

Unit - 8(Biology and Human Welfare) - 200 MCQs

NCERT Nichod : Biology Practice Series NEET 2025

200 MCQs on Unit – 8 (Biology and Human Welfare)

BIOLOGYLIVE

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

1. Which of the following statements regarding the disease typhoid is/are correct?

I. Salmonella typhi are the pathogenic virus which enter human intestine through contaminated food and water and migrate to other organs through blood.

II. Sustained high fever (39°F to 40°F), weakness, stomach pain, constipation, headache and loss of

appetite are some common symptoms of typhoid.

III. Widal test is used for diagnosis of typhoid fever.

IV. A classic case in medicine, of Mary Mallon nicknamed, Typhoid Mary who was a carrier

(1) I and II

(2) III and IV

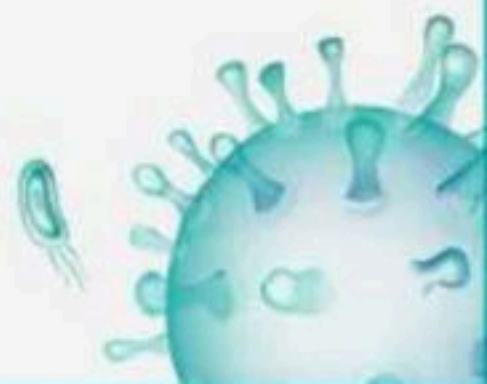

(3) II and IV

(4) I and IV

2. What is injected into the patient's body for determining the cause of allergy?

- (1) Allergen to which the patient is allergic
- (2) IgG
- (3) IgE
- (4) Steroids

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

3. In ____ , a piece of the suspected tissue cut into thin sections is stained and examined under microscope ____ by a pathologist.

- (1) X-ray, MRI
- (2) Biopsy, histopathological studies
- (3) Biopsy, MRI
- (4) Histopathological studies, biopsy

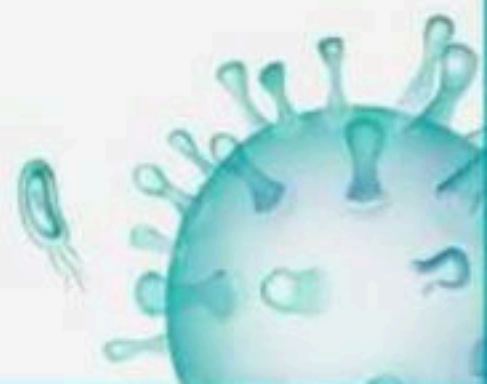

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

4. Match the column I with column II

Column I		Column II	
A	Cellular barrier	P	Saliva
B	Physiological	Q	Mucus coating of the epithelial lining
C	Physical barrier	R	PMNL
D	Cytokine	S	Virus infected cell

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – R, C – P, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

5. Match the columns I and II.

Column I		Column II	
A	Tonsils	P	Left side of abdomen
B	Peyer's patches of	Q	In the pharynx
C	Spleen	R	Small intestine and appendix

- (1) A – R, B – P, C – Q
- (2) A – Q, B – R, C – P
- (3) A – P, B – R, C – Q
- (4) A – Q, B – P, C – R

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

6. In malignant tumors, the cells proliferate, grow rapidly and move to other parts of the body to form new tumors. This stage of disease is called:

- (1) Metagenesis
- (2) Metastasis
- (3) Teratogenesis
- (4) Mitosis

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

7. Thymus in elderly degenerates which shall result in failure to produce

- (1) Monocytes
- (2) B-lymphocytes
- (3) T-lymphocytes
- (4) Basophils

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

8. Choose the correct option for typhoid

i. *Salmonella typhi* causes typhoid fever in human beings.

ii. *Salmonella typhi* generally enter the small intestine through bite of infected mosquito.

iii. Sustained high fever (39° to 40°C), weakness, stomach pain, constipation, headache and loss of appetite are some of the common symptoms of typhoid.

iv. Typhoid fever could be confirmed by Western blot test.

(1) i and iii

(2) ii and iv

(3) iii and iv

(4) all are correct

9. Identify the symptoms of pneumonia

- (1) Nasal congestion and discharge, cough, sore throat, headache
- (2) Constipation, Abdominal pain, cramps, blood clots
- (3) High fever, weakness, stomach pain, loss of appetite
- (4) Difficulty in breathing, fever, chills, cough headache

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

10. Full form of MALT is

- (1) Mucosal Associated Lymphoid Tissue
- (2) Mucosal Associated Leucoid Tissuee
- (3) Mucosal Antigenic Lymphoid Tissue
- (4) Mucosa Associated Lymphocyte Tissue

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

11. Match the columns I and II.

Column I		Column II	
A	Opioids	P	Marijuana
B	Cannabinoids	Q	<i>Smack</i>
C	Cocaine	R	Coke
D	<i>Atropa belladonna</i>	S	Hallucinogens

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

12. Hangover is

- (1) Feeling of giddiness and nausea in the morning after having alcohol in the night
- (2) Increased desire to take alcohol
- (3) Feeling of flushing after taking alcohol
- (4) Development of gastritis and peptic ulcers due to alcohol addiction

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

13. Assertion : An antibody is represented by H₂ L₂.

Reason : Each antibody is made of four peptide chains.

- (1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.
- (2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.
- (3) Assertion is correct but Reason is incorrect.
- (4) Both Assertion and Reason are incorrect

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

14. The genes which upon activation produce malignant neoplasms are called

- (1) Pleiotrophic genes
- (2) Multiple genes
- (3) Neonatalgenes
- (4) Proto-oncogenes

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

15. MALT is the lymphoid tissue located within the lining of

- (1) Digestive system
- (2) Respiratory system
- (3) Urogenital system
- (4) All of them

16. What are the main symptoms of ringworm?

- (1) Appearance of dry, scaly lesions on various parts of the body
- (2) Lesions are accompanied by intense itching.
- (3) Oozing of pus
- (4) Both 1 and 2

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

17. The test suggested for AIDS detection is?

- (1) ELISA
- (2) MRI
- (3) Ultrasound
- (4) X-RAY

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

18. Match Column I with Column II :

Column I		Column II	
A	Common cold	P	<i>Plasmodium</i>
B	Haemozoin	Q	Typhoid
C	Widal test	R	Rhinoviruses
D	Allergy	S	Dust mites

- (1) A – Q, B – S, C – R, D – P
- (2) A – P, B – R, C – Q, D – S
- (3) A – R, B – P, C – Q, D – S
- (4) A – S, B – Q, C – R, D – P

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

19. HIV that causes AIDS, first starts destroying

- (1) B-lymphocytes
- (2) Leucocytes
- (3) Helper T-lymphocytes
- (4) Thrombocytes

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

20. Which part of poppy plant is used to obtain the drug "Smack"?

- (1) Roots
- (2) Latex
- (3) Flowers
- (4) Leaves

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

21. Match Column I with Column II

Column I		Column II	
A	Heroin	P	Effect on cardiovascular system
B	Marijuana	Q	Slow down body function
C	Cocaine	R	Painkiller
D	Morphine	S	Interfere with transport of dopamine

- (1) A-Q, B-P, C-S, D-R
- (2) A-P, B-Q, C-R, D-S
- (3) A-S, B-R, C-Q, D-P
- (4) A-R, B-S, C-P, D-Q

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

22. In which blood corpuscles, the HIV undergoes replication and produces progeny viruses?

- (1) TH cells
- (2) B-lymphocytes
- (3) Basophils
- (4) Eosinophils

23. The infectious stage of Plasmodium that enters the human body is:

- (1) Sporozoites
- (2) Female
- (3) Male gametocytes gametocytes
- (4) Trophozoites

24. Identify the correct pair representing the causative agent of typhoid fever and the confirmatory test for typhoid.

- (1) Plasmodium vivax / UTI test
- (2) Streptococcus pneumoniae / Widal test
- (3) Salmonella typhi / Anthrone test
- (4) Salmonella typhi / Widal test

25. Identify the wrong statement with reference to immunity.

- (1) When ready-made antibodies are directly given, it is called "Passive immunity".
- (2) Active immunity is quick and gives full response.
- (3) Foetus receives some antibodies from mother, it is an example for passive immunity.
- (4) When exposed to antigen (living or dead) antibodies are produced in the host's body. It is called "Active immunity".

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

26. Which particular type of drug is obtained from the plant whose one flowering branch is shown below

- (1) Hallucinogen
- (2) Depressant
- (3) Stimulant
- (4) Pain-killer

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

27. Match Column - I with Column - II

Column I		Column II	
A	Filariasis	P	Haemophilus influenzae
B	Ameobiasis	Q	Trichophyton
C	Pneumonia	R	Wuchereria bancrofti
D	Ringworm	S	Entamoeba histolytica

- (1) A – S, B – P, C – R, D – Q
- (2) A – R, B – S, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – R, C – P, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

28. In higher vertebrates the immune system can distinguish self cells and non self. If this property is lost due to genetic abnormality and it attacks self cells, then it leads to.

- (1) Allergic response
- (2) Graft rejection
- (3) Auto immune disease
- (4) Active immunity

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

29. Match Column I with Column II :

Column I		Column II	
A	Cocaine	P	Effective sedative in surgery
B	Heroin	Q	<i>Cannabis sativa</i>
C	Morphine	R	<i>Erythroxylum</i>
D	Marijuana	S	<i>Papaver somniferum</i>

- (1) A – S, B – R, C – P, D – Q
- (2) A – P, B – R, C – Q, D – S
- (3) A – Q, B – P, C – R, D – S
- (4) A – R, B – S, C – P, D – Q

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

30. In which disease does mosquito transmitted pathogen cause chronic inflammation of lymphatic vessels?

- (1) Ringworm disease
- (2) Ascariasis
- (3) Elephantiasis
- (4) Amoebiasis

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

31. Select the incorrect statement with respect to acquired immunity.

- (1) Anamnestic response is elicited on subsequent encounters with the same pathogen.
- (2) Anamnestic response is due to memory of first encounter.
- (3) Acquired immunity is non-specific type of defense present at the time of birth.
- (4) Primary response is produced when our body encounters a pathogen for the first time.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

32. Given below are two statements:

Statement A : Autoimmune disorder is a condition where body defense mechanism recognizes its own cells as foreign bodies.

Statement B : Rheumatoid arthritis is a condition where body does not attack self cells.

In the light of the above statements, choose the most appropriate answer from the options given below:

- (1) Both Statement I and Statement II are incorrect
- (2) Statement I is correct but Statement II is incorrect
- (3) Statement I is incorrect but Statement II is correct
- (4) Both Statement I and Statement II are correct.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

33. Match Column I with Column II.

Column I		Column II	
A	Ringworm	P	<i>Haemophilus influenzae</i>
B	Filariasis	Q	<i>Trichophyton</i>
C	Malaria	R	<i>Wuchereria bancrofti</i>
D	Pneumonia	S	<i>Plasmodium vivax</i>

(1) A-Q, B-R, C-S, D-P

(2) A-Q, B-R, C-P, D-S

(3) A-R, B-Q, C-P, D-S

(4) A-R, B-Q, C-S, D-P

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

34. Drug called 'Heroin' is synthesized by

- (1) Methylation of morphine
- (2) Acetylation of morphine
- (3) Glycosylation of morphine
- (4) Nitration of morphine

35. Which of the following is not an autoimmune disease?

- (1) Alzheimer's
- (2) Rheumatoid disease
- (3) Psoriasis
- (4) Vitiligo

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

36. Which of the following is a pair of viral disease?

- (1) Common cold, AIDS
- (2) Dysentery, Common cold
- (3) Typhoid, Tuberculosis
- (4) Ringworm, AIDS

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

37. Match the following diseases with the causative organism and select the correct option.

Column I		Column II	
A	Typhoid	P	Wuchereria
B	Pneumonia	Q	Plasmodium
C	Filariasis	R	Salmonella
D	Malaria	S	Haemophilus

- (1) A – R, B – S, C – P, D – Q
- (2) A – Q, B – P, C – R, D – S
- (3) A – S, B – P, C – Q, D – R
- (4) A – Q, B – R, C – P, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

38. Match Column I with Column II :

Column I		Column II	
A	Typhoid	P	Fungus
B	Leishmaniasis	Q	Nematode
C	Ringworm	R	Protozoa
D	Filariasis	S	Bacteria

- (1) A – P, B – R, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – R, B – P, C – S, D – Q
- (4) A – Q, B – S, C – R, D – P

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

39. Given below are two statements:

Read the Statement - A and Statement - B carefully to mark the correct options given below:

Statement A : Bone marrow is the main lymphoid organ where all blood cells including lymphocytes are produced.

Statement B : Both bone marrow and thymus provide micro environments for the development and maturation of T-lymphocytes.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

40. The development of quick immune response in a person infected with deadly microbes by administering performed antibodies is

- (1) Active immunity
- (2) Cell-mediated immunity
- (3) Innate immunity
- (4) Passive immunisation

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

41. Select the most appropriate statement

A. Aedes mosquitoes- mosquito is the causative agent for diseases like dengue and Filaria in many parts of India

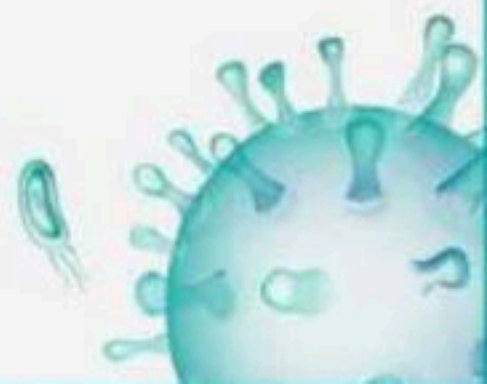

B. Smallpox is a completely eradicated disease.

(1) Only A is correct

(2) Only B is correct

(3) Both are correct

(4) None are correct

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

42. Which one of the following is a opiate narcotics ?

- (1) Amphetamines
- (2) Barbiturates
- (3) LSD
- (4) Morphine

43. Triple antigen vaccine is not used for

- (1) Typhoid
- (2) Tetanus
- (3) Diptheria
- (4) Pertussis

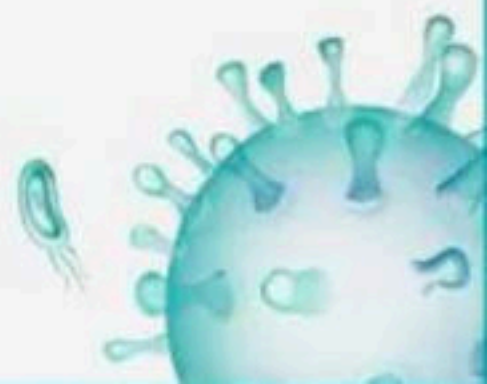

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

44. Match the columns I and II.

Column I		Column II	
A	CMI	P	Antibodies are produced outside the body
B	PMNL	Q	Antibodies are produced inside the body
C	Active immunity	R	Cell Mediated Immunity
D	Passive immunity	S	Leucocytes

- (1) A – R, B – S, C – Q, D – P
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

45. The filarial worm that causes elephantiasis belongs to phylum

- (1) Platyhelminthes
- (2) Aschelminthes
- (3) Protozoa
- (4) Arthropoda

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

46. Which of the following statement is correct?

- (1) Pneumonia can be transmitted to a healthy person by inhaling the droplets released by an infected person and also by sharing utensils.
- (2) Pathogens causing pneumonia are *Streptococcus pneumoniae* and *Haemophilus influenzae*.
- (3) The symptoms of pneumonia include fever, chills, cough and headache.
- (4) All of these.

47. Which one of the following is not a property of cancerous cells?

- (1) They divide in an uncontrolled manner.
- (2) They show contact inhibition.
- (3) They compete with normal cells for vital nutrients.
- (4) They do not remain confined in the area of formation.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

48. Malarial parasite can be obtained from patient

- (1) After temperature becomes normal
- (2) Before temperature rise
- (3) During fever
- (4) All of these

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

49. To which type of barriers under innate immunity does the saliva in the mouth belong?

- (1) Physical barriers
- (2) Cytokine barriers
- (3) Cellular barriers
- (4) Physiological barriers

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

50. Hepatitis-B vaccine produced from

- (1) Bacteria
- (2) Recombinant RNA Technology
- (3) Fungus
- (4) Both 2 and 3

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

51. Which of the following pair contains infectious disease?

- (1) Typhoid and Obesity
- (2) AIDS and Cancer
- (3) Pneumonia and malaria
- (4) Cancer and malaria

52. Short-lived immunity acquired from mother to foetus across placenta or through mother's milk to the infant, is categorized as

- (1) Active immunity
- (2) Passive immunity
- (3) Cellular immunity
- (4) Innate non-specific immunity

53. Which of the following toxic substance is responsible for the chill and high fever in malaria?

- (1) Plasma
- (2) Haemozoin
- (3) Haemoglobin
- (4) Sporozoites

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

54. A person with sickle cell anaemia is

- (1) More prone to malaria
- (2) More prone to typhoid
- (3) Less prone to malaria
- (4) Less prone to typhoid

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

55. MALT constitutes about ____ percent of the lymphoid tissue in human body.

- (1) 50%
- (2) 20%
- (3) 70%
- (4) 10%

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

56. Fill in the blanks

In ___ A ___, a piece of the suspected tissue is cut into thin sections, stained and examined under microscope for ___ B ___ pathologist. In radiography ___ C ___ are used In CT scan, ___ D ___ are used

- (1) A - biopsy; B - histopathological studies; C - X-rays; D - gamma rays.
- (2) A - X-rays; B - histopathological studies; C - X-rays; D - X-rays
- (3) A - Biopsy; B - histopathological studies; C - X-rays; D - Biopsy
- (4) A - Biopsy; B - histopathological studies; C - X-rays; D - X-rays

57. Immunoglobulins are

- (1) Antigen
- (2) Antibodies
- (3) Antiseptics
- (4) Antibiotics

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

58. Identify the false statements-

- I. Antigen-binding site of an antibody is found between two light peptide chains.**
- II. The pathogen of elephantiasis is transmitted to a healthy person through the bite of same mosquito species which also cause malarial disease.**
- III. Lymphoid tissues are also located within the lining of the major tracts called mucosal lymphoid tissue.**
- IV. Increase intake of coffee or tea can cause indigestion, insomnia and disturb renal functions.**
- V. Anaphylactic shock is an autoimmune reaction which involves all the tissues of the body that results in drastic fall in blood pressure.**

(1) I, III, V

(2) II, IV

(3) I, II, V

(4) I, II, IV

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

59. *Gambusia*, an ____ is used to control an ____

- (1) Osteichthyes, annelida
- (2) Osteichthyes, arthropod
- (3) Chondrichthyes, arthropod
- (4) Chondrichthyes, annelida

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

60. Which one of the following diseases is caused by bacteria and spreads through faecal matter by houseflies?

- (1) Pertusis
- (2) Typhoid
- (3) Diphtheria
- (4) Chickenpox

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

61. Identify the following.

- (1) Sporozoite in RBC
- (2) Sporozoite in salivary gland
- (3) Merozoite in salivary gland
- (4) Gametocyte in RBC

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

62. Which of the following disease is noninfectious as well as the major cause of death in humans?

- (1) Malaria
- (2) AIDS
- (3) Asthma
- (4) Cancer

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

63. Choose the correct option for the prevention and control of drug and alcohol abuse.

- i. A child should not be pushed unduly to perform beyond his/her threshold limits; be it studies, sports or other activities.
- ii. Educating and counselling him/ her to face problems and stresses, and to accept disappointments and failures as a part of life.
- iii. Help from parents and peers should be sought immediately so that they can guide appropriately.
- iv. With the help of qualified psychologists, psychiatrists, and deaddiction and rehabilitation programmes to help individuals who have unfortunately got in the quagmire of drug/alcohol abuse.

(1) i and iii are correct

(2) ii and iv are wrong

(3) All are correct

(4) All are wrong

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

64. What is the source of infection for amoebiasis?

- (1) Bite of mosquito
- (2) Aerosol
- (3) Drinking water and food contaminated by the faecal matter
- (4) Bite of house fly

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

65. Opium : Morphine, Cannabinoid :

- (1) Tobacco
- (2) Cocaine
- (3) Marijuana
- (4) Ergot

66. Immunological memory exists in

- (1) Active immunity
- (2) Passive immunity
- (3) Innate immunity
- (4) Both active & passive immunity

67. Cannabinoids are obtained from

- (1) Inflorescence of the plant *Cannabis sativa*
- (2) Fruits of the plant *Papaver somniferum*
- (3) Late of the plant *Cannabis sativa*
- (4) Plant *Papaver somniferum* inflorescence

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

68. Diseases are broadly grouped into infectious and noninfectious diseases. In the list given below, identify the infectious diseases.

i. Cancer

ii. Influenza

iii. Allergy

iv. Small pox

(1) i and ii

(2) ii and iii

(3) iii and iv

(4) ii and iv

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

69. Name two diseases that can be transferred due to drug abuse?

- (1) Malaria and AIDS
- (2) AIDS and hepatitis A
- (3) AIDS and hepatitis B
- (4) Malaria and hepatitis B

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

70. Cannabinoid receptors are present principally in

- (1) Brain
- (2) Neuron
- (3) GIT
- (4) CVS

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

71. Statement A : Salmonella typhi causes Typhoid fever in human beings

Statement B : Widal test is used to confirm typhoid.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

72. Primary and secondary immune response are carried out with the help of two special types of types of cells .

They are ____

- (1) Macrophages, B-lymphocytes
- (2) B-lymphocytes and T-lymphocytes
- (3) Neutrophils and T-lymphocytes
- (4) Monocytes and T-lymphocytes

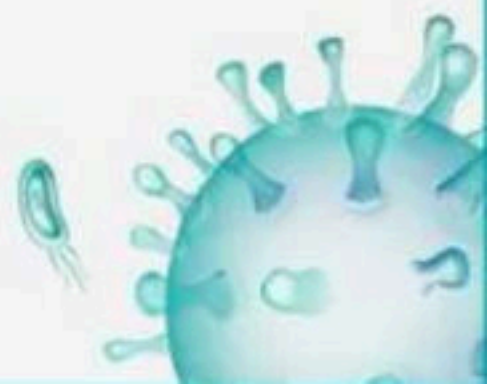

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

73. Statement A : In severe cases of pneumonia, the lips and finger nails may turn grey to bluish in colour.

Statement B : In pneumonia the alveoli get filled with fluid leading to severe problems in transport of respiratory gases.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

74. Which of the following disease is not transmitted by *Aedes aegypti*?

- (1) Chikungunya
- (2) Dengue
- (3) Chicken - pox
- (4) Both (1) and (2)

75. Which one of the following sets includes bacterial diseases?

- (1) Tetanus, tuberculosis, mumps, measles
- (2) Diphtheria, leprosy, plague, tuberculosis
- (3) Cholera, typhoid, tuberculosis, mumps
- (4) Malaria, tuberculosis, mumps, poliomyelitis

76. Passive immunity is obtained through injecting

- (1) Antibiotics
- (2) Vaccines
- (3) Antibodies
- (4) Antigen

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

77. Select the correct answer

- i. Computed tomography uses -rays to generate a three-dimensional image of the internals of an object.**
- ii. MRI uses strong magnetic fields and nonionizing radiations to accurately detect pathological and physiological changes in the living tissue.**
- iii. Antibodies against cancer-specific antigens are also used for detection of certain cancers.**

(1) Only i is correct

(2) Only ii is correct

(3) Only ii, iii is correct

(4) All are correct

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

78. Read the following statements

I. Heroin, commonly called smack, is obtained by acetylation of morphine.

II. Heroin is a depressant and slows down body functions

III. Heroin is obtained from the latex of the poppy plant *Papaver somniferum*

IV. Morphine is an effective sedative and pain killer.

Mark the option which includes correct statements.

(1) I & II

(2) I, II, III

(3) III & IV

(4) I, II, IV

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

79. During what age is considered as adolescence period?

- (1) Between 12-18 months of age
- (2) Between 12-18 years of age
- (3) Between 2-18 years of age
- (4) Between 12-8 years of age

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

80. Identify the correct statement

I. Computed tomography uses X-rays to generate a two-dimensional image of the internals of an object.

II. Bone marrow tests for decreased white cell counts in the case of leukemias

III. Non-ionising radiations like X-rays and gamma rays and ionizing radiations like UV cause DNA damage leading to neoplastic transformation.

(1) All are correct

(2) I & II

(3) II & III

(4) I only

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

81. Anti-histamine, adrenaline and steroids are administered to reduce the symptoms of

- (1) Bacterial disease
- (2) Viral diseases
- (3) Allergy
- (4) Helminthic diseases

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

82. Assertion : Acquired immunity is pathogen specific.

Reason : It is characterised by memory

- (1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.
- (2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.
- (3) Assertion is correct but Reason is incorrect.
- (4) Both Assertion and Reason are incorrect

83. Transmission of HIV infection from infected mother to her child occurs through

- (1) Liver
- (2) Placenta
- (3) RBC
- (4) None of these

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

84. Which form of the tumor remains confined to their original location and do not spread to other parts of the body?

- (1) Benign tumor
- (2) Malignant tumour
- (3) Both (1) and (2)
- (4) Leukaemia

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

85. Match the columns I and II.

Column I		Column II	
A	Active natural immunity	P	Antibodies transferred through the placenta
B	First line of defence	Q	Yeast
C	Passive natural immunity	R	Direct contact with the pathogens that have entered inside the body
D	Hepatitis B vaccine	S	Innate immunity

- (1) A – R, B – S, C – Q, D – P
- (2) A – S, B – R, C – P, D – Q
- (3) A – R, B – S, C – P, D – Q
- (4) A – Q, B – P, C – R, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

86. Opioids are the drugs, which bind to specific opioid receptors present in our

- (1) Central nervous system
- (2) Gastrointestinal system
- (3) Both (1) and (2)
- (4) Reproductive system

87. During replication of retrovirus:

- (1) Viral protein is introduced in the host cell
- (2) Viral RNA is introduced into the host cell
- (3) Viral DNA is introduced into the host cell
- (4) Transcriptase enzyme is introduced into the host cell

88. What is the mode of transmission of Chicken gunya?

- (1) Air borne, droplets
- (2) Faeces
- (3) Aedes mosquito
- (4) Water borne

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

89. A person without thymus would not be able to

- (1) Reject a tissue transplant
- (2) Receive a tissue transplant
- (3) Develop an inflammatory response
- (4) Produce antigens

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

90. Choose the odd one out w.r.t. viral disease.

- (1) Malaria
- (2) Dengue
- (3) Common cold
- (4) AIDS

91. Non-specific host defence that is present prior to the exposure to an antigen is called

- (1) Innate immunity
- (2) Passive immunity
- (3) Artificial immunity
- (4) Active immunity

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

92. Opium is obtained from

- (1) *Papaver somniferum*
- (2) *Rauwolfia serpentina*
- (3) *Cannabis sativa*
- (4) *Claviceps purpureus*

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

93. Match the columns I and II.

Column I		Column II	
A	Typhoid	P	<i>Ascaris lumbricoides</i>
B	Ascariasis	Q	<i>Wuchereria bancrofti</i>
C	Filariasis	R	<i>Entamoeba histolytica</i>
D	Amoebiasis	S	<i>Salmonella typhimurium</i>

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – P, C – Q, D – R
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

94. Match the columns I and II.

Column I		Column II	
A	<i>Datura</i>	P	<i>Erythroxylum coca</i>
B	Cocaine	Q	<i>Papaver somniferum</i>
C	Opioids	R	Hallucinogens
D	Cannabinoids	S	<i>Cannabisativa</i>

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

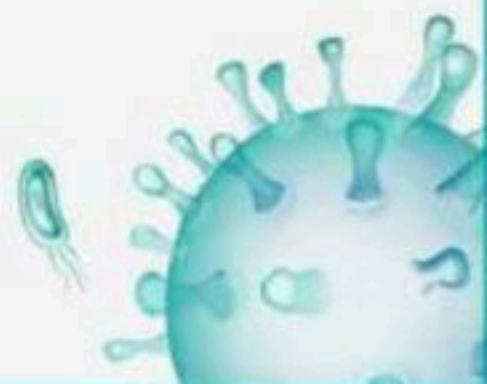

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

95. Match the column I with column II

Column I		Column II	
A	Primary lymphoid organ	P	Thymus
B	Autoimmunity	Q	Spleen
C	Lobe like organ near the heart, coloured pink	R	Bone marrow
D	Organ like bean shape	S	Myasthenia gravis

- (1) A – R, B – S, C – P, D – Q
(2) A – S, B – R, C – P, D – Q
(3) A – S, B – P, C – Q, D – R
(4) A – Q, B – P, C – R, D – S

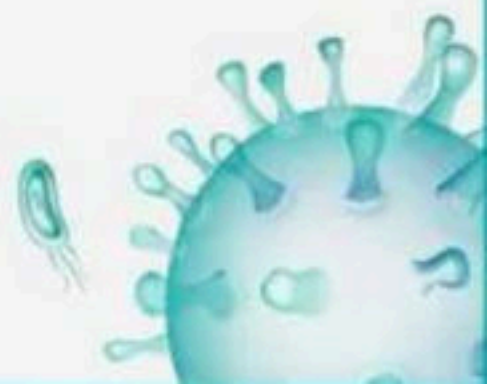

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

96. Match the columns I and II

Column I		Column II	
A	<i>Salmonella typhi</i>	P	Amoeboid protozoa
B	<i>Entamoeba histolytica</i>	Q	Widal
C	<i>Plasmodium falciparum</i>	R	Malignant malaria
D	<i>Wuchereria bancrofti</i>	S	Lymph nodes

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – Q, C – S, D – R
- (4) A – Q, B – P, C – R, D – S

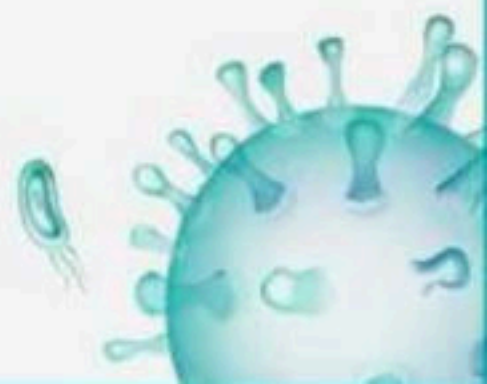

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

97. Match the following columns and choose the correct option:

Column I		Column II	
A	<i>Haemophilus influenzae</i>	P	Malignant malaria
B	<i>Entamoeba histolytica</i>	Q	Elephantiasis
C	<i>Plasmodium falciparum</i>	R	Pneumonia
D	<i>Wuchereria bancrofti</i>	S	Amoebiasis

- (1) A - R, B - S, C - P, D - Q
- (2) A - S, B - P, C - Q, D - R
- (3) A - R, B - P, C - Q, D - S
- (4) A - Q, B - R, C - S, D - P

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

98. Match the column I with column II.

Column I		Column II	
A	AIDS reported first	P	HIV
B	Diagnosis test of AIDS	Q	1981
C	Group of retrovirus	R	5-10 years
D	Time-lag for HIV	S	ELISA

- (1) A – Q, B – P, C – S, D – R
- (2) A – S, B – R, C – P, D – Q
- (3) A – R, B – S, C – P, D – Q
- (4) A – Q, B – S, C – P, D – R

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

99. In the life cycle of Plasmodium in humans, which organs are involved?

- (1) Stomach
- (2)
- (3) Liver
- (4) Both 2 and 3

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

100. NK cells provides:-

- (1) Cell mediated acquired immunity
- (2) Cellular barrier in innate immunity
- (3) Cytokine barrier of innate immunity
- (4) Immunity against only viral infected cells

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

101. Match the columns I and II.

Column I		Column II	
A	Khadi and village industries commission	P	Biocontrol
B	Ministry of Environment and forests	Q	Sewage treatment
C	IPM	R	Yamuna action plan

- (1) A – R, B – P, C – Q
- (2) A – Q, B – R, C – P
- (3) A – P, B – R, C – Q
- (4) A – Q, B – P, C – R

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

102. Leg haemoglobin is produced in response to

- (1) Respiration
- (2) Photosynthesis
- (3) N_2 fixation
- (4) Fatty acid synthesis

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

103. Statins are produced by the ____

- (1) Yeast *Monascus purpureus*
- (2) Bacterium *Monascus purpureus*
- (3) Phycomycetes *Monascus purpureus*
- (4) Protist *Monascus purpureus*

104. Treatment of wastewater is done by the

- (1) Photosynthetic blue green algae
- (2) Nitrogen fixing bacteria
- (3) Heterotrophic microbes
- (4) Chemosynthetic bacteria

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

105. Select the correct group of biocontrol agents.

- (1) *Bacillus thuringiensis*, Tobacco mosaic virus, Aphids
- (2) *Trichoderma*, Baculovirus, *Bacillus thuringiensis*
- (3) *Oscillatoria*, *Rhizobium*, *Trichoderma*
- (4) *Nostoc*, *Azospirillum*, Nucleopolyhedrovirus

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

106. Match List - I with List - II.

Choose the correct answer from the options given below.

Column I		Column II	
A	<i>Aspergillus niger</i>	P	Acetic acid
B	<i>Acetobacter aceti</i>	Q	Lactic acid
C	<i>Clostridium butylicum</i>	R	Citric acid
D	<i>Lactobacillus</i>	S	Butyric acid

- (1) A - R; B - P; C - S; D - Q
- (2) A - P; B - Q; C - R; D - S
- (3) A - Q; B - R; C - P; D - S
- (4) A - S; B - Q; C - P; D - R

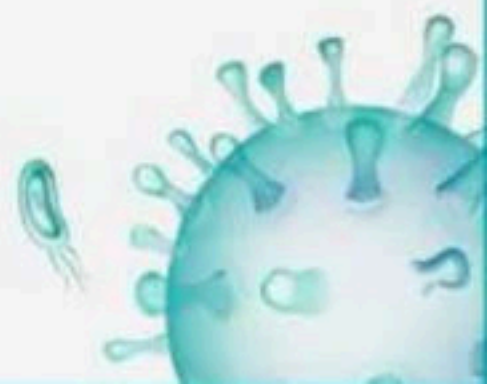

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

107. Match Column I with Column II

Column I		Column II	
A	<i>Clostridium butylicum</i>	P	Ethanol
B	<i>Saccharomyces cerevisiae</i>	Q	Streptokinase
C	<i>Trichoderma polysporum</i>	R	Butyric acid
D	<i>Streptococcus sp</i>	S	Cyclosporin-A

- (1) A – R, B – P, C – Q, D – S
- (2) A – Q, B – S, C – R, D – P
- (3) A – R, B – P, C – S, D – Q
- (4) A – S, B – P, C – R, D – Q

108. Which of the following is put into anaerobic sludge digester for further sewage treatment?

- (1) Floating debris
- (2) Effluents of primary treatment
- (3) Activated sludge
- (4) Primary sludge

109. The domestic sewage mixes with river water

- (1) Small animals like rats will die after drinking river water.
- (2) The increased microbial activity releases micronutrients such as iron.
- (3) The decreased microbial activity uses up dissolved oxygen.
- (4) The increased microbial activity uses up dissolved oxygen

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

110. Match the following organisms with the products they produce. Select the correct option.

Column I		Column II	
A	<i>Lactobacillus</i>	P	Cheese
B	<i>Saccharomyces cerevisiae</i>	Q	Curd
C	<i>Aspergillus niger</i>	R	Citric acid
D	<i>Acetobacter aceti</i>	S	Bread
		T	Acetic acid

(1) A - Q; B - S; C - T; D - R

(2) A - Q; B - S; C - R; D - T

(3) A - R; B - S; C - T; D - P

(4) A - Q; B - P; C - R; D - T

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

111. Bt cotton variety that was developed by the introduction of toxin gene of *Bacillus thuringiensis* (Bt) is resistant to:

- (1) Fungal diseases
- (2) Plant nematodes
- (3) Insect predators
- (4) Insect pests

112. The primary treatment of sewage water involves

- (1) Anaerobic bacterial activity
- (2) Sludge digestion
- (3) Filtration and sedimentation
- (4) Aerobic bacterial activity

113. *Bacillus thuringiensis* forms protein crystals which contain insecticidal proteins. This protein

- (1) Is coded by several genes including the gene cry.
- (2) Binds with epithelial cells of midgut of the insect pest ultimately killing it.
- (3) Is activated by acidic of the foregut of the insect pest.
- (4) Does not kill the carrier bacterium which is itself resistant to this toxin.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

114. A good producer of citric acid is_____

- (1) Aspergillus
- (2) Mucor
- (3) Rhizopus
- (4) Penicillium

**115. Cyclosporin , an immunosuppressive agent
commercially obtained from**

- (1) *Trichoderma viridea*
- (2) *Trichoderma harzianum*
- (3) *Trichoderma polysporum*
- (4) *Trichoderma reesei*

116. Microbe used for bio control of pest butterfly caterpillars is

- (1) *Bacillus thuringiensis*
- (2) *Bacillus thermolactis*
- (3) *Bacillus tequilensis*
- (4) *Bacillus thio-parans*

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

117. Consider the statements (A-D) about organic farming, choose the correct statements

- A. Utilises genetically modified crops like Bt cotton.**
- B. Uses only naturally produced inputs like compost.**
- C. Doesnot use pesticides and urea.**
- D. Produces vegetables rich in vitamins and minerals**

- (1) A, C and D
- (2) B and C
- (3) A and B
- (4) D and B

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

118. Match the following columns and select the correct option.

Column I		Column II	
A	<i>Clostridium butylicum</i>	P	Cyclosporin-A
B	<i>Trichoderma polysporum</i>	Q	Butyric acid
C	<i>Monascus</i>	R	Citric acid
D	<i>Aspergillus niger</i>	S	Blood cholesterol lowering agent

(1) A - Q; B - P; C - S; D - R

(2) A - P; B - Q; C - S; D - R

(3) A - S; B - R; C - Q; D - P

(4) A - R; B - S; C - Q; D - P

119. Which of the following in sewage treatment removes suspended solids?

- (1) Secondary treatment
- (2) Primary treatment
- (3) Sludge treatment
- (4) Tertiary treatment

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

120. Methanogens belong to

- (1) Archeabacteria
- (2) Eubacteria
- (3) Mycoplasma
- (4) Cyanobacteria

121. Which of the following can be used as a biocontrol agent in the treatment of plant disease?

- (1) Trichoderma
- (2) Chlorella
- (3) Anabaena
- (4) Lactobacillus

122. Which one of the following equipments is essentially required for growing microbes on a large scale, for industrial production of enzymes?

- (1) BOD incubator
- (2) Sludge digester
- (3) Industrial oven
- (4) Bioreactor

123. Which of the following is correctly matched for the product produced by them?

- (1) Methanobacterium : Lactic acid
- (2) Penicillium notatum: Acetic acid
- (3) Saccharomyces cerevisiae : Ethanol
- (4) Acetobacter aceti : Antibiotics

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

124. The first stable product of fixation of atmospheric nitrogen in leguminous plants is

- (1) NO_2
- (2) Ammonia
- (3) NO_3
- (4) Glutamate

125. The domestic sewage in large cities

- (1) Is processed by aerobic and then anaerobic bacteria in the sewage treatment plants.
- (2) It has very high amounts of suspended solids and dissolved salts.
- (3) It has a high BOD as it contains both aerobic and anaerobic bacteria.
- (4) It has a low BOD as it contains both aerobic and anaerobic bacteria.

126. Which of the following is a commercial blood cholesterol lowering agent?

- (1) Cyclosporin A
- (2) Statin
- (3) Streptokinase
- (4) Lipases

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

127. A nitrogen fixing cyanobacteria associated with azolla in rice fields and increases crop yield.

- (1) Anabaena
- (2) Azobacter
- (3) Aulosira
- (4) Azospirillum

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

128. Which one of the following are not free living fixing cyanobacteria

- (1) Anabaena
- (2) Nostoc
- (3) Aulosira
- (4) Rhizobium

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

129. In our stomach too, the LAB functions as

- (1) Check on production of HCl
- (2) Checking disease causing microbes
- (3) Fermentation of consumed milk
- (4) Both 1 and 2

130. Mycorrhizae help in uptake of following nutrients

- (1) Sulphahtes and Manganese
- (2) Phosphorus and Nitrogen
- (3) Nitrogen and Calcium
- (4) Calcium and Selenium

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

131. Roquefort cheese employs ____ for ripening.

- (1) Fungi
- (2) Bacteria
- (3) Blue-green algae
- (4) Protist

132. Which one of the following statement is incorrect w. r. t. biofertilizer?

- (1) Biofertilizers pollute soil and groundwater.
- (2) Biofertilizers increases crop yield by 15 – 35%.
- (3) Biofertilizers are useful in all types of soil conditions.
- (4) Biofertilizers are inexpensive

133. Which one of the following is used as an immunosuppressive agent in organ-transplant patients?

- (1) Cyclosporin A
- (2) Statins
- (3) Antiseptics
- (4) Analgesics

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

134. Which of the following statements is correct?

I. Single cell protein is rich in high quality proteins but poor in fat.

II. BOD is the amount of oxygen that would be consumed if all the inorganic matter in one litre of water were oxidised by bacteria.

III. Trichoderma sp are free living fungi that are effective biocontrol agents of several pathogens.

IV. Baculoviruses are pathogens that attack insects and other arthropods.

V. Bacillus thuringiensis is first used biopesticide.

VI. Lactase enzyme is used in alcoholic fermentation.

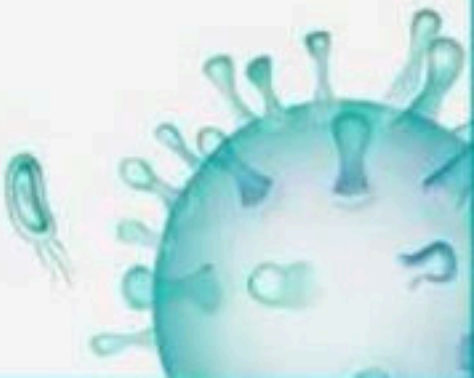

VII. Mycorrhiza is a symbiotic association between fungi e.g. Glomus and vascular plant.

(1) II, III, VI, VII

(2) I, III, IV, V, VII

(3) I, IV, VI

(4) II, VI

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

135. The bottled juices are clarified by the use of enzyme

- (1) Pectinases
- (2) Lipases
- (3) Amylases
- (4) Lactases

136. Name the micro-organism that produces the gas in dough of bread / cakes?

- (1) Saccharomyces cerevisiae, bacteria
- (2) Saccharomyces cerevisiae, fungi
- (3) Saccharomyces cerevisiae, virus
- (4) Saccharomyces cerevisiae, BGA

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

137. Which of the following is used as 'clot buster' for removing clots from blood vessels of patient who have undergone myocardial infarction?

- (1) Pectinases
- (2) Statins
- (3) Cyclosporin-A
- (4) Streptokinase

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

138. Statement A : Streptokinase is produced by Staphylococci and modified by genetic engineering

Statement B : Antibiotics are chemical substances produced by some microorganisms which can promote the growth of other diseasecausing microorganisms.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

139. Select the correct statements from the following

- (1) Activated sludge - sediment in settling tanks of sewage treatment plant is a rich source of aerobic bacteria.
- (2) Biogas is produced by the activity of virus on animal waste
- (3) Methanobacteria is an aerobic bacterium found in rumen of cattle
- (4) Bio-gas, commonly called gobar gas, is pure methane

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

140. Match the columns I and II.

Column I		Column II	
A	<i>Azospirillum</i>	P	BGA
B	<i>Rhizobium</i>	Q	Fungi
C	<i>Oscillatoria</i>	R	Symbiotic bacteria
D	<i>Glomus</i>	S	Free living

- (1) A – R, B – P, C – Q, D – S
- (2) A – S, B – R, C – P, D – Q
- (3) A – P, B – R, C – Q, D – S
- (4) A – Q, B – P, C – R, D – S

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

**141. Dung can be used as for generation of biogas,
commonly called as**

- (1) Gobar gas
- (2) LPG
- (3) Natural gas
- (4) Mustard gas

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

142. Select incorrect w.r.t sewage treatment plants.

- (1) In anaerobic sludge digester, gases like methane, H_2S and CO_2 are also produced.
- (2) Bacterial flocs are allowed to sediment in settling tank when BOD of sewage is high.
- (3) Primary treatment of sludge is based on sequential filtration and sedimentation.
- (4) Activated sludge is pumped into anaerobic sludge digesters to digest the bacteria and fungi

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

143. Which of the following food items are produced through fermentation by the microorganisms?

I. Idli, Dosa

II. Dhokla

III. Toddy, tofu

IV. Cheese, curd

(1) I, II and III

(2) I, III and IV

(3) II, III and IV

(4) All of these

144. Formation of flocs means

- (1) Association of virus with the bacterial remains in water
- (2) Bacteria which is associated with the mycorrhiza of the fungus of soil
- (3) Bacteria which is associated with the mycorrhiza of the fungus of water
- (4) Bacteria which is associated with the fungi in solid waste of the water

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

145. Name the scientist who observed a mould growing in culture plate while working on Staphylococcus bacterium?

- (1) Ernst Chain
- (2) Alexander Fleming
- (3) Norman Borlaug
- (4) Florey

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

146. The organisms which are used to enrich the nutrient quality of the soil are

- (1) Bacteria
- (2) Cyanobacteria
- (3) Fungi
- (4) All of these

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

147. The spent slurry from the biogas plant is removed and serves as ____

- (1) Production of methane
- (2) Fertiliser
- (3) Pesticide
- (4) Insecticide

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

148. Make correct pair

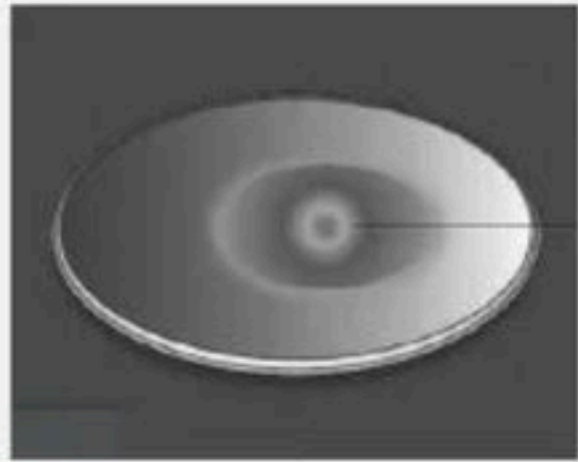

- | | |
|-----------------|---------------------------------|
| A. Citric acid | P. <i>Aspergillus niger</i> |
| B. Butyric acid | Q. <i>Clostridium butyricum</i> |
| C. Proteases | R. <i>Candida lipolytica</i> |
| D. Lipase | S. <i>Aspergillus oryzae</i> |

- (1) A - P, B - Q, C - S, D - R (2) A - R, B - Q, C - P, D - Q
(3) A - P, B - Q, C - R, D - S (4) A - Q, B - R, C - S, D - P

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

149. Which microorganism is growing on potato dextrose agar containing petri plate?

(1) Bacteria

(2) Fungi

(3) Virus

(4) Virioids

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

150. STP treatment is carried out in two stages. They are

- (1) Biological treatment
- (2) Secondary treatment
- (3) Primary treatment
- (4) All of them

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

151. Glomus is a

- (1) Genus of the kingdom cyanobacterium
- (2) Genus of the kingdom monera
- (3) Genus of the kingdom fungi
- (4) Genus of the kingdom protista

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

152. Identify the diagram given below:

(1) Fermentors

(2) Lyophilizer

(3) Fermentation plant

(4) Aerator

153. Identify the organism responsible for the production of citric acid?

- (1) *Aspergillus niger* - Ascomycetes
- (2) *Aspergillus niger* - Basidiomycetes
- (3) *Aspergillus niger* - Phycomycetes
- (4) *Aspergillus niger* - Deuteromycetes

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

154. Statement A : While working on staphylococci, Alexander Fleming observed that *Penicillium notatum* inhibits the growth of the bacteria.

Statement B : This inhibiting chemical was commercially extracted and its full potential was established by Ernest Chain and Howard Florey..

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

155. Which one of the following is the example of Microbial biocontrol agent that controls butterfly caterpillars?

- (1) *Bacillus thuringiensis*
- (2) Baculo virus
- (3) *Trichoderma*
- (4) None of these

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

156. as biocontrol agent is available in sachets as ____A____ which are mixed with water and sprayed onto vulnerable plants such as brassicas and fruit trees, which is eaten by the insect ____B____.

- (1) A - dried spores, B - adult
- (2) A - live attenuated, B - larvae
- (3) A - dried spores, B - larvae
- (4) A - live attenuated, B - adult

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

157. The primary effluent from the ____A____ tank is passed into ____B____ tanks.

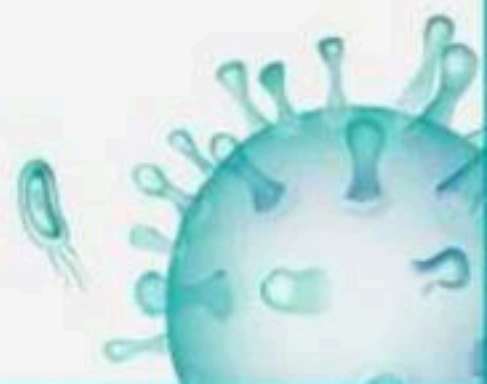

- (1) A - Settling, B - large aeration
- (2) A - Filtration, B - large aeration
- (3) A - large aeration, B - Settling
- (4) A - Settling, B - Chemical tank

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

158. Which one of the following is symbiotic biofertilizer?

- (1) Azotobacter
- (2) Clostridium
- (3) Beijerinckia
- (4) Rhizobium

159. Which among the following is incorrect statement on antibiotics?

- (1) Antibiotics are chemical substances
- (2) It is produced by some microbes
- (3) It is Bactericidal
- (4) It cannot be used on humans

160. Alcohol produced by the distillation of the fermented broth are

- (1) Wine and beer
- (2) Wine, whisky and brandy
- (3) Whisky, beer and brandy
- (4) Whisky, brandy and rum

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

161. Match the items in Column I and Column II then

Column I		Column II	
A	Blue green algae as biofertilizer	P	Ecto mycorrhiza
B	Fungi as biofertilizer	Q	<i>Trichoderma</i>
C	Bacteria as biofertilizer	R	<i>Rhizobium</i>
D	Fungi as Biocontrol	S	<i>Anabaena</i>

- (1) A - S, B - P, C - R, D - Q
- (2) A - P, B - Q, C - S, D - R
- (3) A - P, B - Q, C - R, D - S
- (4) A - P, B - R, C - P, D - Q

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

162. Methanogens are _____ and they produce methane by _____ respiration.

- (1) Archaeobacteria, Anaerobic
- (2) Archaeobacteria, Aerobic
- (3) Cyanobacteria, Anaerobic
- (4) Cyanobacteria, Aerobic

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

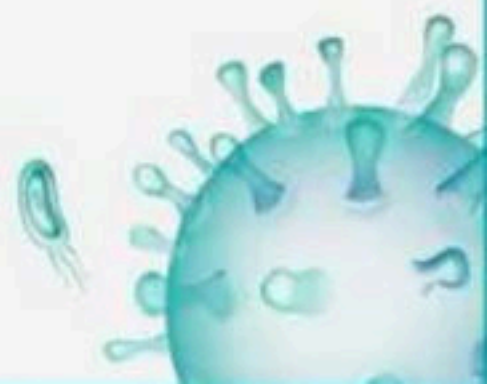

163. How many organisms in the list given below are free living nitrogen fixing bacteria? Azotobacter, Clostridium, Beijerinckia, Aerorhizobium, Azospirillum, Xanthomonas, Rhizobium, Anabaena

- (1) Four
- (2) Seven
- (3) Three
- (4) All of these

164. Identify the incorrect statement about biological control of pests/diseases using microbes?

- (1) The majority of baculoviruses used as biological control agents are in the genus Nucleopolyhedrovirus.
- (2) Trichoderma species are free-living fungi that are very common in the shoot ecosystems.
- (3) Lady bird beetle against mosquitoes
- (4) Trichoderma sp. against certain plant pathogens

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

165. Lipases are used ____

- (1) As juice clarifier
- (2) As immunosuppressant
- (3) As clot buster
- (4) In detergent formulations

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

166. Assertion : Organ transplantation patients are given immunosuppressive drugs.

Reason : Transplanted tissue has antigens which stimulate immune response of the patient.

- (1) Both Assertion and Reason are correct and Reason is the correct explanation of the Assertion.
- (2) Both Assertion and Reason are correct but Reason is not the correct explanation of the Assertion.
- (3) Assertion is correct but Reason is incorrect.
- (4) Both Assertion and Reason are incorrect

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

167. The technology of biogas production was developed in India mainly due to the efforts of

- (1) IARI
- (2) KVIC
- (3) Both (1) & (2)
- (4) ICAR

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

168. In primary treatment, floating debris is removed by

- (1) Decantation
- (2) Distillation
- (3) Sequential filtration
- (4) Fractional distillation

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

169. Select the correct answer

i. Sewage is treated in STPs to make it less polluting.

ii. STP stands for Sewage test plant

(1) Only i is correct

(2) Only ii is correct

(3) Both are correct

(4) None are correct

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

170. Which one of the following antibiotics was extensively used to treat American soldiers wounded in World War-II?

- (1) Streptokinase
- (2) Statins
- (3) Penicillin
- (4) Penicillium

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

171. Choose the incorrect pair.

- (1) Lipases - used in detergents for removing mud stains
- (2) Pectinases and proteases - used in clarifying bottled juices
- (3) Statins - Competitively inhibit the enzyme responsible for cholesterol synthesis
- (4) Streptokinase- clot buster

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

172. Which one of the following grows in milk and converts it to curd?

- (1) Lactobacillus
- (2) Streptococcus
- (3) Acetobacter
- (4) Staphylococcus

173. Which one of these microbes is used in the commercial production of acetic acid?

- (1) Acetobacter aceti (a monera)
- (2) Acetobacter aceti (a mycoplasma)
- (3) Acetobacter aceti (a bacterium)
- (4) Both 1 and 3

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

174. Statement A : Biogas is used as fuel for cooking and lighting.

Statement B : Biogas is less expensive and is a mixture of gases (containing predominantly methane).

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

175. Which of the following bacteria is present in the rumen of cattle?

- (1) Rhizobium
- (2) Azolla
- (3) Methanobacterium
- (4) Cyanobacteria

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

176. The puffed-up appearance of dough is due to the production of

- (1) CO_2
- (2) Water vapour
- (3) O_2
- (4) H_2

177. Biofertilizers include

- (1) Blue green algae, Rhizobium and other fixing bacteria
- (2) Blue green algae, Rhizobium and lichens
- (3) Rhizobium, other fixing bacteria and lichen
- (4) Blue green algae, Rhizobium and Saccharomyces

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

178. Methanogens are found in Choose the correct option.

- I. Hot thermal vents II. Marshy areas**
III. Rumen of cattle IV. Anaerobic sludge

- (1) I and II
(2) II and III
(3) II and IV
(4) II, III and IV

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

179. Statement A : *Saccharomyces cerevisiae* produces acetic acid.

Statement B : *Trichoderma polysporum* produces blood cholesterol lowering agent.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

180. Statement A : Lipases are added in detergent for removing oily stains from laundry

Statement B : Fresh spores of Bt are mixed with water and sprayed on to vulnerable plants such as brassicas and fruit trees.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

181. Statins have been commercialised as bloodcholesterol lowering agents. It acts as a ____

- (1) Competitive inhibitor of the enzyme responsible for degradation of cholesterol
- (2) Non-competitive inhibitor of the enzyme responsible for synthesis of cholesterol
- (3) Competitive inhibitor of the enzyme responsible for synthesis of cholesterol
- (4) Non- competitive inhibitor of the enzyme responsible for degradation of cholesterol

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

182. Read the following four statements to find out certain mistakes in two of them:

I. Dough, which is used for making foods such as dosa and idli is fermented by fungi and algae

II. Toddy, a traditional drink of southern India is made by fermenting sap from palms

III. Large holes in Swiss cheese are due to production of large amount of methane by *Propionibacterium shermanii*

IV. In our stomach, lactic acid bacteria play very beneficial role in checking disease causing microbes

Which are the two statements having mistakes?

(1) Statements I & III

(2) Statements I & II

(3) Statements II & III

(4) Statements III & IV

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

183. Identify the figure given below:

- (1) Colonies of bacteria growing in a petri dish
- (2) Colonies of fungi growing in a petri dish
- (3) Colonies of actinomycetes growing in a petri dish
- (4) None of these

184. Organic farming includes

- (1) Use of fertilisers and pesticides of biological origin
- (2) IPM(Integrated Pest management)
- (3) Depending on predation in nature
- (4) All of the above

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

185. Microbes include organisms which are

- (1) Protozoa, fungi
- (2) Bacteria, prions
- (3) Plant viruses, viroids
- (4) All of them

186. The vitamin whose content increases following the conversion of milk into curd by lactic acid bacteria is:

- (1) Vitamin C
- (2) Vitamin D
- (3) Vitamin B12
- (4) Vitamin E.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

187. Toddy, is made by ____A____ of sap from ____B____ tree.

- (1) A - fermentation, B - palm
- (2) A - fermentation, B - bamboo
- (3) A - aerobic respiration, B - palm
- (4) A - aerobic respiration, B - bamboo

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

188. Match the items in Column I and Column II and choose correct answer.

Column I		Column II	
A	Lady bird	P	Mathano bacterium
B	Mycorrhiza	Q	Trichoderma
C	Biological control	R	Aphids
D	Biogas	S	Glomus

(1) A-Q, B-S, C-R, D-P

(2) A-R, B-S, C-Q, D-P

(3) A-S, B-P, C-Q, D-R

(4) A-R, B-Q, C-P, D-S

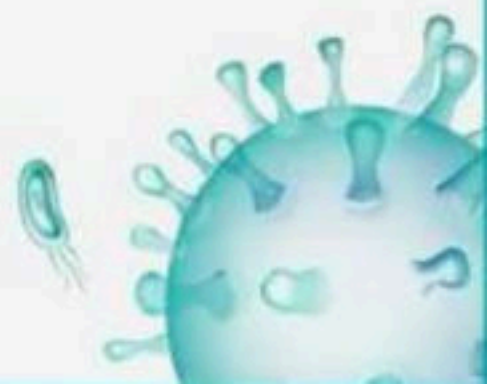

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

189. Match the following

Column I		Column II	
A	Cyclosporin-A	P	Clot busters
B	Streptokinase	Q	Antibiotic
C	Statins	R	Immuno suppressive agent
D	Penicillin	S	Blood cholesterol lowering agent

- (1) A - R, B - P, C - S, D - Q
- (2) A - R, B - S, C - P, D - Q
- (3) A - P, B - Q, C - R, D - S
- (4) A - P, B - Q, C - S, D - R

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

190. The most abundant prokaryotes helpful to humans in making curd from milk and in production of antibiotics are the one categorized as

- (1) Chemosynthetic autotrophs
- (2) Heterotrophic bacteria
- (3) Cyanobacteria
- (4) Archaeobacteria

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

191. Which of the following microbial organisms can be used as biocontrol agents?

i. Lady bird beetle and NPV,

ii. Dragon flies,

iii. Bt and Gambusia fish,

iv. Trichoderma & Bt

(1) iii, iv

(2) i, ii, iii, iv

(3) i, iii, iv

(4) iv

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

192. A person admitted to hospital as he had myocardial infarction A cardiologist injecting him 'streptokinase', why?

- (1) It reduces hypertension
- (2) It reduces the level of blood cholesterol
- (3) It stimulates heartbeat.
- (4) It acts as clot buster.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

193. The technology of biogas production from cow dung was developed in India largely due to the efforts of:

- (1) Gas Authority of India
- (2) Oil and Natural Gas Commission
- (3) Indian Agricultural Research Institute and Khadi & Village Industries Commission
- (4) Indian Oil Corporation.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

194. Certain bacteria grow anaerobically on cellulosic material, produce large amount of

- (1) Methane
- (2) CO_2
- (3) H_2
- (4) All of these

195. The scientific name of Baker's yeast

- (1) *Saccharomyces cerevisiae*
- (2) *Saccharomyces ellipsoideus*
- (3) *Saccharomyces pyreformis*
- (4) *Saccharomyces ludwigii*

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

196. Which one of the following helps in absorption of phosphorus from soil by plants?

- (1) Glomus
- (2) Rhizobium
- (3) Frankia
- (4) Anabaena

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

197. BOD refers to

- (1) Botanical oxygen demand
- (2) Biochemical oxygen demand
- (3) Bioreductive oxygen demand
- (4) Biological oxygen demand

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

198. The use of natural fertilizers, biopesticides as well as biofertilizers in agriculture is called ____

- (1) Organic farming
- (2) In organic farming
- (3) Plant breeding
- (4) Weeding

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

199. Statement A : Baculoviruses are narrow spectrum insecticides.

Statement B : These viruses are excellent choices for biocontrol in an ecologically sensitive area for integrated pest management.

- (1) Statement A is correct but Statement B is incorrect.
- (2) Statement A is incorrect but Statement B is correct.
- (3) Both statements are correct.
- (4) Both Statements are incorrect.

Title: 200 MCQs on Unit – 8 (Biology and Human Welfare)

200. All solids that settle form the ____i____, and the ____ii____ forms the effluent.

- (1) i- secondary sludge, ii- supernatant
- (2) i- primary sludge, ii- supernatant
- (3) i- primary sludge, ii- settled matter
- (4) i- secondary sludge, ii- settled matter

THANK YOU
