellular protist with cell wall |
| (3) Chlamydomonas | - | Unicellular protist with cell wall |
| (4) All of these | | |

74. Select the wrong statements :

- (1) Cell wall is present in members of fungi and plantae
- (2) Mushroom belong to basidiomycetes
- (3) Pseudopodia are locomotory and feeding structures in sporozoans.
- (4) None of these

75. Select the wrong statements :

- (1) Diatoms are chief producers in the ocean
- (2) Diatoms are microscopic and float passively in water
- (3) The walls of diatoms are easily destructible
- (4) 'Diatomaceous earth' is formed by the cell wall of diatoms.

76. Which one of the following is not a criterion for classification of fungi?

- (1) Mode of spore formation
- (2) Fruiting body
- (3) Morphology of mycelium
- (4) Mode of nutrition

77. Which of the following statements is correct?

- (1) Some of the organisms can fix atmospheric nitrogen in specialized cells called sheath cells
- (2) Fusion of two cells is called karyogamy
- (3) Fusion of protoplasts between two motile or nonmotile gametes is called plasmogamy
- (4) Organism that depend on living plants are called saprophytes.

78. Which kingdom forms a link with the others dealing with plants, animals and fungi :

- (1) Monera
- (2) Plantae
- (3) Protista
- (4) Animalia

79. In which organisms the cell walls form two thin overlapping shells, which fit together as in a soap box:

- (1) Slime moulds
- (2) Protozoans
- (3) Diatoms
- (4) Euglenoids

80. How many statements are correct with reference to sporozoans

- (a) All are parasite**
- (b) Locomotory structure present**
- (c) Malaria causing agent belongs to sporozoans**
- (d) Nuclear membrane are present**

(1) 1

(2) 4

(3) 3

(4) 2

81. Bladderwort and venus fly trap are examples of

- (1) Partially heterotrophic plants
- (2) Parasitic plants
- (3) Totally heterotrophic plants
- (4) More than one options are correct

82. How many statements are correct according to kingdom Animalia

- a. They directly or indirectly depend on plants for food.**
- b. They digest their food in an internal cavity**
- c. They store food reserves as glycogen or fat**
- d. Some of them are capable of locomotion**
- e. Their mode of nutrition is holozoic**

(1) 4

(2) 3

(3) 2

(4) 5

83. Viruses could be crystallised and crystals are made up of

- (1) Largely of nucleic acids
- (2) Largely of protein
- (3) Largely of carbohydrates
- (4) Largely of carbohydrates and protein both

84. In the given below examples. How many are viral diseases in animals :

Common cold, mumps, typhoid, cholera, influenza, herpes, tetanus, AIDS

(1) 6

(2) 5

(3) 4

(4) 3

85. The viruses contains

- (1) Only RNA
- (2) Only DNA
- (3) Either RNA or DNA
- (4) Both RNA and DNA

86. Which of the following organism are insectivorous:

- (1) *Cuscuta* and *Albugo*
- (2) Bladderwort and *Albugo*
- (3) Bladderwort and venus fly trap
- (4) All of these

87. Which of the following is incorrect about basidiomycetes:

- (1) Sexual reproduction take place by fusion of two vegetative or somatic cell of different strain or genotype
- (2) Plasmogamy, Karyogamy and meiosis takes place in basidium
- (3) Four haploid basidiospore are exogenously produced on basidium
- (4) Asexual spore generally not found

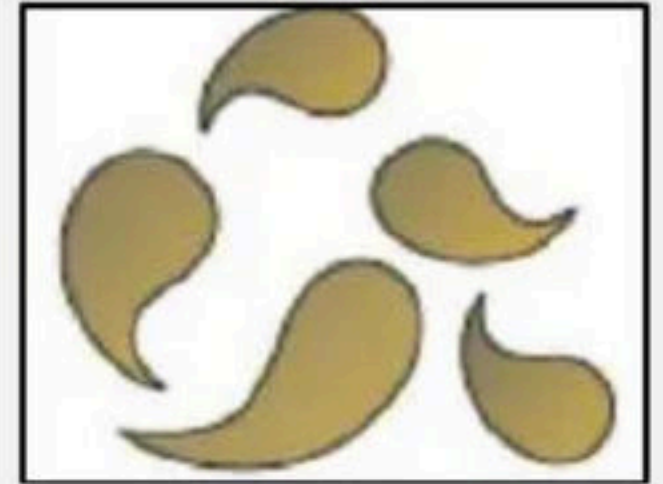

88. Correct sequence of sexual cycle in fungi is:

- (1) Karyogamy → Plasmogamy → meiosis
- (2) Plasmogamy → Karyogamy → meiosis
- (3) Plasmogamy → meiosis → Karyogamy
- (4) meiosis → Plasmogamy → Karyogamy

89. How many of the following statements are correct with reference to given diagram of organism :

- a. This organism is prokaryote
- b. Nuclear membrane present
- c. They are hetrotropic in nature
- d. It is comma shaped

- (1) 4
- (2) 3
- (3) 2
- (4) 1

90. An infectious agent which are similar in size to the viruses

- (1) Viroids
- (2) Bacteria
- (3) Prions
- (4) Mycoplasma

91. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion: Deuteromycetes commonly known as imperfect fungi.

Reason: In deuteromycetes only the Asexual or vegetative phase are known.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correct explanation of (A)

92. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion: Cynobacteria have chlorophyll 'a' similar to green plant and are photosynthetic autotrophs.

Reason: Some cynobacteria can fix atomospheric nitrogen in specialised cell called heterocyst.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correct explanation of (A)

93. Mad cow disease in cattle caused by an agent which has:

- (1) Polyhedrally arranged protein
- (2) Smaller size than bacteria
- (3) Abnormally folded protein
- (4) 2 and 3

94. Which of the following is a member of ascomycetes

- (1) Trichoderma
- (2) Morels
- (3) Rust and smut
- (4) Both 1 and 3

95. Mycelium of *Neurospora* are

- (1) Branched and septate
- (2) Coenocytic
- (3) Aseptate
- (4) Septate and coenocytic

**96. By using which characters the plants classify into
Herbs, Shrubs and Trees :**

- (1) Simple anatomical characters
- (2) Simple morphological characters
- (3) Simple reproductive characters
- (4) All of these

97. Which of the following organisms group are not included in the five kingdom system of classification

- (1) Chrysophytes, viroids, lichens
- (2) Bacteriophages, Dinoflagellates, lichens
- (3) Bacteriophages, viroids, Lichens
- (4) Viroids, slime moulds, fungi

98. Statement- I: Archaeobacteria is a type of bacteriophage

Statement-II: Bactriophage is member of kingdom monera

- (1) Statement (I) correct & (II) incorrect
- (2) Statement (I) & (II) both are correct
- (3) Statement (II) correct & (I) incorrect
- (4) Both statement are incorrect

99. Match the following column I and column II :

Column I

(i) Mango

(ii) Leopard

(iii) Tiger

(iv) Cat

(1) i-b, ii-c, iii-d, iv-a

(3) i-c, ii-b, iii-d, iv-a

Column II

(a) *Felis*

(b) *Mangifera indica*

(c) *Panthera pardus*

(d) *Panthera tigris*

(2) i-a, ii-c, iii-d, iv-b

(4) i-c, ii-b, iii-a, iv-d

100. The process by which anything is grouped into convenient categories based on easily observable characters is :

- (1) Nomenclature
- (2) Identification
- (3) Characterisation
- (4) Classification
